Executive Summary

The University of New Hampshire Survey Center included fifteen questions on its July 2021 Granite State Poll for the New Hampshire Office of Highway Safety. Nearly all of these questions have been asked every year since 2010. One thousand seven hundred and ninety-four (1,794) Granite State Panel members completed the survey online between July 15 and July 19, 2021. The margin of sampling error for the survey is +/- 2.3 percent. As part of the transition of the Granite State Poll from telephone to web-based data collection, these questions were asked in 2020 both over the phone and via the web. For trend purposes, both data points from 2020 are included.

The following figures display survey results, detailed tabular results may be found in Appendix A, and Appendix B contains the survey instrument. Due to rounding, percentages may not add to 100%.

Key Findings

Licensed Drivers

Nearly all New Hampshire residents report being licensed to drive in New Hampshire. Among the few who are not licensed to drive, none say that they have driven a motor vehicle in the past sixty days.

Alcohol

Four in five New Hampshire residents report that they have not driven a motor vehicle within two hours of drinking alcohol in the past thirty days but nearly one in five report doing so 1 to 5 times in this period, a record high. Respondents aged 35 to 49 are particularly likely to report having done this.

Awareness of alcohol impaired driving enforcement has increased since 2020 after falling to a record low; this year nearly half of residents report having read, seen, or heard something about this in the past thirty days. Despite this, respondents are less likely than in 2020 to believe a person will be arrested if they drive after drinking.

Seatbelts

Four in five New Hampshire residents say they always use a seat belt, an all-time high. Very few report having seen something about seat belt enforcement recently.

Despite the fact that New Hampshire does not have a law requiring adults to wear seat belts, more than half of residents believe a person who does not wear a seat belt will get a ticket at least rarely. Older respondents and those who have lived in the state for 10 years or less are particularly likely to believe this. Granite Staters support a mandatory seat belt law, with 50% in support and 39% opposed, but support for such a law has declined slightly since 2020. Democrats, liberals, and those who have lived in the state for 20 years or less tend to support such a law while Republicans, conservatives, and those with a high school education or less tend to oppose it.

Speeding

Just over a quarter of New Hampshire residents say they always or most of the time drive faster than 35 miles per hour on a local road with a speed limit of 30 miles per hour while nearly half say they always or most of the time drive faster than 70 miles per hour on a road with a 65 mile per hour speed limit. Respondents are more likely than in 2020 to say they always or most of the time speed on roads with 65 mile per hour speed limits. Younger people are more likely than others to report frequently speeding on both high and low speed roads.

Four in ten Granite Staters say they have heard something about speed enforcement by police in the past thirty days, up very slightly compared to 2020 phone data. Only one in six believe they will always or most of the time get a ticket if driving over the speed limit, which remains an all-time low.

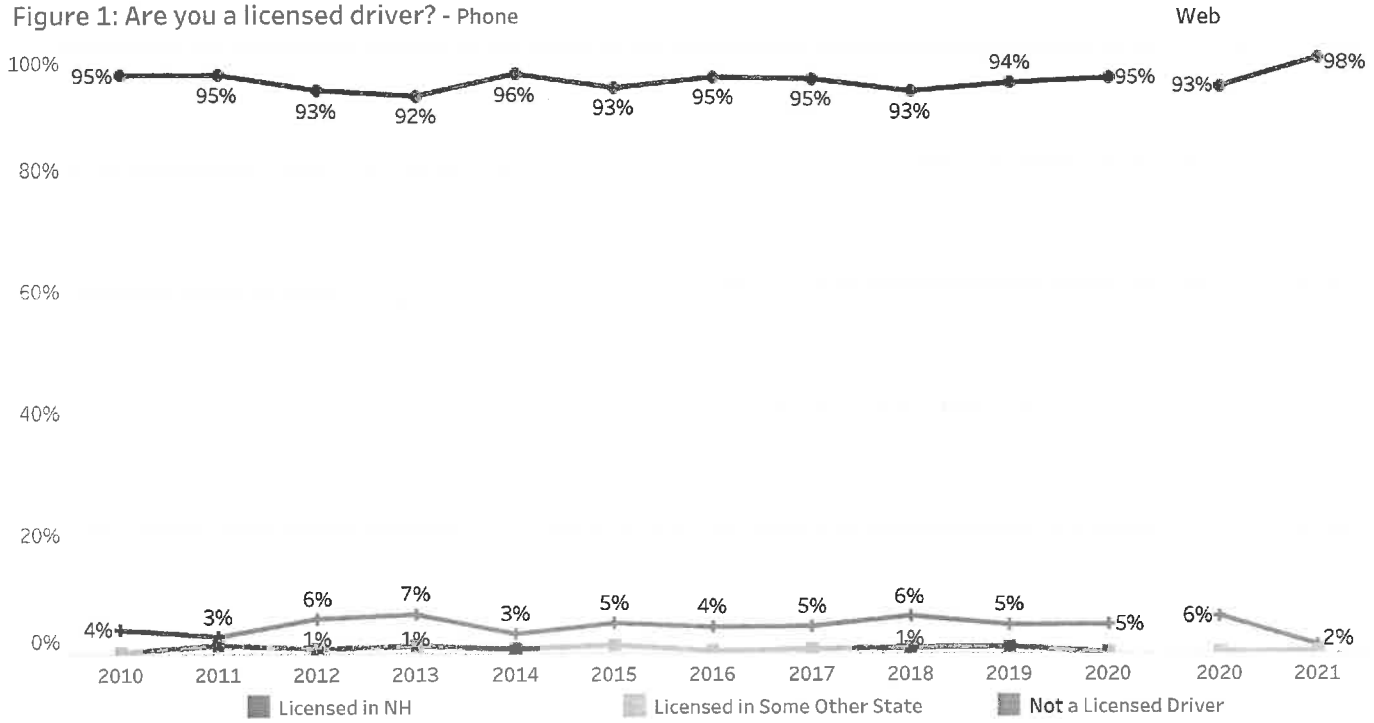
Motorcycles

One in six Granite Staters have ridden on a motorcycle in the past year; those with high incomes are particularly likely to have done this. Of those who have ridden on a motorcycle, less than half say they always or most of the time wear a helmet while doing so, while nearly the same number say they rarely or never wear a helmet.

Licensed Drivers

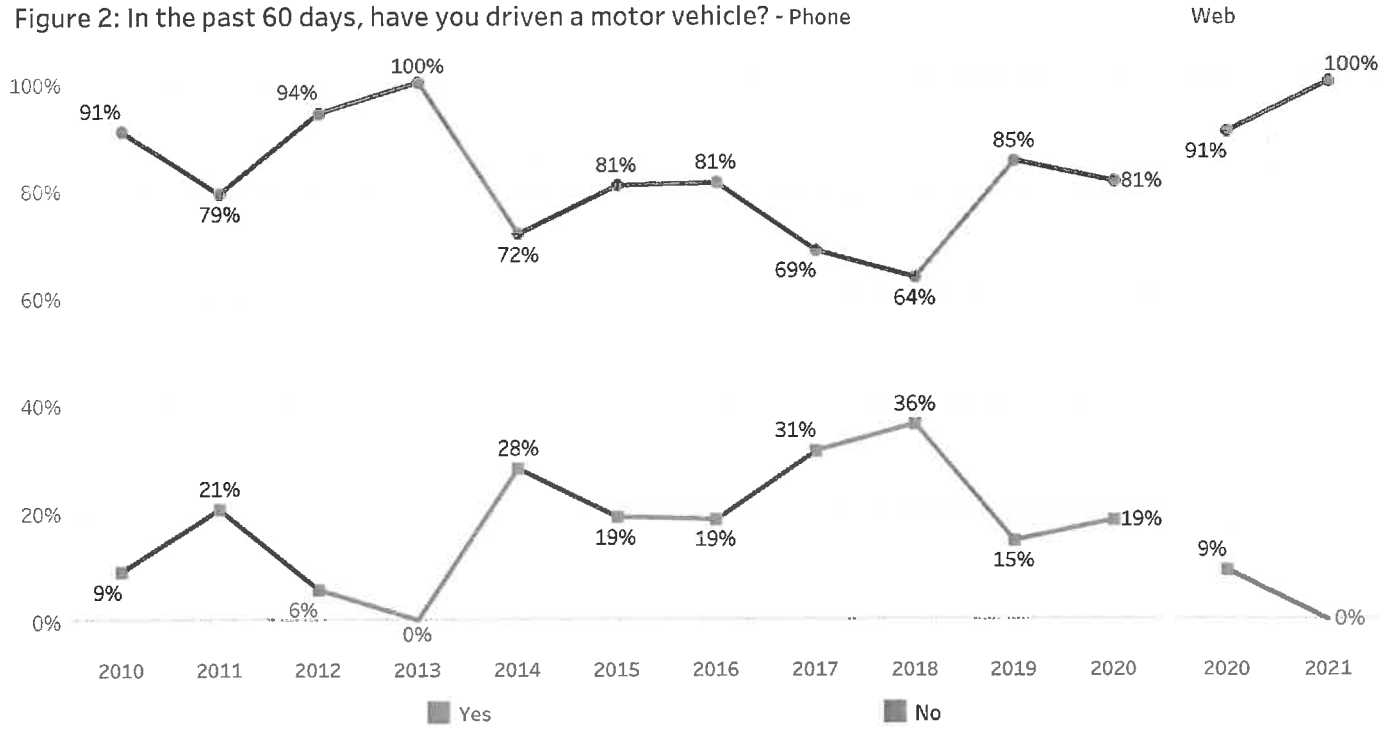
Nearly all New Hampshire residents (98%) report being licensed to drive in New Hampshire. Two percent are not licensed to drive and less than 1% say that they are licensed to drive in another state. Responses to this question have remained steady since the question was first asked in 2010.

Figure 1: Are you a licensed driver? - Phone



Among those who report that they are not licensed to drive (N=27), none (0%) say they have driven a motor vehicle in the past 60 days while 100% say they have not done so.

