Mike:

As you know, LB&B has submitted a proposal for transportation services to our Commission for deliveries to our 77 state liquor stores. I have one question for you:

- Does LB&B deliver product to your agency stores on behalf of the state or at the expense of the licensee?

If there is any other information you wish to share about LB&B, I would appreciate hearing from you. Thank you.

Please consider the environment before printing this e-mail.

Commissioner:

It was good to see you at the NABCA Annual Meeting in Phoenix last month. Thank you for taking the time to speak with me about LB&B. I have another question for you:

- Does LB&B deliver product to your agency stores on behalf of the state or at the expense of the licensee?

Thank you for your assistance.

Hello Paul,

Can you investigate this request from one of my colleagues? This is an important request to our organization and we have not heard back from Steve Turchan.

Randy

Hi Steve,

Just following up on my below request. I understand you must be very busy. Just wanted to make sure you got this and to see if you have any questions.

Thanks,

Subject: Exel Meeting Follow Up - SWS

Good Morning Steve,

It was nice meeting you last Thursday at the meeting.

Per our discussion, attached is the combined Concord and Law Inventory report. I download this from the Law Whse website each morning and it converts to an Excel format for me automatically from CSV. I add, delete and format this file to suit my needs. I'm also attaching the unformatted version for your review.

As you can see, it shows a lot more than just the inventory by warehouse but also the Status (active, delisted etc.), the regular retail, sale price, supplier # etc. All of this information is very handy to have on one report and I would greatly appreciate it if I could continue to receive this same report going forward from Exel – even after the January transfer. I believe Law Whse automatically uploads a file from the state each day to create this report.

I can't stress enough how important this report is to me. Thank you for looking into this for us.

Best Regards,

Birke Gore

Dean

Hope all is well. Regarding Broker reports supplied by Law, are there any Broker/Supplier charges for that service? If so could you advise costs or some information concerning the present process?

Thank You

John

Craig W. Bulkley
Director, Division of Administration

May 14, 2013

Dear Mr Bulkley:

Enclosed please find our submission to Request for Proposal 2013 – 14 Transportation Services for Spirit & Wine and Related Product, Equipment & Supplies.

There are strong synergies to having the same provider for both the warehouse and transportation services. These manifest into better service and lower costs for the NHSLC.

The team that will manage this operation is very experienced in transportation. Across their careers they have been exposed to many different situations and challenges. They will use their collective experience to ensure the transportation operations perform consistently well.

We have extensive transportation expertise. Across North America Exel operates approximately 50 dedicated fleets with close to 800 tractors, utilizing just under 2,000 trailers, employing over 1,400 drivers.

There are two main IT transportation systems that will be seamlessly integrated into our Warehouse Management System (WMS). The first is the Airclic Electronic Proof of Delivery System, and the second is the XRS Fleet Management Solution. Among many features of these of these two systems is the ability to capture Proof of Deliveries (PODs) electronically and constantly track the location of the vehicles through GPS. This will reduce store labor, improve the accuracy and timeliness of deliveries, and enhance customer service.

Most importantly, we are very excited by the strong fit we see between our two organizations. It is this fit that we believe provides the foundation for us to assist the NHSLC with achieving its objectives today and into the future.

Sincerely,

Scott Lyons
Senior Director, Business Development

Raising Expectations for

NHSLC

RFP Response | May 14, 2013

Exel. Raising Expectations for NHSLC

1) EXECUTIVE SUMMARY

Our goal in this RFP response is fourfold. First, we wish to demonstrate that we have an intimate understanding of your needs. Next, we will highlight how we could be a strategic resource for the NHSLC. Third, and what we are most excited about, is the close fit between our two organizations. To conclude, we will discuss the merits of our solution.

THE NHSLC'S MOTIVATION FOR CHANGE

Improving Net Income

The role of the NHSLC has in generating revenues for the state of New Hampshire is critical. Unlike most other states, New Hampshire does not have an income tax on individual's wages, or a general sales tax. Accordingly, the disbursements from the NHSLC are a critical source of revenues for the State. This is an important responsibility. Many less fortunate citizens in New Hampshire depend on the state and consequently the NHSLC for support. The higher the net income the NHSLC generates the more New Hampshire can do for its citizens.

Minimizing Risk

The NHSLC recognizes that a disruption in the supply chain is unacceptable. Products not getting to the stores will have negative impact on sales and net income. It is not only the government that will be hurt. And, if it gets this far, it is also expensive and disruptive for the NHSLC to switch providers during the term of the contract. Thus, the NHSLC is looking to understand how it can both minimize the risk of the transition, and how to minimize the risk of service issues across the term of the contract.

Simplifying your Supply Chain

The NHSLC is working to streamline and simplify its supply chain and realize the associated savings and service improvements. Recently, the Warehouse Services RFP enabled the NHSLC to consolidate its warehouse operations, improve service, and reduce its costs significantly. As we understand it, a major goal of the Transportation Services RFP is to find further savings through simplification and synergies in transportation and especially through the close coordination of the warehouse and transportation operations.

Quality of Service

The quality of service provided by the NHSLC is pivotal to its success. A better shopping experience leads to higher profits. The Commission is continually looking for new and novel ways to entice customers to shop in NHSLC stores. For example, the New Hampshire State Liquor Commission

is aggressively remodeling its stores and building new ones. The Commission will be looking to see how the transportation provider intents to enhance service quality.

EXEL AS A STRATEGIC RESOURCE

We believe we have a number of unique capabilities that will assist the NHSLC with taking its supply chain to the next level. Below we highlight what we feel are our core strengths and our relevant experience. We would suggest that our ability to be a strategic resource lies in three areas. First is our ability to reliably deliver the services. Second, it is our experience that systems capability is often the secret to unlocking superior performance, and we have the largest and most capable IT team in the industry. Third, the methods we employ to continuously bring forward best practices to minimize costs and enhance service over the entire length of our relationship.

Our Customers are Industry Leaders

Exel is providing innovative warehouse and distribution services to market leaders like Walmart, Dow, Kraft, Bayer Healthcare, GE… among others. Of the top Fortune 500 companies globally over half are customers of ours. These relationships exist in North America and globally as well. Our relationships are long-term. For example our relationship with a leading global consumer products goods company is 25 plus years and we manage over half of their supply chain globally. Our rate of renewals is higher than 93%. We humbly suggest that we have the opportunity to work with these industry leaders because we are the leader in our industry. We believe these customers remain loyal because we deliver the best service / cost equation and continuously improve our operations.

