0 5 10 15 20 25 Miles

Map Based on 2005 Data

Accident rates shown on this map were based on all of the locatable accidents reported by police officers in 2005. Accident rates are based on the number of accidents and traffic volumes along a length of road. This rate information can be used to identify areas of concern for further study. Accident causes, including vehicle, human, and roadway factors, would need to be determined for those areas of concern before accurate determinations can be made as to the proper way to improve safety.

Accident rates do not warrant further investigation at this time. 4434 miles

Accident rates are not extremely high, but may warrant further investigation over time 271 miles

Accident rates warrant further investigation at this time 168 miles

Urban Areas (as defined by 2000 census)