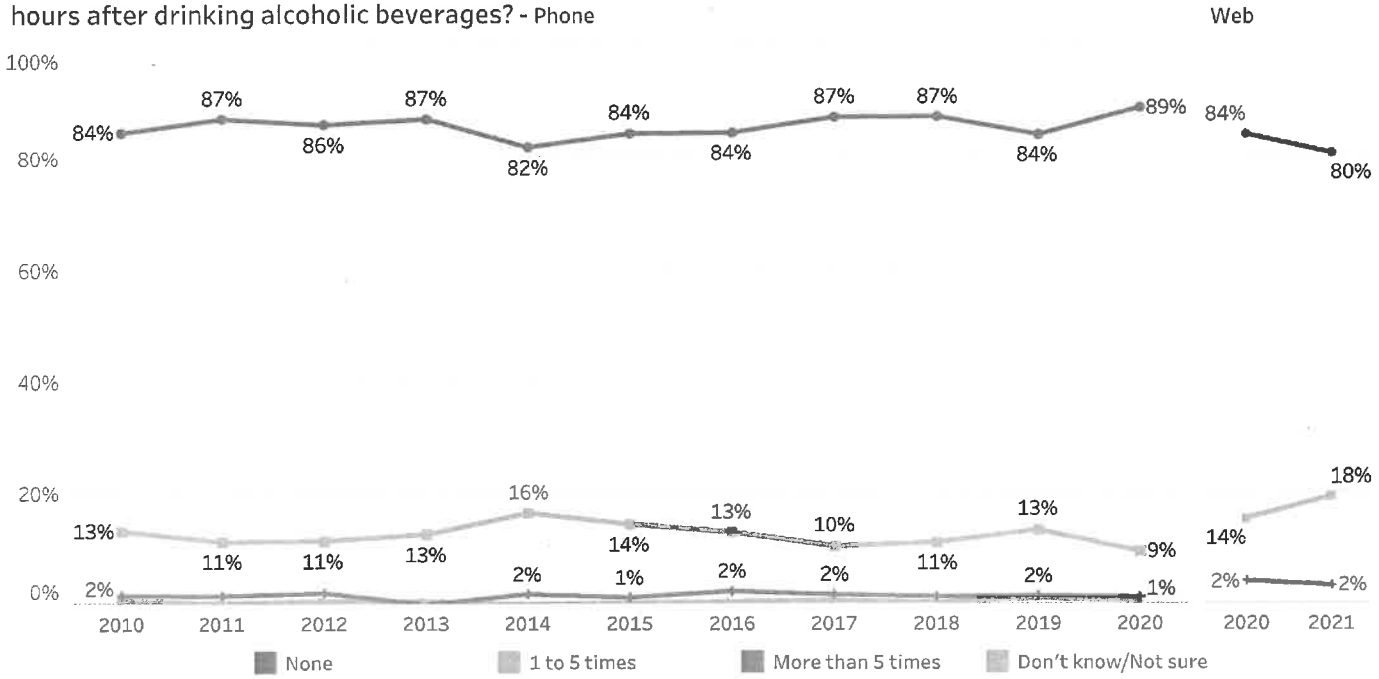
Figure 2: In the past 60 days, have you driven a motor vehicle? - Phone



Alcohol

Eighty percent of New Hampshire residents report that they have not driven a motor vehicle within two hours of drinking alcoholic beverages in the past thirty days. Eighteen percent say they have done so 1 to 5 times in the past thirty days, and 2% report having done so more than 5 times. The proportion of respondents who say they have done this at least once (20%) in the past thirty days is at an all-time high.

Figure 3a: In the past thirty days, how many times have you driven a motor vehicle within 2 hours after drinking alcoholic beverages? - Phone



Compared to 2020, respondents aged 35 to 49 (+17 percentage points) and North Country (+10) and Seacoast (+9) residents have shown the largest increases in the percentage who say they have driven a motor vehicle within two hours of drinking alcoholic beverages at least once in the past thirty days.

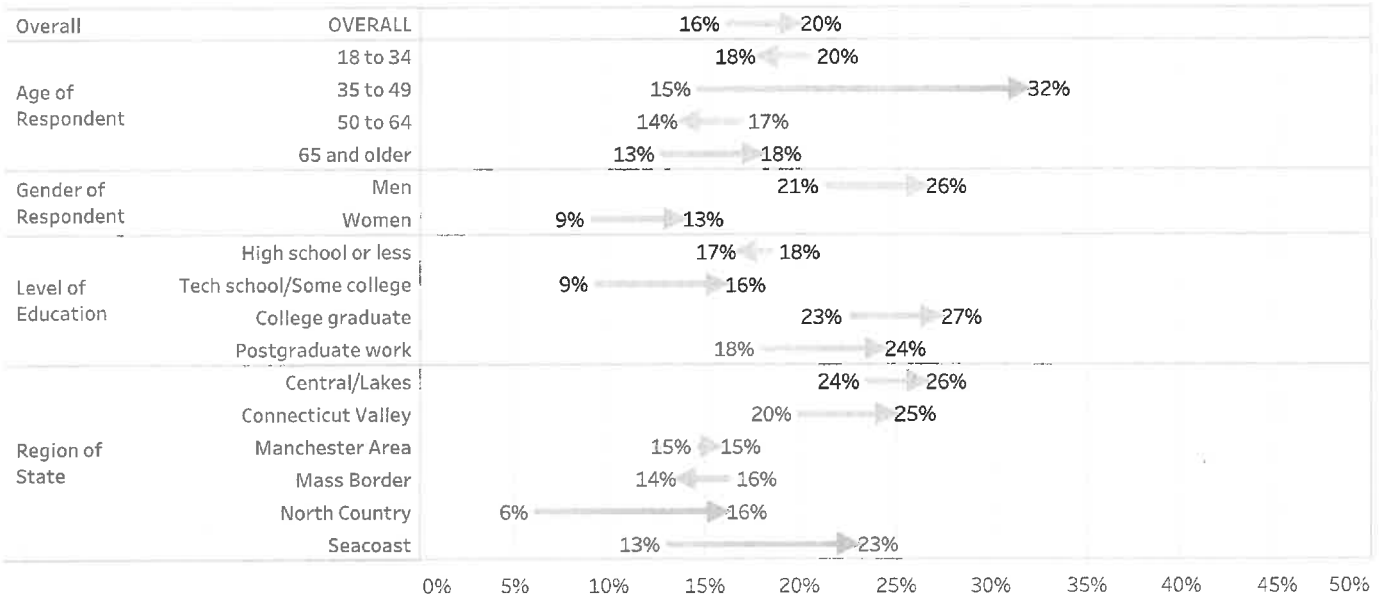
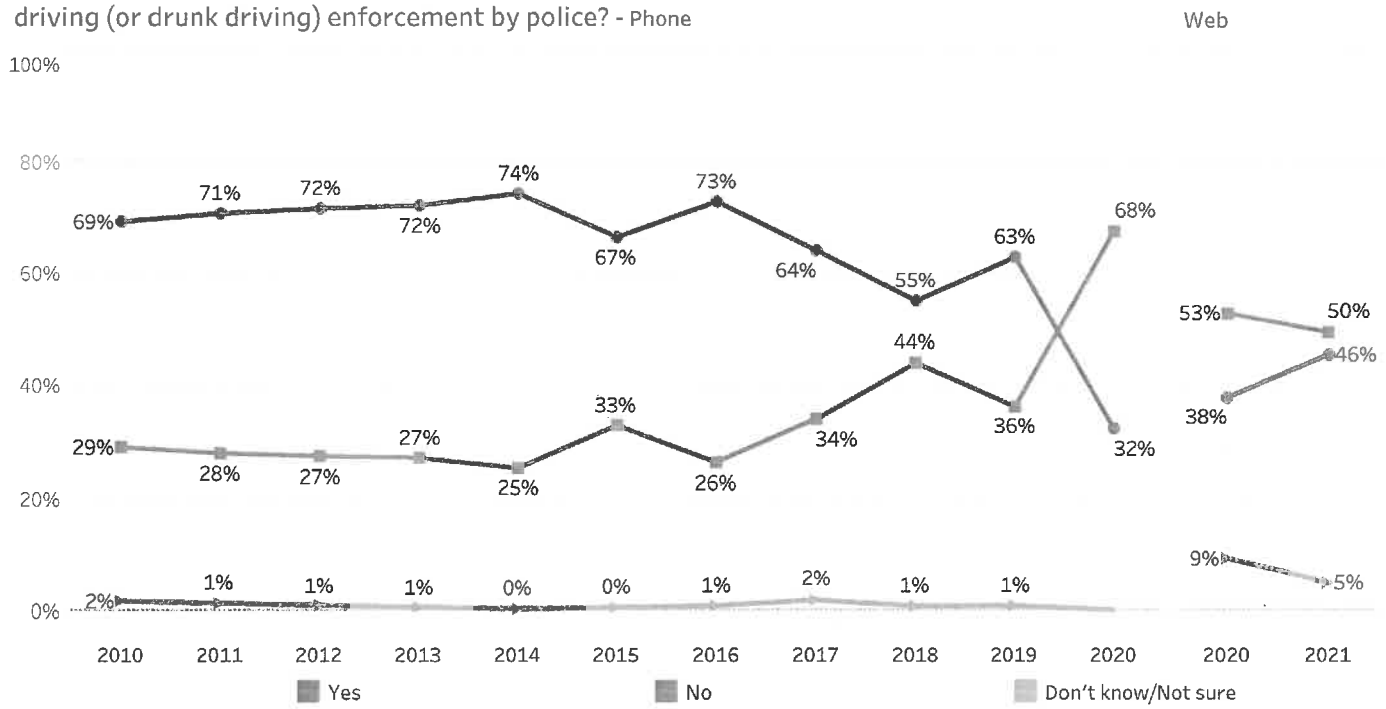
1 time or more



Forty-six percent of New Hampshire residents report having read, seen, or heard something about alcohol impaired driving (or drunk driving) enforcement by police in the past thirty days while 50% have not read, seen, or heard anything and 5% don't know or are unsure. The proportion of residents who have read, seen, or heard something in the past thirty days (46%) has rebounded compared to 2020 (32% phone, 38% web) but remains lower than in previous years.