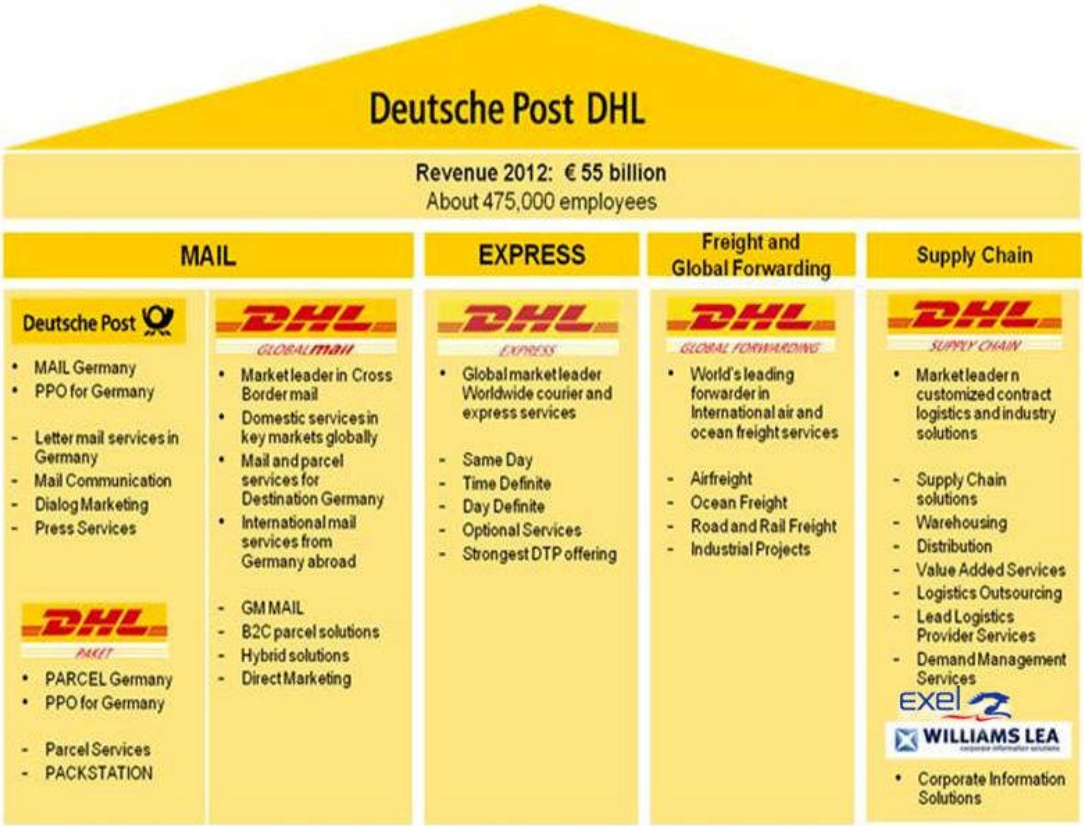
Industry Specific Experience and Knowledge

Exel has extensive experience in the beverage alcohol industry. Our experience includes working with both retailers and producers. We have experience operating with bailment inventory for the Alberta Gaming and Liquor Commission. We provide all the services required by the industry, and finally we operate in North America, and in other countries around the world. Delivery of products is a key component of the services we provide with all of the companies listed above. Exel will bring the best of all of our experience within the beverage alcohol industry to assist the NHSLC with achieving the right balance between service and cost.

Stability and Presence

Deutsche Post DHL is publicly traded as DPW on the DAX, the German stock index. About one quarter of our shares are owned by North Americans. In 2012, our revenues were €m 55,512; our profit from operating activities (EBIT) was €m 2,665. As of December 31, 2012, our net liquidity was €m 1,952, and our return on equity before taxes in 2012 was 19.2%.

➲ Overview of Deutsch Post DHL



Deutsche Post DHL is comprised of two main businesses: The German Post Office and DHL. DHL itself is comprised of four divisions.

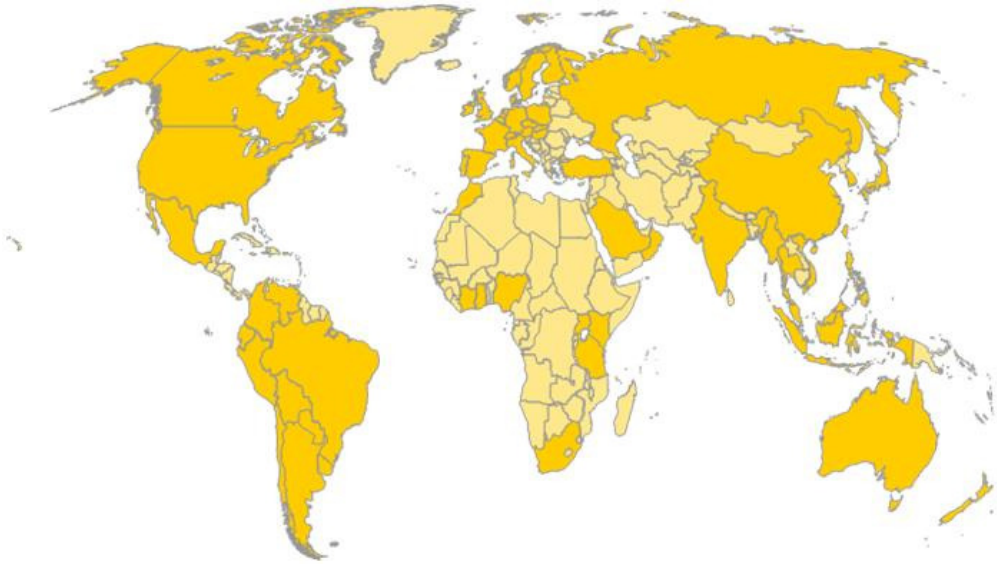
- DHL Express is the global market leader in the international express business
- DHL Global Forwarding ranks amongst the world's leading providers of air and ocean freight, as well as overland freight transport in Europe
- DHL Supply Chain (DSC) designs and implements customized supply chain

As a point of clarification, we wish to explain the relationship between DHL Supply Chain and Exel. Internationally, our supply chain division is known as DHL Supply Chain. Although we are the same organization, within North America our brand name is Exel.

➲ Exel

Exel is the Global market leader in supply chain services with an 8.3% market share – four times our closest competitor. We have a network of 155,000 experts. We operate in more than 60 countries and territories as shown in the graphic below, and provide our services through 2,400 logistic centers, warehouses, and terminals that equates to over 23 million

square meters of warehouse space. In 2012, DHL Supply Chain's revenues were €m 14,340.



Within the US we employ over 21,000 associates. We operate 329 facilities, and utilize 85 million square feet of warehouse space. We have the scale and scope to support the NHSLC now and into the future.

Living Responsibly

At DHL Supply Chain/Exel, we believe that economic and social imperatives are not mutually exclusive. To the contrary – the future belongs to companies who embrace corporate responsibility as an integral part of their business model. We've done exactly that with our Living Responsibility program. With its three focus areas of environmental protection (GoGreen), disaster management (GoHelp) and championing education (GoTeach), Living Responsibility ensures we meet our goals within the context of a broader mandate.

