Proposed code language:

Reason / Justification:

The increased compliance for the energy efficiency of the building project from the 2009 IECC to the 2015 IECC is significant. Not only is the 2015 IECC code instituting these additional compliance measures, but then requires the building owner to incur the additional cost to increase energy efficiency in one of the six additional options that are provided.

Financial Analysis/Fiscal Impact of Proposed Amendment:

The increased cost to a project is going to be dependent upon which one of the six options is chosen to meet the compliance, but will have a substantial cost impact.