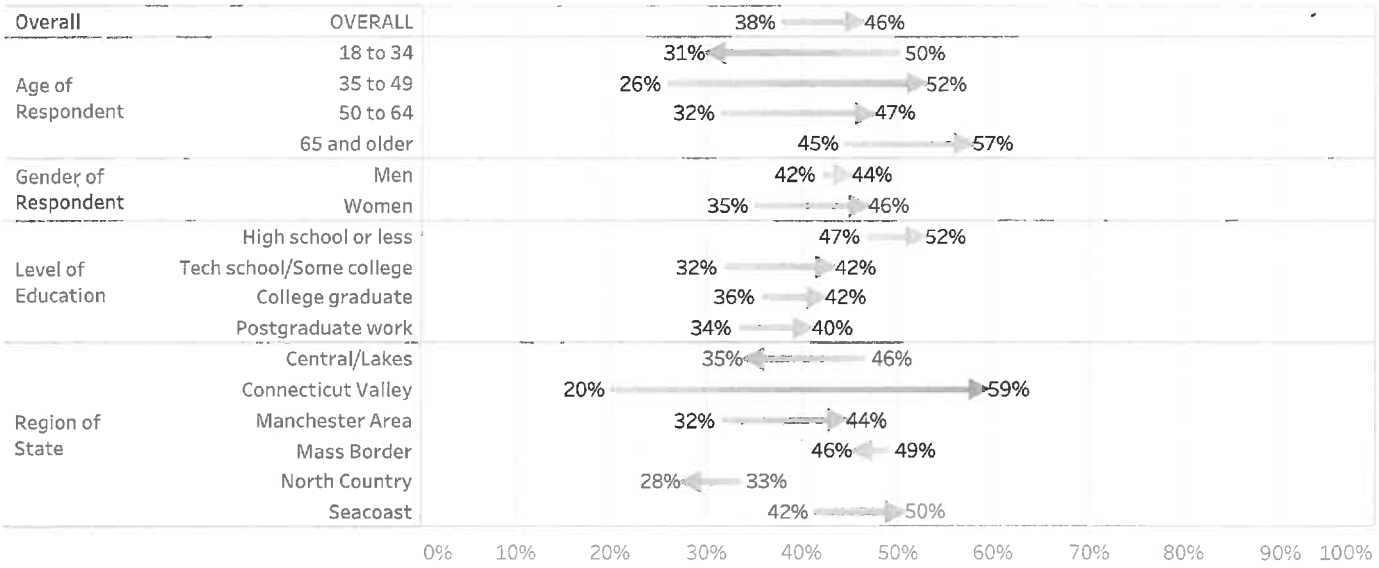
Figure 4a: In the past 30 days, have you read, seen, or heard anything about alcohol impaired driving (or drunk driving) enforcement by police? - Phone



Respondents aged 35 to 49 (+26 percentage points), 50 to 64 (+15) and 65 and older (+12), women (+11), those who have attended technical school or have some college education (+10), and Connecticut Valley (+38) and Manchester Area (+12) residents are more likely than in 2020 to have seen, read, or heard anything about alcohol impaired driving enforcement in the past thirty days. Respondents aged 18 to 34 (-19) and Central/Lakes Region residents (-11) are less likely than in 2020 to say they have seen, read, or heard anything.

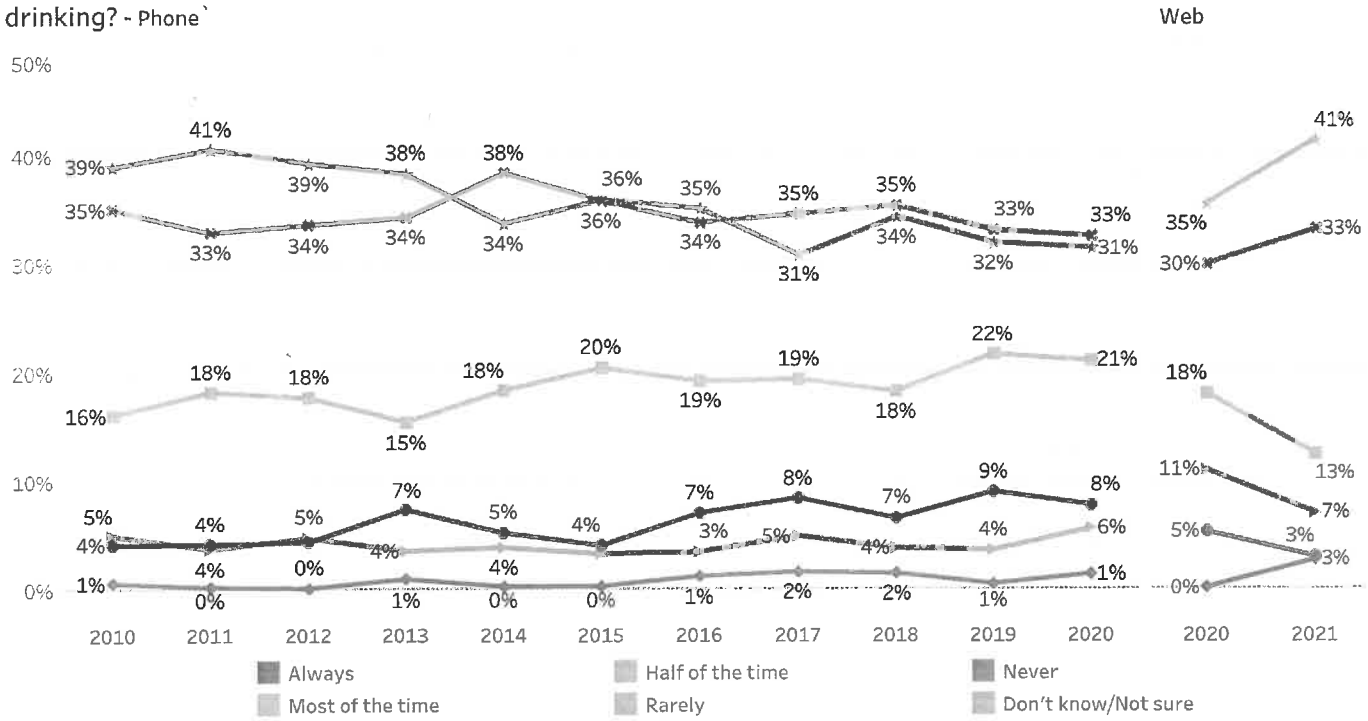
Figure 4b: Seen, read, or heard anything about alcohol impaired driving enforcement in past 30 days - Change from 2020 to 2021 (Web) - By Demographics

Yes



Only 16% of New Hampshire residents believe a person will be arrested always (3%) or most of the time (13%) if they drive after drinking, down a fair amount since 2020 (29% phone, 23% web). One-third of respondents (33%) believe a person will be arrested about half of the time if they drive after drinking, 41% believe someone will only rarely be arrested, 3% think someone in that situation will never be arrested, and 7% don't know or are unsure.

Figure 5a: What do you think the chances are of someone getting arrested if they drive after drinking? - Phone`



Compared to 2020, nearly all of the following demographic groups are less likely to believe a person will always or most of the time be arrested if they drive after drinking. Respondents aged 35 to 49 (-22 percentage points), Massachusetts Border residents (-17) and respondents with a high school degree or less (-16) are less likely to believe this is true than they were in 2020.

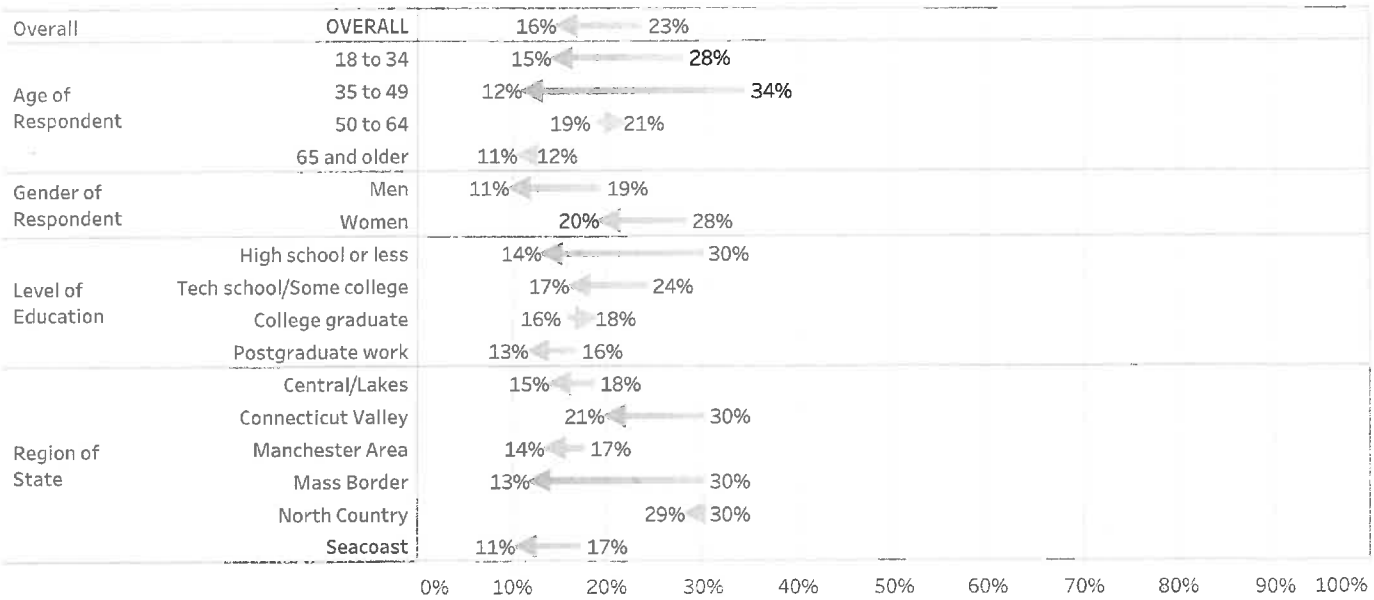
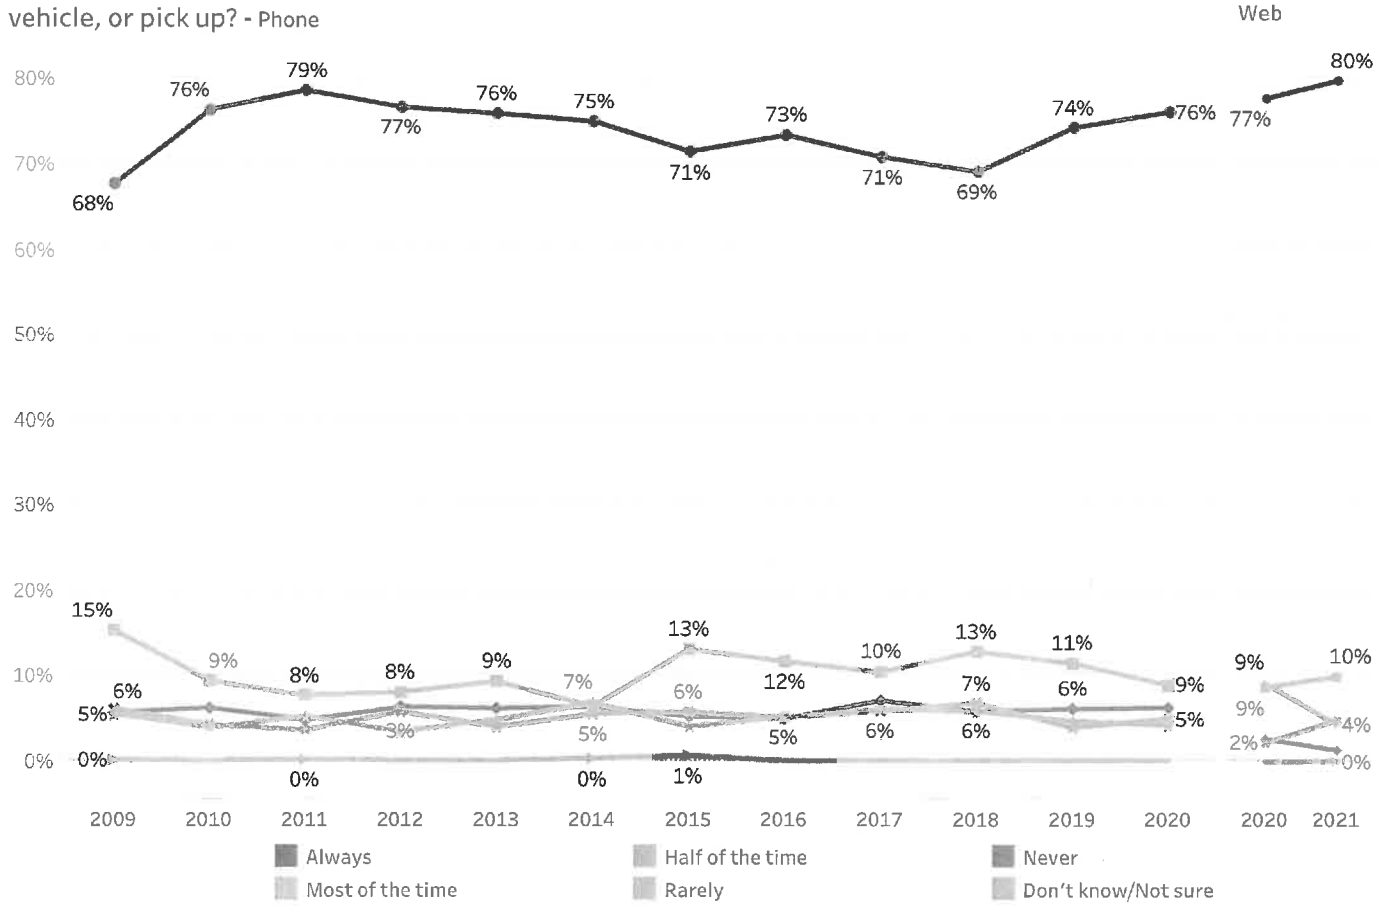
Always or Most of the time