➲ Go Green: Environmental protection knows no boundaries

We were the first global logistics company to set a quantifiable climate protection target. We plan to reach our goal of improving our carbon efficiency – and that of our subcontractors – by 30 % by the year 2020 through more efficient transports, optimized planning and the use of alternative energy sources, innovative technologies and ideas. Carbon-neutral shipping for our customers is just one example.

➲ Go Help: Expediting relief efforts through logistics

Our partnership with the United Nations focuses on helping people in need. This includes the work of our Disaster Response Teams at disaster-site airports as well as our disaster preparedness training program that helps airports ready themselves for emergency situations. Our efforts also

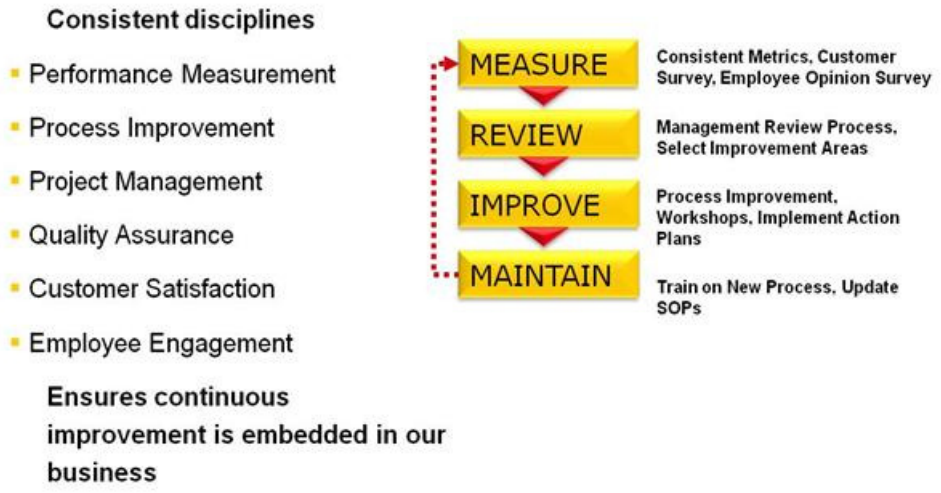
extend to post-disaster recovery with our We Help Each Other fund. Our teams, all made up of volunteers, can be on the ground at disaster-site airports within 72 hours. The support we provide the UN through our GoHelp program is free of charge.

➲ Go Teach: A valuable investment in the future

Together with our partner Teach For All, we work towards equal opportunity in educational systems. In addition to this, our partnership with the SOS Children's Villages helps improve career chances for young people. We know that every investment in education helps secure the economic success of both organizations and the larger community.

Creating Certainty

The reliability of our services is one of the most important benefits the NHSLC will receive from working with Exel. We pride ourselves on our ability to consistently perform over time, and if service failures do occur to recover expediently. We feel that there are 6 key consistent disciplines that ensure our performance is consistent.



The overriding concept across these disciplines is that we constantly measure our performance, review our results for opportunities to improve, develop and implement action plans, and follow-up to ensure the improvement sticks. This ensures that continuous improvement is embedded in our business. The resulting ability to deliver consistently reliable service and consistently improve our performance is at the heart of why we can achieve better than a 93% renewal rate.

➲ Performance Measurement

We have a Global Metrics Scorecard in place to alert the business to potential issues. It also identifies sites that are not achieving best-in-class performance levels. As the name indicates, on a global basis, we track and report key performance indicators for all sites. Our management

team reviews these results on a weekly conference call. At month end we also evaluate the results and establish corrective actions if necessary.

Process Improvement

We have a disciplined, quantifiable and repeatable process to drive and achieve continuous improvement. At the heart of our process is a dedicated team of advisors focused on conducting Continuous Improvement Process (CIP) workshops. These workshops employ a variety of quality, measurement, and process improvement techniques to minimize defects and waste in targeted processes. Exel applies workshops to individual operations, customer accounts, and the overall business. Some of the sources for CIP workshop topics include:

- Performance against our Global Metrics Scorecard
- Results on the KPIs
- Feedback from the stores and licensees

We believe our process is unique. It is consistent with both Six Sigma and lean methodologies and it incorporates tools from both schools—emphasizing employee involvement and management engagement throughout the whole process.

As an example of quantifiable benefits realized by Exel for customers implementing this process, the Process Improvement team conducted almost 400 CIP workshops in 2012 – resulting in annual savings of over $m 60 for our customers. It is interesting to note that almost 40% of these workshops had customers in attendance, and almost 4,000 Exel team members participated.

Project Management

Implementation of projects is a very important aspect of our business. For example, Exel in North America averages starting up a new operation each week. We developed our DePICT project management approach to ensure successful implementation of all types of projects. DePICT is proprietary to Deutsch Post DHL and is based on the Project Management Body of Knowledge principles. The DePICT acronym represents the five phases of a project: define, plan, implement, control and transition. We have over 20 certified project managers housed in our Americas Service Center. We have trained over 2,500 of our associates on our DePICT process.

Quality Assurance

The mission of our QMS is to ensure achievement of expectations and business objectives, and compliance with any regulatory requirements. The process is tailored to our customers' needs because our QMS is founded on the principles of Six Sigma, ISO 9001:2000, and TQM with an

emphasis on customer focus, associate involvement, process, and continuous improvement. As far as we are aware, no major competitor has a QMS that is as comprehensive as ours. Numerous regulatory agencies at federal and state levels have audited and tested our QMS. These include, but are not limited to the Food and Drug Administration (FDA), Drug Enforcement Agency (DEA), California and other state Boards of Pharmacy, Alcoholic Beverage Control Boards (Alberta), Alcohol Tobacco and Firearms (ATF), US Customs, etc. We have never been the recipient of any serious findings or actions by any agency. We currently have over 160 current and active certifications to recognized standards including, ISO 9001:2000, ISO 13485, TS 16949, HACCP, CFIA, USDA and AIB. Not all of these agencies or standards are applicable to this operation. We listed them to demonstrate the strength and breadth of our program.

➲ Customer Satisfaction

Globally, across all business units of Deutsch Post DHL we survey our customers annually. The results of these surveys are then shared with our customers and action plans established to improve our performance. It is our experience that these discussions lead to very frank and open dialogue about the quality of our services, and what we need to do to improve. Completion of these action plans is an element of our managers' bonus program.

➲ Employee Engagement

Globally, across all business units of Deutsch Post DHL we conduct annual employee opinion surveys to better understand and address the concerns of our team members. These results are shared with our associates and action plans established to improve the results. Completion of these action plans is carefully tracked, and an improvement in the scores each year is an element of our managers' bonus program.