Seatbelts

Eighty percent of New Hampshire residents report that they always use a seat belt when riding in a motor vehicle, 10% say they do so most of the time, 5% say they do so about half of the time, 4% say they rarely do so, and 1% say they never do. The percentage of respondents who say they always use a seat belt (80%) is at an all-time high.

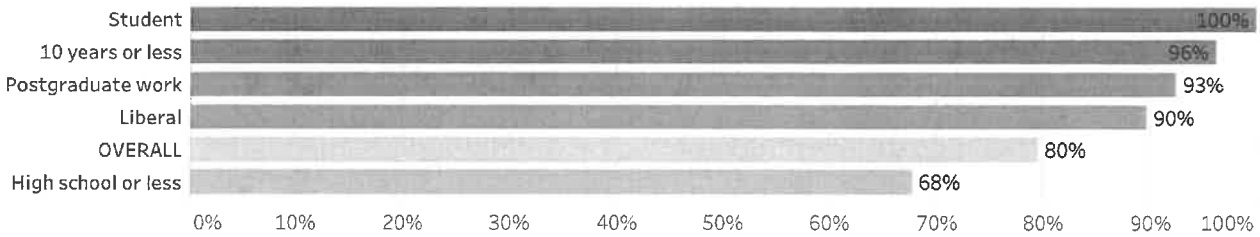
Figure 6a: How often do you use seat belts when you drive or ride in a car, van, sport utility vehicle, or pick up? - Phone



Students, those who have lived in New Hampshire for 10 years or less, those who have completed postgraduate work, and self-described liberals are more likely than others to say they always wear a seat belt when in a motor vehicle. Those with a high school education or less are less likely to always wear a seat belt.

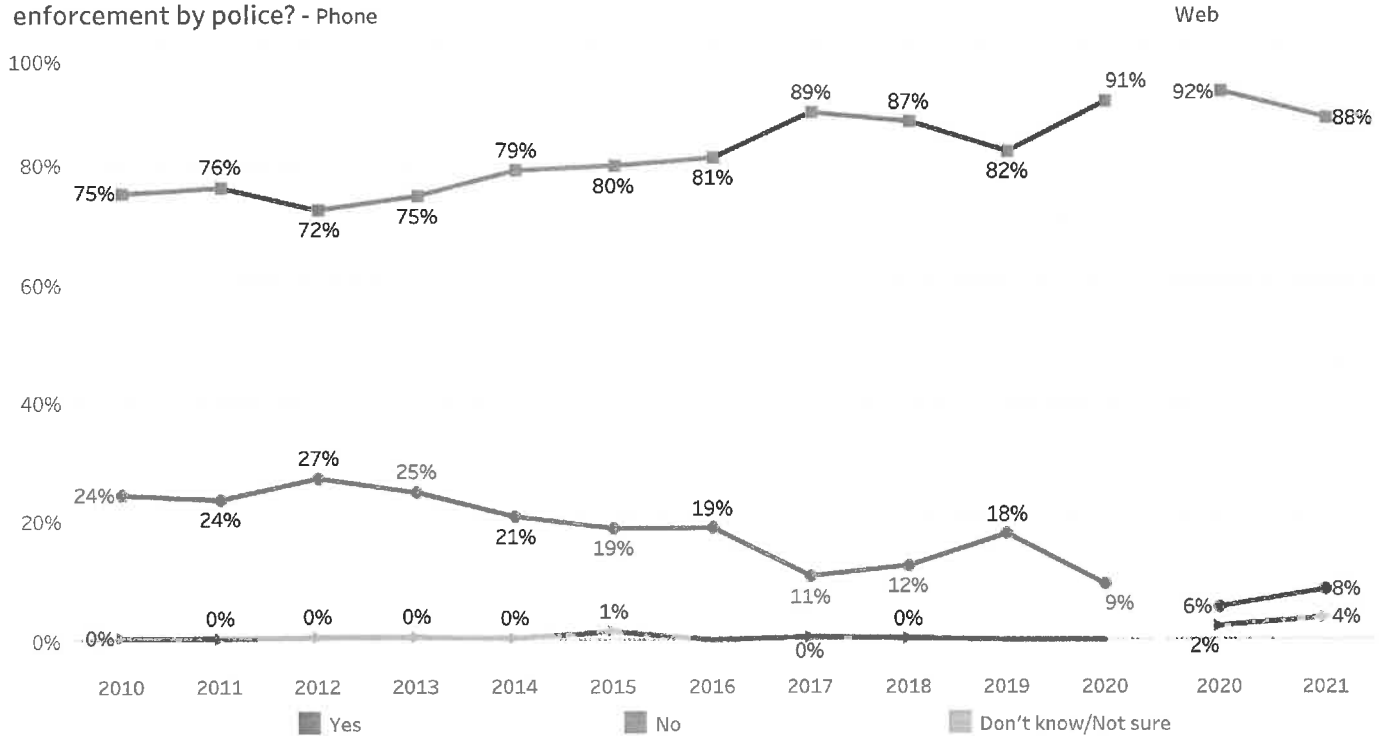
Figure 6b: Frequency Using Seat Belt When in Motor Vehicle - By Demographics

Always



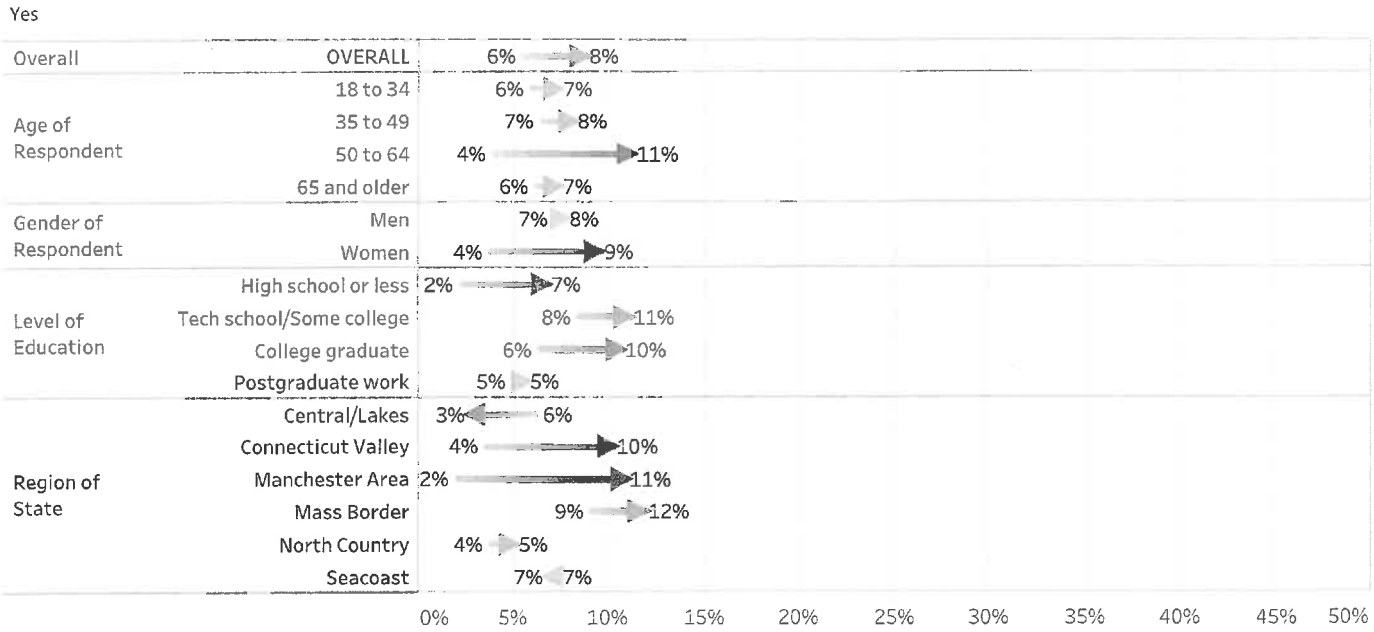
Only 8% of New Hampshire residents say they have read, seen, or heard something about seat belt law enforcement by police in the past sixty days, while 88% say they have not. The proportion of residents who report having read, seen, or heard something about this remains lower than in previous years.

Figure 7a: In the past 60 days, have you read, seen, or heard anything about seat belt law enforcement by police? - Phone



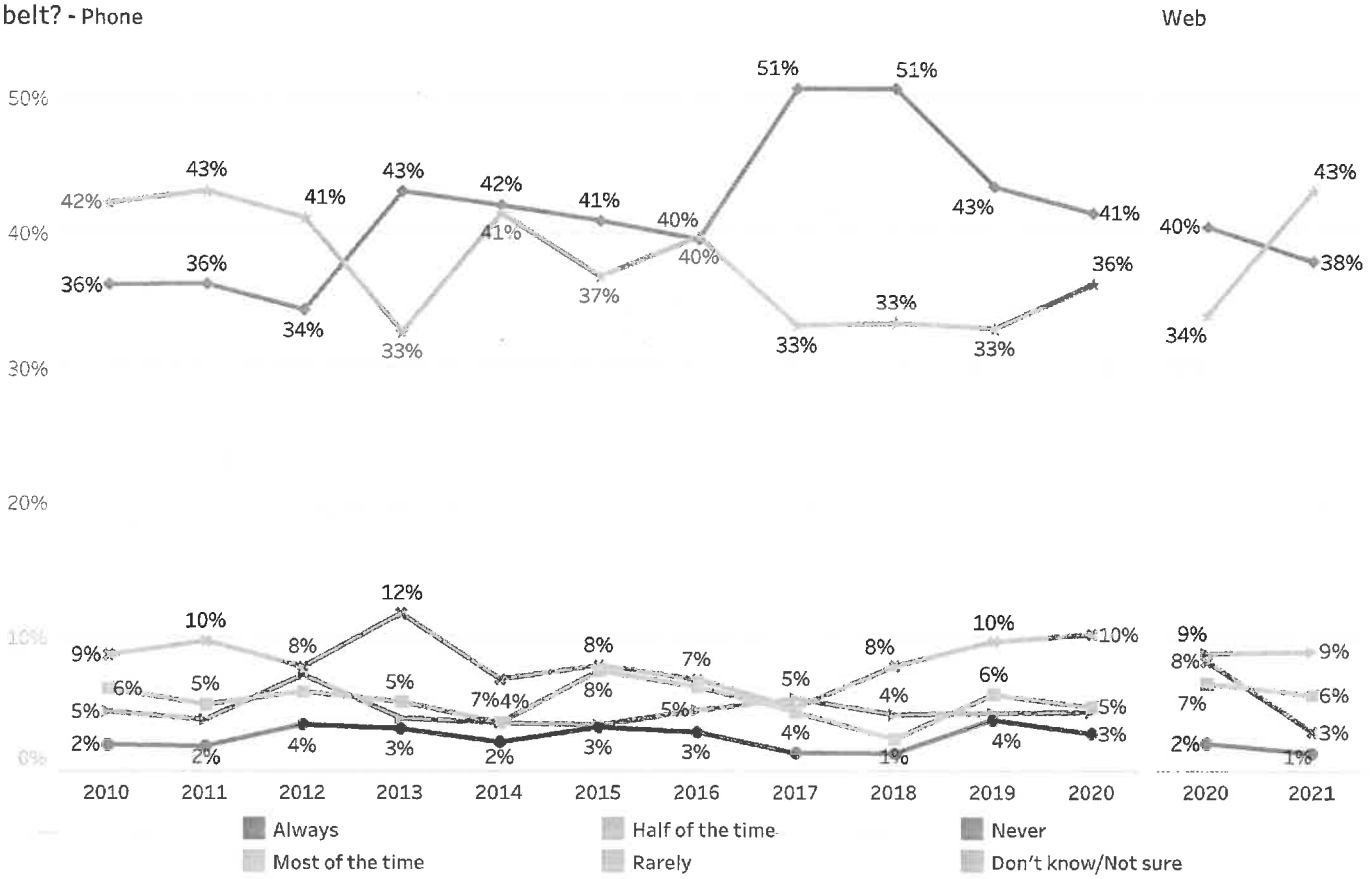
Manchester Area (+9 percentage points) and Connecticut Valley (+6) residents and those aged 50 to 64 (+7) are slightly more likely than in 2020 to have seen, read, or heard anything about seat belt law enforcement in the past sixty days.

Figure 7b: Seen Anything About Seat Belt Enforcement in Past 60 Days - Change from 2020 to 2021 (Web) - By Demographics



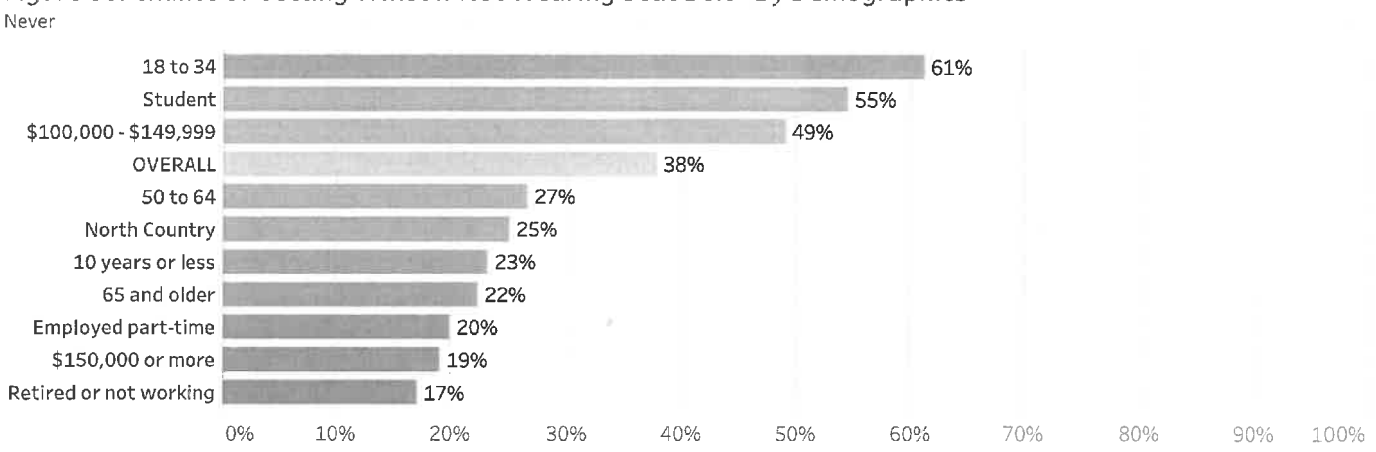
New Hampshire does not currently have a law requiring adults to wear seat belts. It is therefore not surprising that only 7% of New Hampshire residents believe a person not wearing a seat belt will get a ticket always (1%) or most of the time (6%), largely unchanged since 2020 (8% phone, 9% web). Three percent think a person not wearing a seat belt will get a ticket about half of the time, 43% think this would happen only rarely, and 38% believe a person will never get a ticket if not wearing a seat belt.

Figure 8a: What do you think the chances are of getting a ticket if you don't wear your safety belt? - Phone



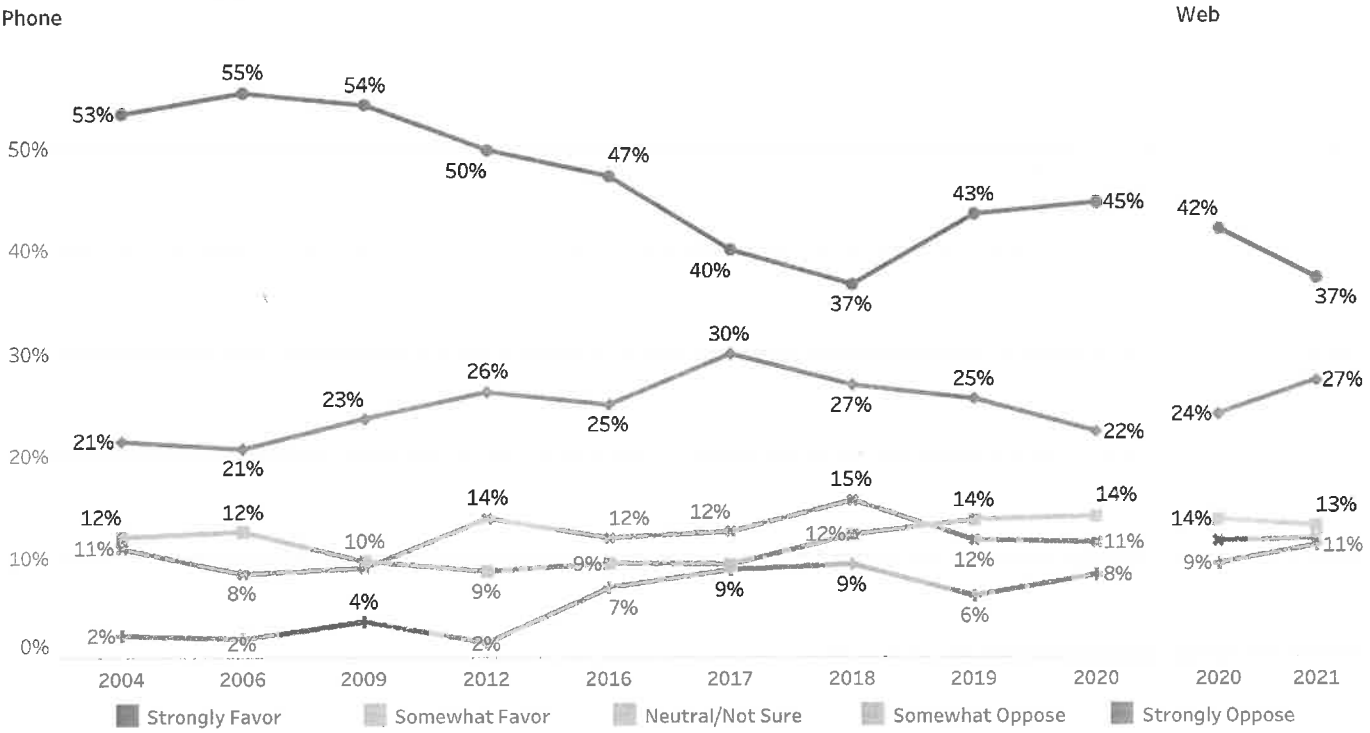
Respondents aged 18 to 34, students, and those with a household income between $100,000 and $149,999 are more likely than others to believe that a person in New Hampshire will never get a ticket for not wearing a seat belt. Those who are retired or not working, those with a household income of $150,000 or more, those who are employed part-time, those aged 50 and older, those who have lived in New Hampshire for 10 years or less, and North Country residents are less likely to believe this.