A Culture Based on Mutual Respect

Ours is a people intensive business. Leading people is a key requirement for our success. It is so important that being an Employer of Choice is one of three bottom lines that define our success. It is our experience that the building and maintaining a respectful culture is the key to being an Employer of Choice. Working in a respectful culture, team members have high aspirations, an external focus, an ownership attitude, and a bias to action. They value collaboration, and strive for the exceptional. It is this respectful culture that truly drives long term results. Establishing and preserving a respectful culture is a core competency at Exel. We have defined standard operating procedures for building and maintaining a respectful culture. To ensure we are being successful, on an annual basis we conduct an Employee Opinion Survey across the entire Deutsch Post

DHL organization. The results of these surveys are shared with the team members and action plans created to improve the results. Completion of these action plans is carefully tracked. As a result, our team members drive the outstanding performance our customers have come to rely on from Exel.

Systems Capability

It is our experience that systems capability is often the secret to unlocking superior performance. At Exel, systems are a core competency. We have the largest and most capable IT team in the industry that includes a staff of over 400 IT professionals focused on supply chain management solutions. Exel exchanges about 110 million EDI transactions per year (via VAN or AS2) with 650 partners, 190 customers at 270 sites. We have a portfolio of supply chain execution and planning software applications that we use, and we have strategic partnerships with a number of software leaders including Manhattan, Red Prairie, IBM, Infor, and Oracle. We do not build software. We focus our efforts on system integration. We use industry standard transaction formats so integration into ERP systems is simplified. We have proven experience integrating with SAP, Oracle, Microsoft Dynamics, JDA and numerous legacy ERP systems. Over the past three years, we completed over 115 implementations. 96% were on time and 93% were under budget. We operate numerous world class technology centers to operate our systems. All employ an aggressive approach to information security, and our global network is redundant with divergent network access points.

Account Management

Exel strives for excellence in our operations every day. We understand, however, that earning and retaining satisfied customers takes more than sound supply chain operational metrics. It's about providing tangible business value through collaboration, innovation and strong relationships year after year.

Account management is where we take the long-term view of our partnership. And it’s the foundation for everything we achieve together – from the big picture to the smallest details. At Exel, comprehensive account management plans are established and customized for each customer, but they all start from a common platform and commitment to high levels of customer satisfaction. During the course of our relationship, we hold regular business reviews to ensure alignment between our solution and your key business strategies.

Exel typically has several consistent roles to serve accounts. These professionals and in some cases teams of professionals provide ongoing support and advocacy. They also help ensure that everyone serving your

account – from the president of a business unit to the frontline team member – knows what's important to you and your customers.

Flexibility

Flexibility is a key need of the NHSLC. We believe flexibility is important as we formulate a solution to meet your unique needs at the start of our relationship. It is also critically important that we are able to change the solution to meet your changing requirements over time. We run approximately 500 sites in the Americas. No two sites are exactly alike. While we have consistent disciplines across all our sites, our processes are tailored to meet each customer's unique circumstances. Likewise, our commercial approach and account management process gives our clients the flexibility and control to make changes to over the operations that we manage on your behalf.

THE STRONG FIT BETWEEN OUR ORGANIZATIONS

Our goal is to develop long term strategic relationships with our customers. In this type of relationship we become a trusted advisor to our clients. We are often called upon to counsel them on how their supply chain can be utilized to accomplish their broader organizational goals. We believe such a relationship is a function of the fit between ourselves and our customer. We are very excited by the strong fit we see between our two organizations. It is this fit that we believe provides the foundation for us to assist the NHSLC with achieving its objectives.

The fit between our organizations is built first and foremost on a common set of values. As an example one of our 7 Core Values is "To deliver excellent quality". One of the ways we are manifesting this value is by continuously challenging and improving our structures and production processes. We see the same commitment to customer services and continuous improvement at the NHSLC. Outstanding service and striving to improve is a strong common thread between our two organizations.

The beverage alcohol industry is unique. Alcohol is a controlled substance, and regulatory and safety goals are a very important aspect of our industry. The NHSLC's sole focus is regulating the sale, distribution and consumption of alcoholic beverages in New Hampshire. Though our organization is diverse we have a strong footprint within the beverage alcohol industry and team focused on this industry. Thus, our two organizations share a common understanding of what is required to successfully operate in this unique industry.

A third pillar of the fit between our organizations is a strong match between your needs and the value we deliver. As we understand it, the NHSLC wishes to modernize and simplify its supply chain and realize the associated savings and service improvements. Our diverse capabilities will support your efforts to both update your supply chain, and find

greater efficiencies – especially now that we will be providing warehouse services. Working with Exel will facilitate the NHSLC to meeting its objectives.

OVERVIEW OF OUR SOLUTION

Using the data from Revised Appendix M and our sophisticated routing software we created a series of routes each day that require an average of 8 tractors, a combination of 8 to 13 trailers with tailgates (depending on the week) and 16 trailers without tail gates for drop deliveries. We expect to operate the majority of the tractors ourselves, and will use a combination of common carriers, and rentals with part-time drivers to manage peak volumes. These routes are well optimized and make use of all the available store operating hour to minimize the assets required. We considered used tractors, but our analysis showed that the maintenance and higher fuel consumption outweighed the lower purchase price. We believe the compensation levels for our drivers strikes the right balance between competitive wage rates and labor stability.

The team that will manage this operation is very experienced in transportation. Across their careers they have been exposed to many different situations and challenges. They will use their collective experience to ensure the transportation operations perform consistently well.

We believe there are strong synergies in having a single provider managing both the warehouse and the transportation. A single provider will respond faster and more effectively when managing time sensitive issues such as expedited orders, or inclement weather. In addition, if there is a service failure such as a late delivery there is no opportunity to suggest someone else is responsible. The single entity is always responsible. Also, there are cost savings for the NHSLC from a single provider because certain tasks are not required, and synergies are available. Examples include validation of case counts, management of trailer seals, common management team, storage of tractors and trailers on the warehouse property.

There are two main IT transportation systems that will be seamlessly integrated into our WMS system. The first is the Airclic Electronic Proof of Delivery System. Primarily, this system allows us to track Proof of Delivery electronically and communicate with our drivers. The second is the XRS (formerly Xata) Fleet Management Solution. The role of this system is to minimize vehicle costs and repairs. The GPS feature allows us to know where our vehicles are at any time which helps with customer service and security.

Raising Expectations for

NHSLC

RFP Response | May 14, 2013

2) GLOSSARY OF TERMS AND ABBREVIATIONS

We attempted to define all terms, acronyms, and abbreviations within the document when they were first used.

Raising Expectations for

RFP Response | May 14, 2013

exel

3) RFP RESPONSE

Part 1 General Instructions to Vendors

Definition of Terms (1.0)

- Reviewed and understood

Purpose (1)

- Reviewed and understood

Schedule of Events (1.2)

- There have been multiple changes to the deadlines as listed in the Clarifications and Amendments

Issuing Office (1.3)

- Reviewed and Understood

Vendor's Conference (1.4 & 1.4.2)

- 1.4 clarified by Mar 14th Clarifications and Amendments
- Reviewed and understood
- Vendor's Conference attended by Exel

Terms of Submission (1.5, 1.5.1 a-e)

- As listed in our RFP response we have taken exceptions to some of the General Conditions and to some of the RFP Terms and Conditions as we feel these strengthen the agreement, and as a result, are in the best interest of the NHSLC. Therefore, we accept this is a firm and binding offer to the extent the exceptions we have noted in this proposal are resolved to both parties mutual satisfaction
- Reviewed and understood 1.5.1 a through 1.5.1 e

Proposal Offer (1.5.2)

- Unfortunately, we are unable to follow the reference to section 1.20 (b). For the avoidance of doubt, Exel accepts Appendix E to the RFP, subject to the issues listed in that section of this Proposal

Amendments to this RFP (1.5.3) – Public Information (1.5.6)

- Reviewed and understood

Liability (1.5.7)

- Exel understands this provision to constitute a waiver of any claim against the State or the NHSLC relating to the competitive bidding process. With this understanding, Exel accepts this provision. If the

NHSLC intended that this provision address something further, Exel reserves the right to address during contract negotiations the provisions of this provision

Inspection of Records (1.5.8)

- Reviewed and understood

Proposal Submission (1.6)

- Reviewed and Understood

Preparation of Submission (1.7 and components)

- 1.7.3 amended twice by Mar 29th Clarifications and Amendments
- Reviewed and Understood

The Americans with Disabilities and USA Patriot Acts (1.8)

- Reviewed and Understood

Contract Performance Bond (1.9)

- Reviewed and Understood
- We have researched obtaining documented evidence that a surety can be furnished. The surety will not provide this evidence without understanding the bond form so they can determine the triggers for the bond and their possible exposure. Given the financial position of our company there will be no issue obtaining a performance bond
- Exel assumed a performance bond of $1,000,000 for purposes of providing the costs in Appendix D
- Exel attached documented evidence that a surety can be furnished to this RFP response
- Exel takes an exception to the penalty of up to $10,000 "…if successful Vendor misses more than three (3) scheduled deliveries within a span of a three-month period…" We believe that it is in the best interest of the NHSLC to establish a more comprehensive list of Key Performance Indicators to evaluate the performance of the services similar to what Exel and the NHSLC established in the warehouse contract. We will work with the NHSLC during the evaluation and negotiation phase of the RFP process to agree to appropriate Key Performance Indicators

Duration of the Contract (1.10.1)

- Reviewed and Understood. Exel will be ready to perform the services as of November 1, 2013

Extension of Contract (1.10.2)

- Reviewed and understood. It is our desire to have a successful long-term relationship with the NHSLC

Rate Changes (1.10.3)

- Amended by Apr 12th Clarifications and Amendments
- As stated in the Apr 12th Clarifications and Amendments last paragraph of page 1 "The NHSLC has made clear that the problem scenario is not what will ultimately be used once the system is up and running and a myriad of details have been worked out." To the extent that the actual delivery schedule varies materially from the proposed delivery schedule provided in the RFP and associated Clarifications and Amendments at any point during the contract, either party should have the right to request a rate review. In addition, if there is a material change in the delivery schedule after April 2015, there should be a corresponding change in prices. Please note that this could result in an increase or decrease in rates. A good example is conversion from case to pallet deliveries. Once a material number of stores have converted there should be a corresponding reduction in rates. As we believe this is in the best interest of the NHSLC, Exel takes an exception to the rates only being reviewed once during the term of the contract – April 2015.

Intentionally Left Blank (1.11)

- Reviewed and understood

Supportive Materials (1.12)

- Reviewed and understood

Property of NHSLC (1.13)

- Reviewed and understood

Disclosure of Proposal (1.14)

- Reviewed and understood.

News Release (1.15)

- Reviewed and understood

Use of Electronic Versions of the RFP (1.16)

- Reviewed and understood

Proposal Format (1.17)

- Reviewed and understood
- Regarding the request for a signed statement from a licensed insurance agent or broker that an insurance company authorized to write insurance in New Hampshire will insure said Vendor – our

certificate of insurance shows that our insurance is valid in all States. If the NHSLC believes it still requires this letter we will obtain it

- Regarding the NHSLC Liquor Carrier License, Exel has begun the process of applying for the license, and have been told it will be 4 to 6 weeks to process our request

Confidentiality / Sensitive Information (1.18)

- Reviewed and understood

Form of Contract (1.19)

- Reviewed and understood
- As listed in our response to Appendix E below, we have taken exceptions to some of the terms and conditions contained in Appendix E. We feel these strengthen the agreement, and as a result, are in the best interest of the NHSLC

Conditional Nature of Agreement (1.20)

- Addressed in Mar 29th Clarifications and Amendments
- Exel is taking an exception to this clause and prefers the wording in Appendix E, Exhibit C, Section 4. It would be our expectation that the State take all the actions listed in Appendix E to obtain funds for our contract. The wording in paragraph 1.20 of the RFP does not state that Exel has the right to stop performing the services if it is not getting paid as does Appendix E. Also, the wording in paragraph 1.20 of the RFP can result in termination at the discretion of the NHSLC. This opens up a loophole that Exel's contract could be terminated, and when funds are available another provider is utilized. Thus, Appendix E is a more balanced approach and more consistent with developing a relationship that is in the best interest of the NHSLC

Subcontractor (1.21)

- Reviewed and understood
- Exel will accept complete responsibility for all services including those services which will be subcontracted by Exel
- We have had discussions and obtained quotes from four potential common carrier partners (see note 1 in Section V – Vendor Confidential Information) regarding providing support for our operations. Typically we utilize this extra capacity to manage peaks either day-to-day peaks such as the first delivery after weekend sales or week-to-week peaks as occur in the summer and the holiday season. In addition, we may choose to offer a consistent level of work to the common carrier across the entire year. This is to ensure a

strong relationship and enhances our ability to draw upon the common carrier when needed.