Figure 8b: Chance of Getting Ticket if Not Wearing Seat Belt - By Demographics



Fifty percent of New Hampshire residents would strongly (37%) or somewhat (13%) support a law requiring everyone in a moving vehicle to wear a seat belt. Eleven percent are neutral while four in ten (39%) strongly (27%) or somewhat (12%) oppose such a law. Support for a law requiring seat belt usage (50%) has fallen slightly since 2020 (58% phone, 55% web).

Figure 9a: Currently, New Hampshire does not require adults to wear seat belts. Would you say you favor or oppose a law requiring everyone in a moving vehicle to wear a seatbelt? - Phone



Students, self-described liberals, those aged 65 and older, self-identified Democrats, those who are retired or not working, those who have completed postgraduate work, those who have lived in New Hampshire for 20 years or less, and Seacoast residents are more likely than others to strongly or somewhat favor a law requiring everyone in a moving vehicle to wear a seat belt. Self-identified Republicans, Connecticut Valley and North Country residents, self-described conservatives, and those with a high school education or less are less likely to favor such a law.

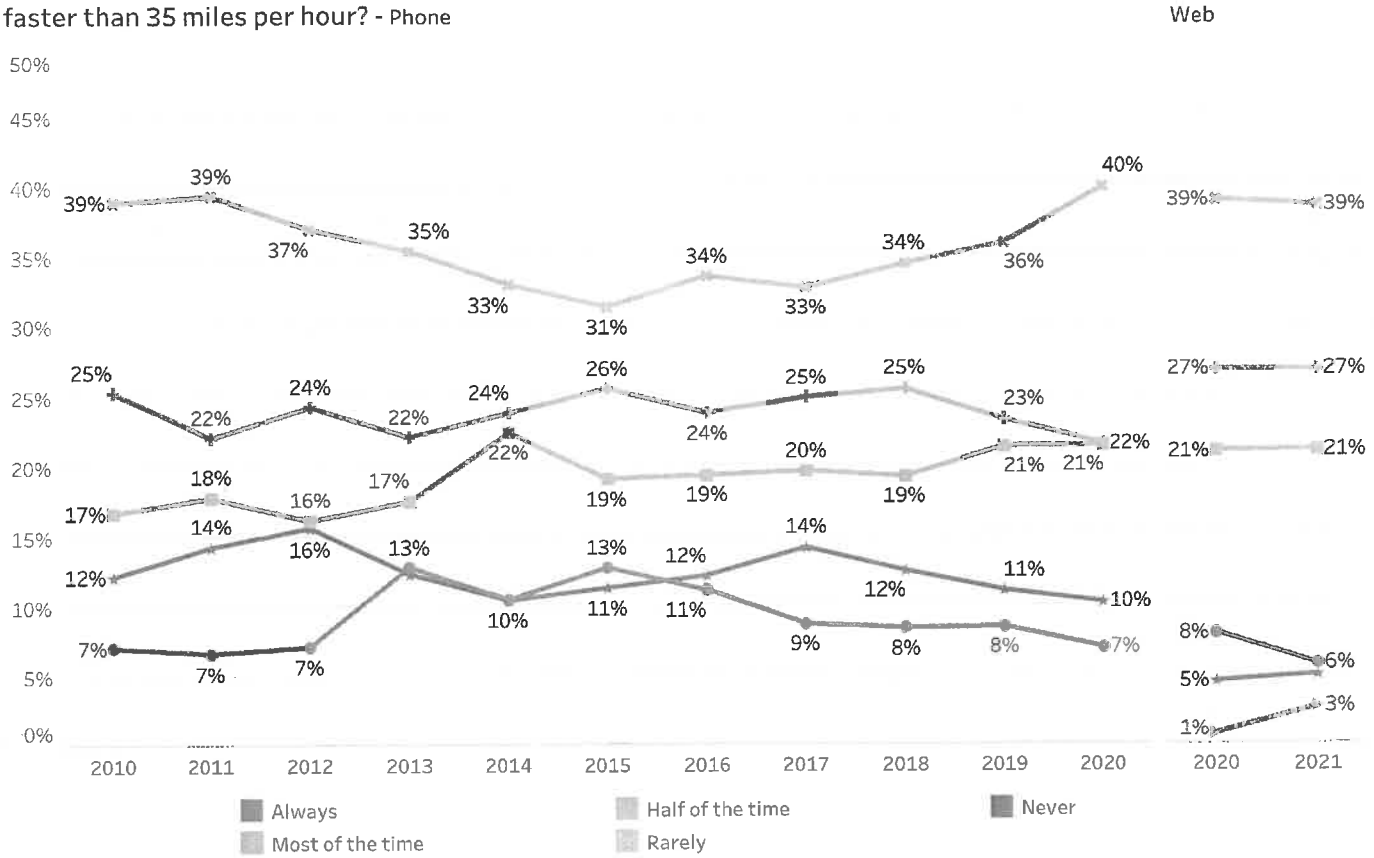
Speeding

Twenty-seven percent of New Hampshire residents report that they always (6%) or most of the time (21%) drive faster than 35 miles per hour on a local road with a speed limit of 30 miles per hour. Twenty-seven percent say they drive that fast about half of the time, 39% say they do so only rarely, and 5% say they never do so. The percent of respondents who say they always or most of the time do this (27%) is largely unchanged since 2020 (28% phone, 29% web) and has remained largely unchanged since 2013.

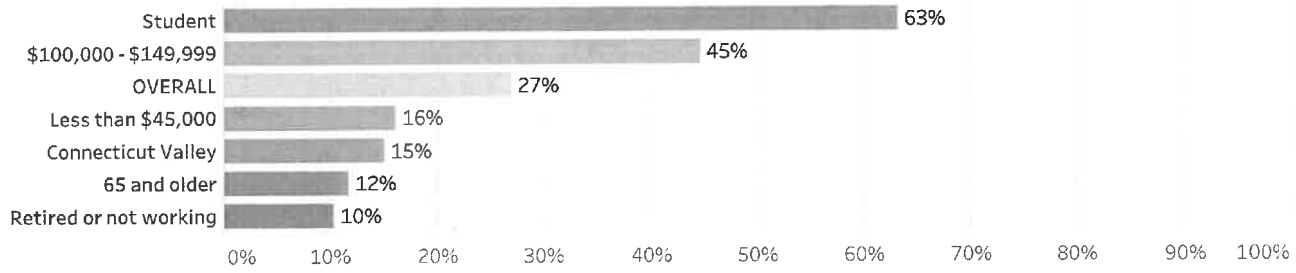
Figure 10a: On a local road with a speed limit of 30 miles per hour, how often do you drive faster than 35 miles per hour? - Phone



Students and those with a household income between $100,000 and $149,999 are more likely than others to say that they always or most of the time drive faster than 35 miles per hour on a local road with a speed limit of 30 miles per hour. Those who are retired or not working, those aged 65 and older, Connecticut Valley residents, and those with a household income below $45,000 are less likely to say they always or most of the time do so.

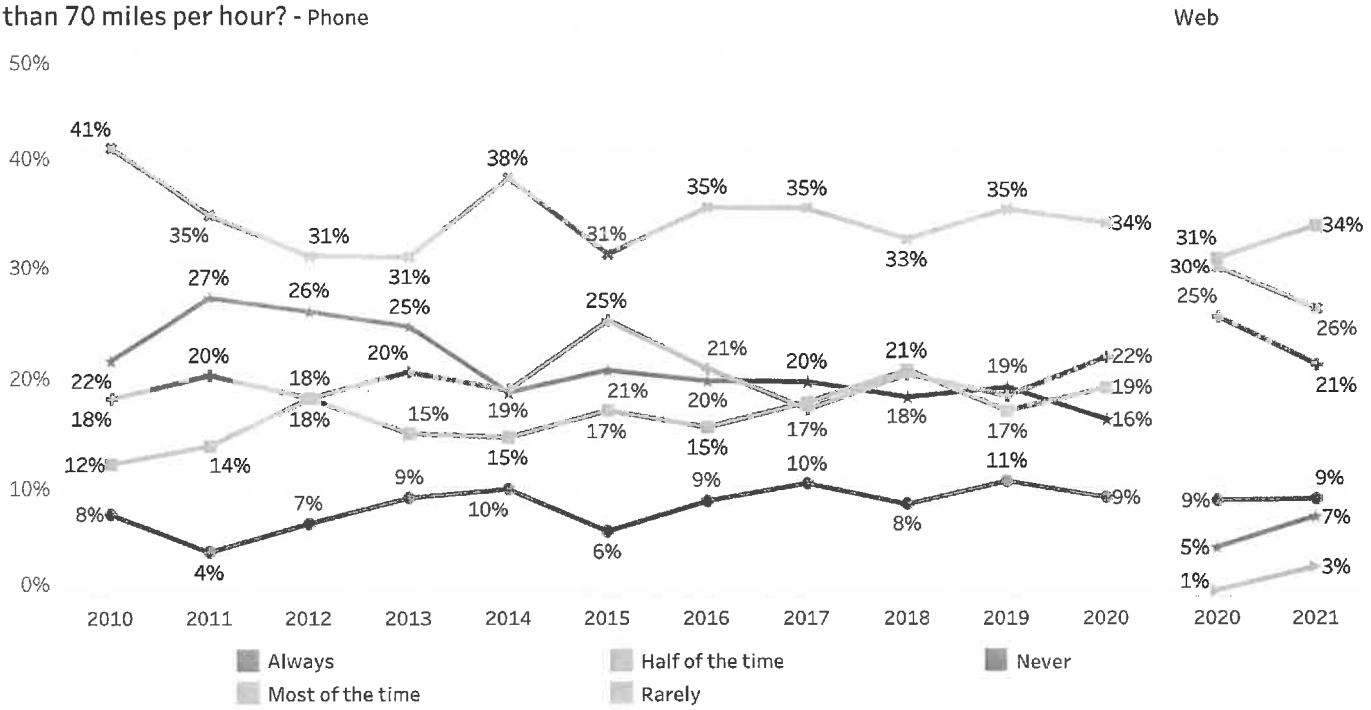
Figure 10b: Frequency Driving 35 MPH on a Local Road with a 30 MPH Speed Limit - By Demographics

Always or most of the time



Forty-three percent of New Hampshire residents report that they always (9%) or most of the time (34%) drive faster than 70 miles per hour on a road with a speed limit of 65 miles per hour. Twenty-one percent say they drive that fast about half of the time, 26% say they do so only rarely, and 7% say they never do so. Respondents continue to be more likely to report on the web that they drive faster than 70 miles per hour on a road with speed limit of 65 miles per hour than they did in previous years over the phone.

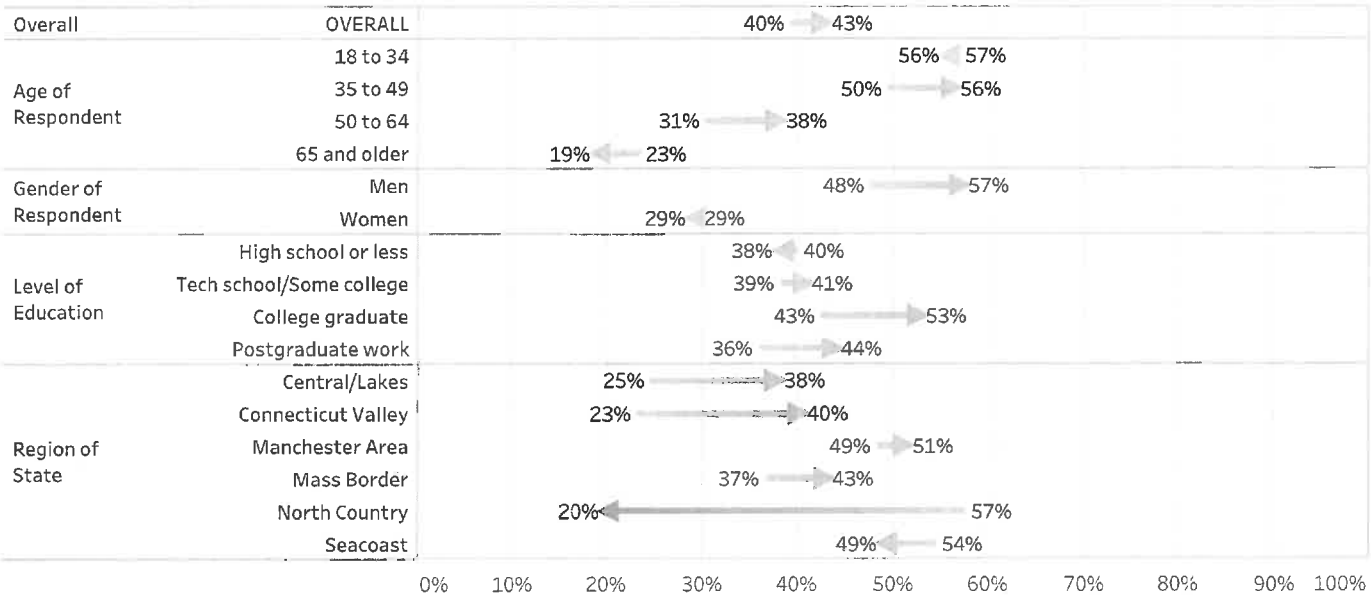
Figure 11a: On a road with a speed limit of 65 miles per hour, how often do you drive faster than 70 miles per hour? - Phone



Connecticut Valley (+17 percentage points) and Central/Lakes Region residents (+13), college graduates (+10), and male respondents (+9) are more likely than in 2020 to say they always or most of the time drive faster than 70 miles per hour on a road with a speed limit of 65 miles per hour while North Country residents (-37) are much less likely than in 2020 to say this.

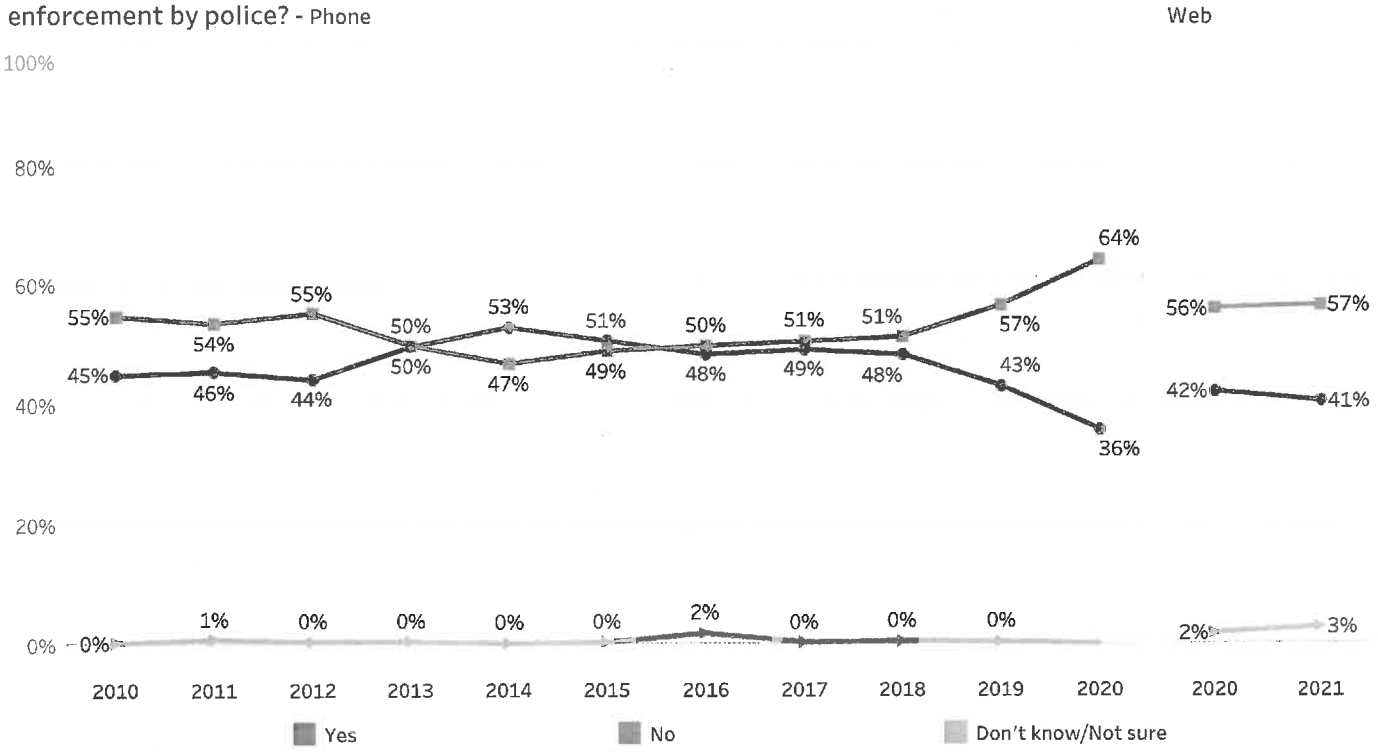
Figure 11b: Frequency Driving 70 MPH on a Road with a 65 MPH Speed Limit - Change from 2020 to 2021 (Web) - By Demographics

Always or Most of the time



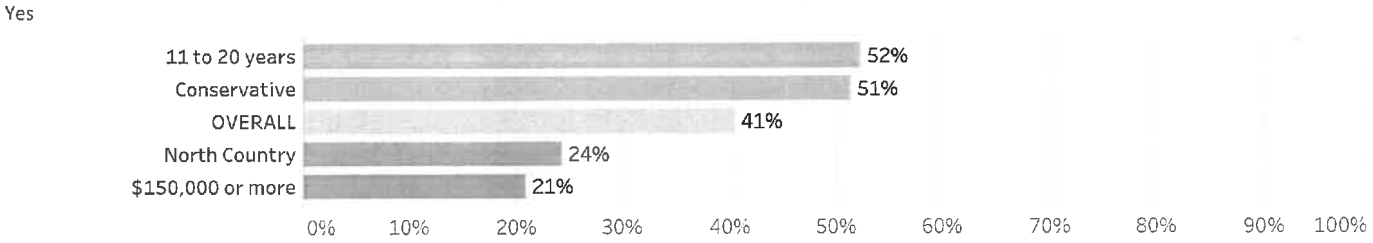
Forty-one percent of New Hampshire residents report having read, seen, or heard something about speed enforcement by police while 57% say they have not. The proportion of residents who say they have read, seen, or heard something (41%) has marginally increased compared to the 2020 phone data (36%) and is the same as the 2020 web data (42%) but remains slightly lower than earlier results.