Proposal Guaranty (1.22)

- Please find attached a certified check for $50,000
- We would like to clarify that failure to enter into a contract because the exceptions we have noted in this proposal are not resolved to both parties mutual satisfaction, will be considered just cause

Venue – Merrimack County (1.23)

- Reviewed and understood

RFP Protest Process (1.24)

- Amended by Mar 29th Clarifications and Amendments
- Reviewed and understood

Contract Transition Period (1.25)

- Amended by Mar 29th Clarifications and Amendments
- Reviewed and understood
- Please note that Exel will make commercially reasonable efforts to comply with any NHSLC request, but we may not be able to continue the services if the NHSLC does not provide sufficient notice of the request, for example leases have expired and cannot be extended

Part 2 General

Main Proposal (1.0)

- In paragraph 3 there is reference to a freight charge being paid by the NHSLC for store transfer invoices moving product back to a warehouse. The charge must be preauthorized by the NHSLC purchasing agent. This rate is not listed in Appendix D Pricing Worksheets. We will include this rate in our Appendix D Pricing Worksheet submission

Transportation between Concord and Bow (2.1)

- Reviewed and understood

Initial Transportation from Nashua to Bow and from Concord to Bow (2.2)

- Reviewed and understood

Delivery Schedule (2.3)

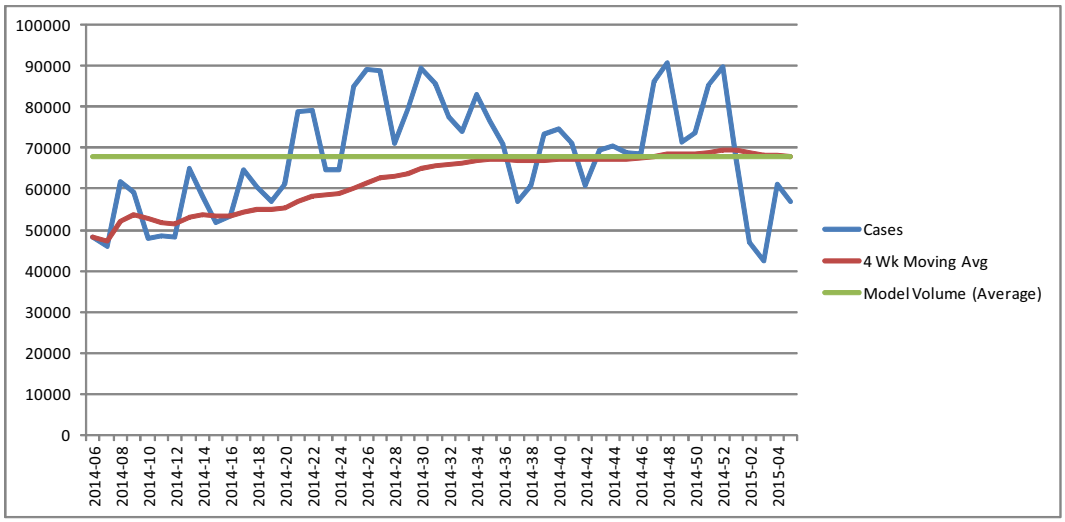
- Exel is using Revised Appendix M as the delivery schedule as instructed in the Apr 12th Clarifications and Amendments and further clarified Apr 15th and 16th
- The attainment of the delivery schedule in the Revised Appendix M requires working closely with the stores to both rationalize the delivery days and equalize the volume of cases across all the delivery days for stores receiving multiple deliveries each week. In our analysis we did notice that there is still an opportunity to rationalize more deliveries. We compared the volume of cases per delivery in the Revised Appendix M against the largest delivery the store had received. Using this as the maximum delivery size it appears that a further 31 deliveries can be removed from the schedule. This will reduce costs by roughly 2% or about $40,000 per year. While reducing these deliveries may or may not be implemented, this is an example of the continuous improvement activities Exel engages in on behalf of our clients

Project Deliverables (2.4)

- Reviewed and understood. Below we describe the analysis we completed to meet to understand the requirements to meet the project deliverables. We included an Excel Spreadsheet with our submission (on CD ROM). It has the full details of our routes, but is too large to print. If there are any questions associated with this file we would make ourselves available to answer them

➲ Volume Profile:

Based on the revised Appendix M provided in the Q&A responses, annual case volume from 2/3/2014 through 1/29/2015 will be 3,536,189 cases. The graph below shows the volumes by week.



We evaluated the four weeks requested to create a proposed route design and delivery schedule.

Week	7	20	42	50
Date	Feb. 10-14	May 12-16	Oct. 13-17	Dec. 8-12
Volume % From Average	-48%	-11%	-12%	8%
Cases	46,070	61,159	60,922	73,802
Pallets	1,013	1,313	1,314	1,582

Design Assumptions:

Exel took the time to visit all 77 stores in NH in order to better understand the delivery process, unloading time by type of delivery, and store delivery restrictions to account for in the route design. Based on our observations and feedback from the store personnel combined with our operational experience, we came up with following design assumptions:

1. The pallet count by store is based on dividing each store's case volume by 50 cases and rounding up to a whole number to still account for the partial pallet.
2. For pallet deliveries, unload time of 15 min. fixed time plus 2 minutes per pallet
3. For case deliveries, unload time of 15 min. fixed time plus 250 cases per hour
4. Store receiving hours match operating hours (unless there's a special requirement for an early delivery) – must arrive no later than 1 hour before close (or earlier if it is a hand unload and delivery stop time is greater than 1 hour)
5. There will be some flexibility in scheduling deliveries with stores before the open time. The majority of stores seemed willing to accept a delivery at least an hour before their open time as long as it's scheduled that way and they are notified in advance.
6. Based on the Q&A responses, the NHSLC acknowledges that the schedule changes throughout the year. For purposes of providing a cost per case, Exel's route design is based on the store delivery frequency, days, and volumes as outlined in the revised Appendix M. In accordance with the revised Appendix M data, store delivery volumes are level across the delivery days each week. If this assumption does not hold, i.e. there are larger day-to-day variances in volume then provided in revised Appendix M, then Exel reserves the right to re-price and/or redesign its solution. From Revised Appendix M the daily volumes are

Delivery Day	Cases	% of Volume
Mon	686,402	19.4%
Tue	760,722	21.5%
Wed	690,004	19.5%
Thu	706,359	20.0%
Fri	692,702	19.6%
Total	3,536,189	100.0%

7. Stores with a maximum pallet delivery size, as outlined in the revised Appendix M were taken into account in the route design. There are either two stops to the same location (one at the beginning and one at the end of the route) or there are two stops split between two routes with at least two hours spaced between the scheduled deliveries. If the store's maximum pallet delivery size was exceeded by only one pallet, we assumed that we could work with the store to accommodate the last pallet in order to avoid a second stop. This occurred in week 50 for stores 8 and 59. For example, store 59 showed 6 pallets for this week and Appendix M indicated a maximum delivery size of 5 pallets. Our store visit to store 59 confirmed that they can accommodate 6 pallets at a maximum.
8. Maximum capacity of 23 pallets per 48' trailer (We can pinwheel the last 2 rows of pallets and we lose one pallet position for the electric pallet jack)
9. Maximum capacity of 24 pallets for drop trailer locations (these stores have pallet jacks so they are not required on these routes). Trailer drop locations will be serviced by trailers without tailgates
10. 50 cases per pallet
11. 35 pounds per case
12. We took the time to visit each store and analyze the delivery location. The incumbent provider may choose to use trailers with side doors for several locations, but we do not believe any store locations require trailers with side doors. It raises costs to service a small number of stores with side doors because the correct trailer type has to be assigned to the correct route each day. In addition, trailers with side doors represent more security risks with another point of entry into the trailer for theft. It is our responsibility to successfully deliver to each store location so if we do have difficulties with standard trailers than we will utilize trailers with side doors where necessary. In order to reduce the cost of delivery for the NHSLC, Exel is

taking an exception to the requirement for trailers with side doors.