Figure 12a: In the past 30 days, have you read, seen, or heard anything about speed enforcement by police? - Phone



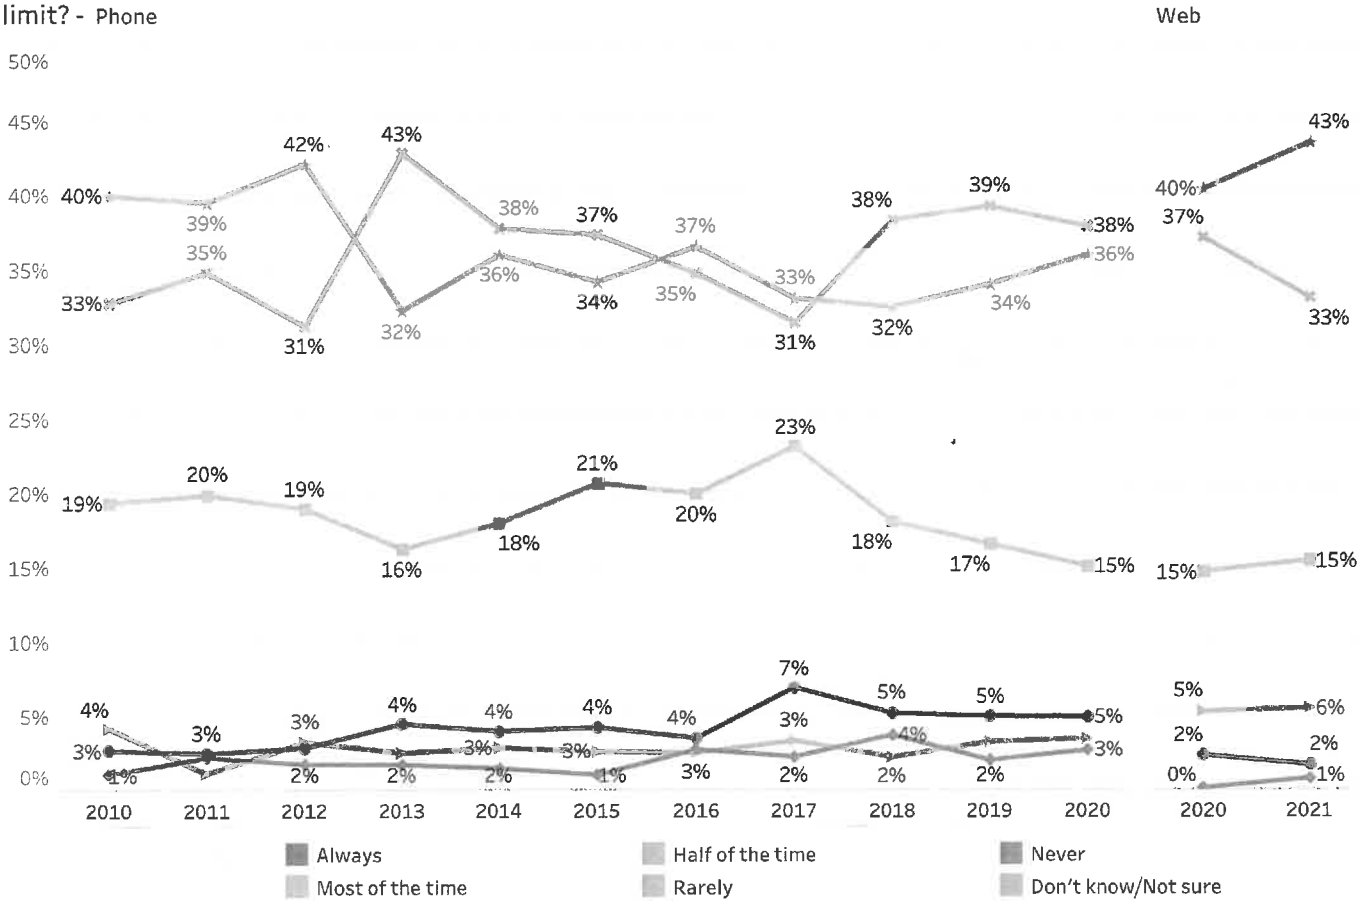
Respondents who have lived in New Hampshire for 11 to 20 years and self-described conservatives are more likely than others to say they have seen, read, or heard anything about speed enforcement in the past thirty days. Those with a household income of $150,000 or more and North Country residents are less likely to say they have read, seen, or heard something about speed enforcement in the past thirty days.

Figure 12b: Seen, read, or heard anything about speed enforcement in past 30 days - By Demographics



Seventeen percent of New Hampshire residents believe a person will always (2%) or most of the time (15%) get a ticket if they drive over the speed limit. Thirty-three percent believe a person will get a ticket half of the time if they are speeding, 43% say they will only rarely get a ticket, and 1% say someone speeding will never get a ticket. The proportion of respondents who say someone will always or most of the time get a ticket while speeding (17%) remains at an all-time low.

Figure 13a: What do you think the chances are of getting a ticket if you drive over the speed limit? - Phone



Respondents with a household income of $150,000 or more or between $75,000 and $99,999 and men are more likely than others to believe a person will rarely or never get a ticket if they drive over the speed limit. Women, those who are employed part-time, and those with a household income between $45,000 and $74,999 are less likely to believe this.

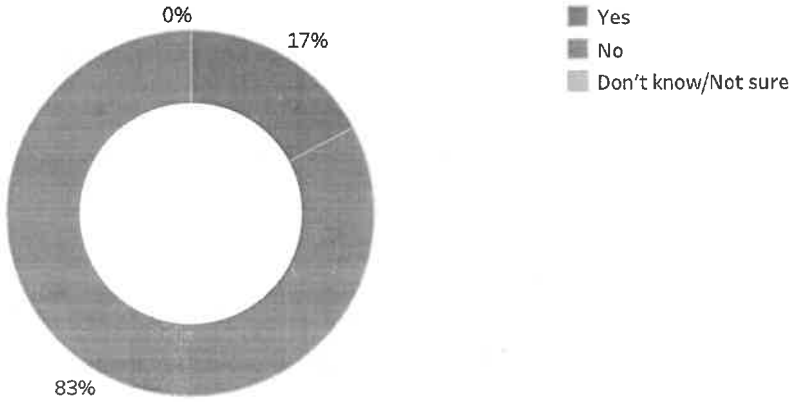
Motorcycles

Seventeen percent of New Hampshire residents say they have ridden on a motorcycle (as a driver or passenger) in the past year while 83% have not.

Figure 14a: Have you ridden on a motorcycle (as a driver or passenger) in the past year?



Students, those with a household income of $100,000 or more, Connecticut Valley residents, and those with a high school education or less are more likely than others to say they have ridden a motorcycle in the past year. Those who are employed part-time, those aged 65 and older, and those who are retired or not working are less likely to say so.

Among those who have ridden a motorcycle in the past year (N=308), 40% say that they always wear a helmet while riding a motorcycle, 7% do so most of the time, and another 7% do so half of the time. Twenty-one percent of respondents say that they rarely wear a helmet when riding on a motorcycle while 25% say they never do so.

Technical Report

How the Sample Was Selected

The July 2021 Granite State Poll survey was a web-based survey of Granite State Panel members who are recruited from randomly-selected landline and cell phone numbers across New Hampshire. The Granite State Panel is part of an effort by the University of New Hampshire Survey Center to investigate new ways of gathering and understanding the opinion of New Hampshire residents. Respondents to the Granite State Poll were asked if they wished to participate in further research and asked to provide an email address. Those who agreed and provided an email address were added to the panel. Panel members were also recruited by texting a random sample of cellular telephones in the state and inviting the recipient to take a short survey. At the conclusion of the survey, recipients were asked if they would like to join the panel and provide an email address. Respondents under the age of 18, non-New Hampshire residents, and seasonal residents who are not registered to vote in New Hampshire were excluded from this survey and did not receive an invitation to join the panel. For each survey which they complete, panel members are entered into quarterly drawings to earn rewards, such as gift certificates from statewide and internet companies.

When Data Was Collected

An invitation email was sent to Granite State Panel members on July 15th, 2021. Two email reminders were sent to non-responders and the survey was completely closed on the morning of July 19th. One thousand, seven hundred and ninety-four (1,794) Granite State Panel members completed the survey. The response rate for the July 2021 Granite State Poll is 28%.

Weighting of Data

Data were weighted by respondent sex, age, education, and region of the state to targets from the most recent American Community Survey (ACS) conducted by the U.S. Census Bureau, as well as party registration levels provided by the New Hampshire Secretary of State and to 2020 election results in New Hampshire. In addition to potential sampling error, all surveys have other potential sources of non-sampling error including question order effects, question wording effects, and non-response. Due to rounding, percentages may not sum to 100%. The number of respondents in each demographic below may not equal the number reported in cross-tabulation tables as some respondents choose not to answer some questions.

Sampling Error

The Granite State Poll, like all surveys, is subject to sampling error due to the fact that all residents in the area were not interviewed. For those questions asked of five hundred (500) or so respondents, the error is +/-4.4%. For those questions where fewer than 500 persons responded, the sampling error can be calculated as follows:

$$Sampling\ Error = \pm 1.96\sqrt{\frac{P(1-P)}{N}}$$

Where P is the percentage of responses in the answer category being evaluated and N is the total number of persons answering the particular question.

For example, suppose you had the following distribution of answers to the question, "Should the state spend more money on road repair even if that means higher taxes?" Assume 1,000 respondents answered the question as follows:

YES	47%
NO	48%
DON'T KNOW	5%

The sampling error for the "YES" percentage of 47% would be

$$\pm 1.96\sqrt{\frac{47(53)}{1000}} = \pm 3.1\%$$

for the "NO" percentage of 48% it would be

$$\pm 1.96\sqrt{\frac{48(52)}{1000}} = \pm 3.1\%$$

and for the "DON'T KNOW" percentage of 5% it would be

$$\pm 1.96\sqrt{\frac{5(95)}{1000}} = \pm 1.4\%$$

In this case we would expect the true population figures to be within the following ranges:

YES	43.9% - 50.1% (i.e., 47% ±3.1%)
NO	44.9% - 51.1% (i.e., 48% ±3.1%)
DON'T KNOW	3.6% - 6.4% (i.e., 5% ±1.4%)

The margin of sampling error for the July 2021 Granite State Panel survey is +/- 2.3 percent.

Design Effect

These MSE's have not been adjusted for design effect. The design effect for the survey is 2.9%. 2021 07 – Granite State Poll

You have been invited to participate in a study about politics and current events, sponsored by the University of New Hampshire. The use of human subjects in this project has been approved by the UNH Institutional Review Board (IRB) for the Protection of Human Subjects in Research.

- The survey will take between 10 and 15 minutes to complete.
- Participation is completely voluntary and refusal to participate will not affect you in any way. You may refuse to answer any questions or stop at any time.
- Your answers will be combined with the answers of residents across the state and used for research purposes only.
- Data will be kept in secured files, available only to the researchers. We will make every effort to maintain the confidentiality of the data.
- Research via the internet presents minimal risk of a breach of confidentiality. You are not anticipated to receive any direct benefits from participating in this research.

By clicking the "Yes, I'd like to participate" button below, you are indicating that you consent to participate in this study. If you prefer not to participate, please simply close this window in your browser.

If you have any questions about the survey, please contact Sean McKinley at the University of New Hampshire Survey Center, sean.mckinley@unh.edu or 603-862-2563.

If you have any questions about your rights as a research participant, you may contact Melissa McGee in UNH Research Integrity Services, melissa.mcgee@unh.edu or 603-862-2005 to discuss them.

Thank you for your participation!