13. Stores provide the roller conveyors for the hand unload locations

14. All routes (excluding the 7 drop trailer routes) will require an electric pallet jack inside the trailer for the driver to be able to move pallets around inside the trailer and to maneuver the pallets at some delivery locations.

15. All trailers are 48' in length

    - For purposes of this RFP response we assumed the current maximum trailer size of 48' because given the weight of the products, 53' trailers could not hold more product than a 48' trailer, and therefore would not reduce routes or therefore costs. In addition, 48' trailers can deliver to all stores reducing the complexity of routing and therefore costs

    - In addition, we took the time to visit each store and analyze the delivery location. The incumbent provider may choose to use 45' trailers for several locations, but we do not believe any store locations require 45' trailers. It is our responsibility to successfully deliver to each store location so if we do have difficulties with 48' trailers than we will utilize 45' trailers where necessary. In order to reduce the cost of delivery for the NHSLC, Exel is taking an exception to the requirement for 45' trailers

16. For 48' trailers with rail lift-gates, lift-gate specifications include a 5,500 pound weight capacity and a platform size of 72" x 84".

➲ Route Summary:

The table below summarizes the key statistics for each of the four weeks requested. We also included two other weeks. Week 45 that was closest to the average, and week 48 which was the peak week.

Volume % From Average	-48%	-11%	-12%	8%	1%	25%
Week	7	20	42	50	45	48
Cases	46,070	61,159	60,922	73,802	68,753	90,870

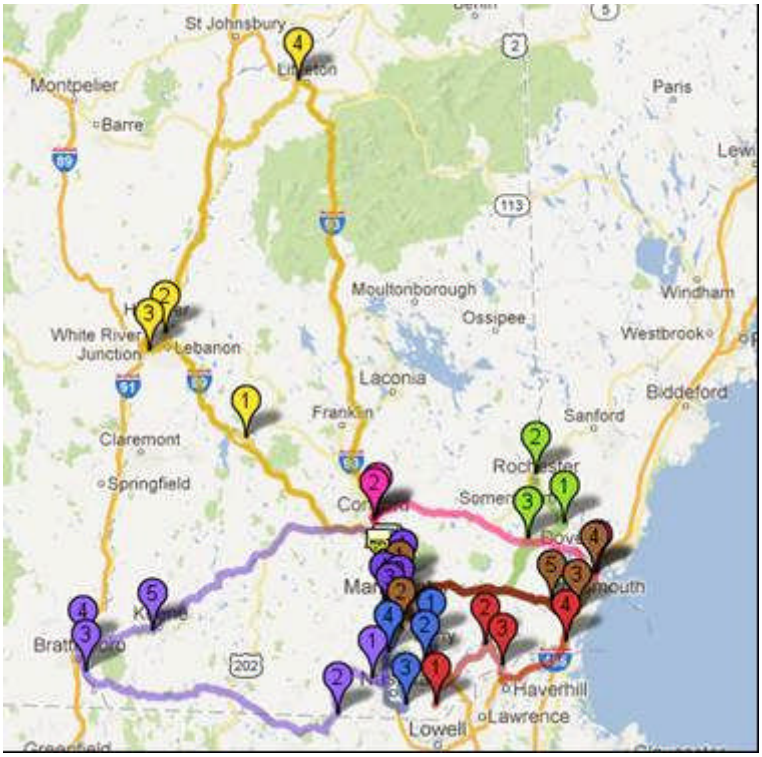
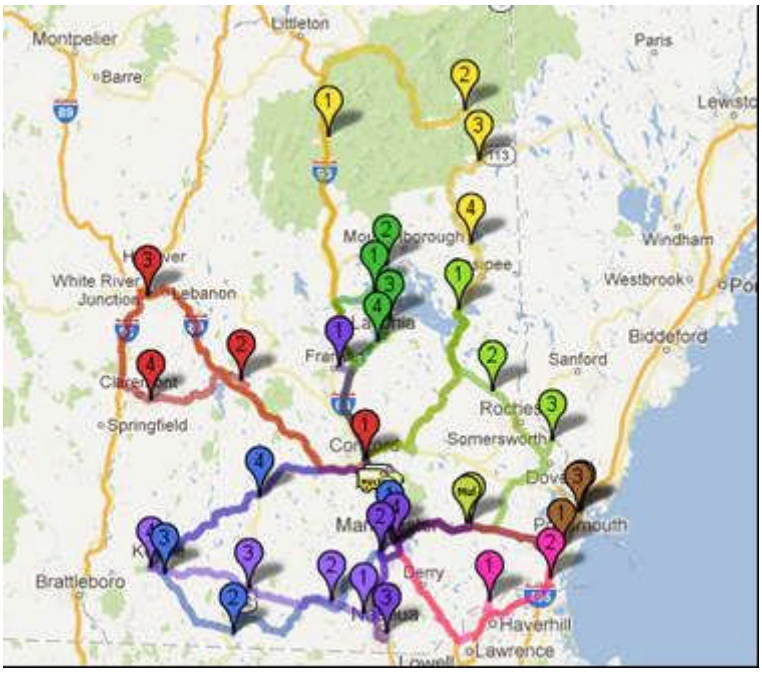
The maps below illustrate the routes by day for week 20 as an example:

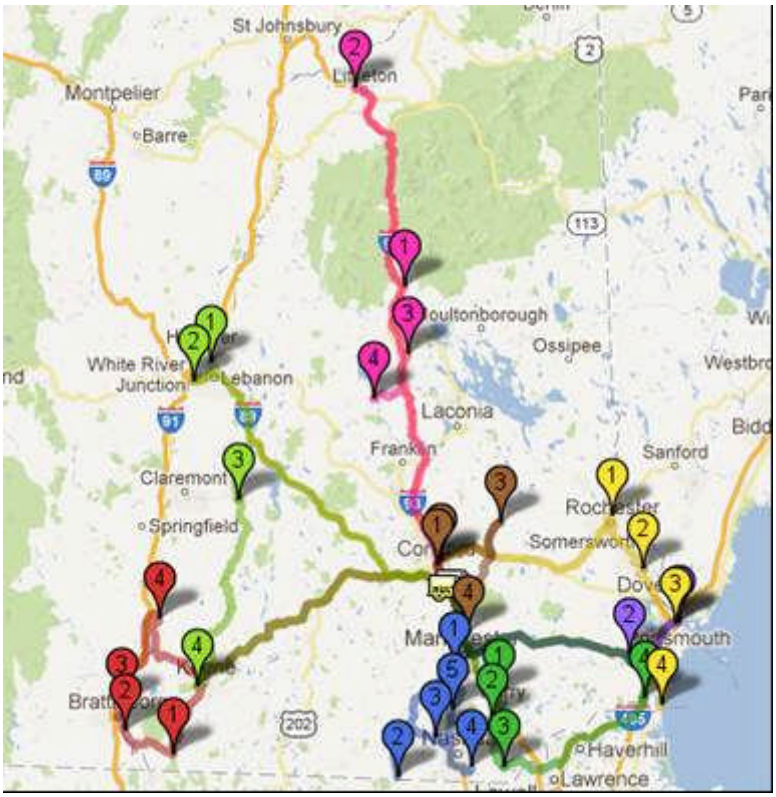
Monday:



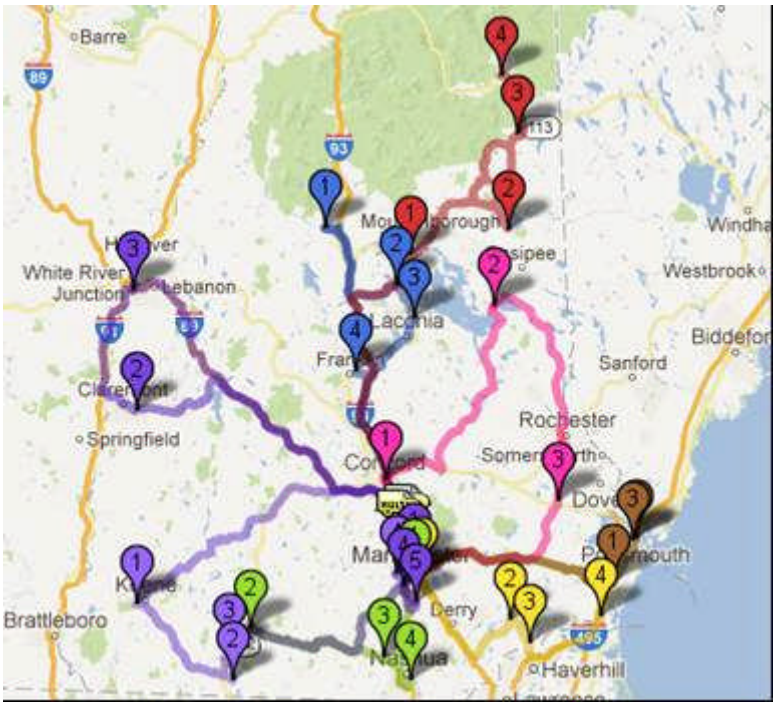
Tuesday:



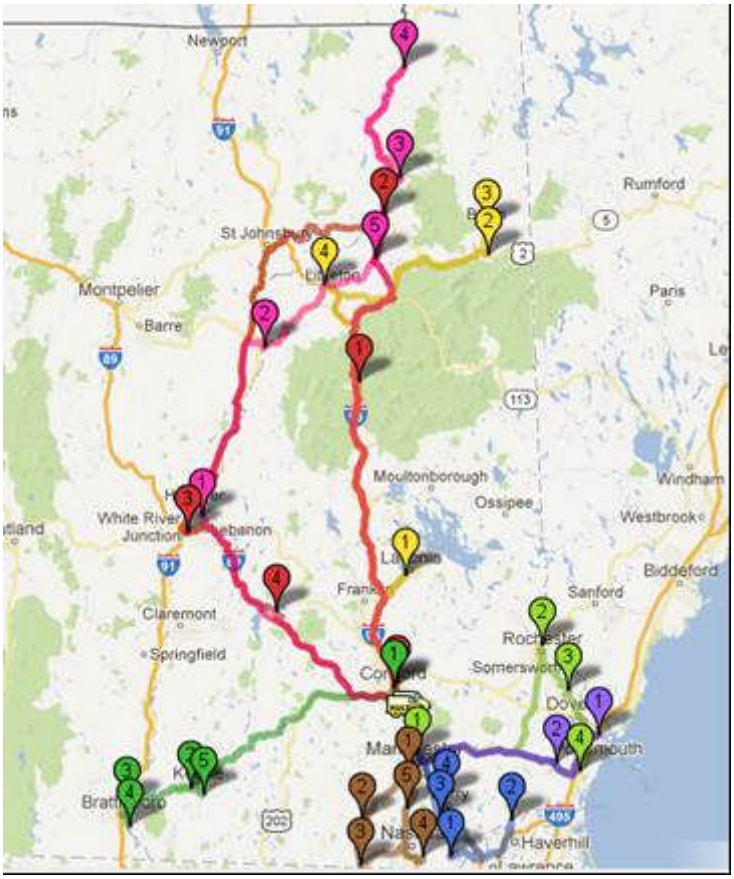
Wednesday:



Thursday:

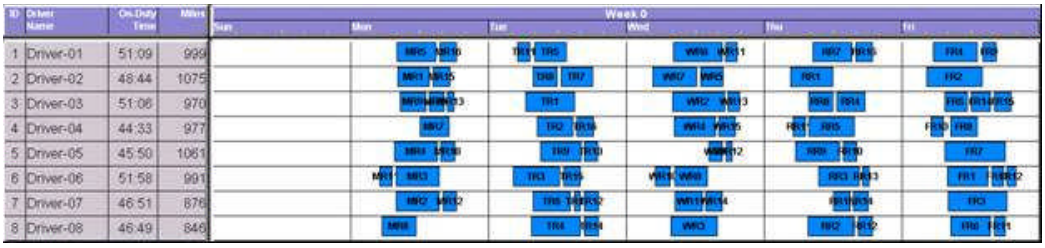


Friday:



➲ Driver and Tractor Schedule:

Once all routes were designed, we determined the earliest and latest time that each route could dispatch taking into account any delivery time requirements specified in the revised Appendix I and store open and close times. Using a transportation resource scheduling tool, we came up with the most efficient schedule for drivers and tractors to minimize cost. The table below is an example driver/tractor schedule for week 20:



ID	Driver Name	On-Duty Time	Miles
1	Driver-01	51:09	999
2	Driver-02	48:44	1075
3	Driver-03	51:06	970
4	Driver-04	44:33	977
5	Driver-05	45:50	1061
6	Driver-06	51:58	991
7	Driver-07	46:51	876
8	Driver-08	46:49	846

Trailer Requirements:

If a route's first stop has a 6am delivery requirement and dispatches early (about 05:00), the trailer has to be in the door by 21:00 the night before. For drop trailer routes, the trailer has to be in the door by 01:00 the morning of dispatch. For all other routes, the trailer has to be in the door at 04:00. There are about 2-3 routes per day with a special requirement and early dispatch. Of the remaining routes, about half dispatch between 07:45 and 09:00 and the other half dispatch from 12:00 to 19:00. All routes that require a lift-gate (so drop trailer routes excluded) are complete by 17:00, making the requirement 1 trailer per route. In the diagram below, routes MR1 through MR9 are lift-gate routes and routes MR10 through MR16 are drop trailer (non lift-gate) routes.

	Load		Start		End		Unload		Route	Monday

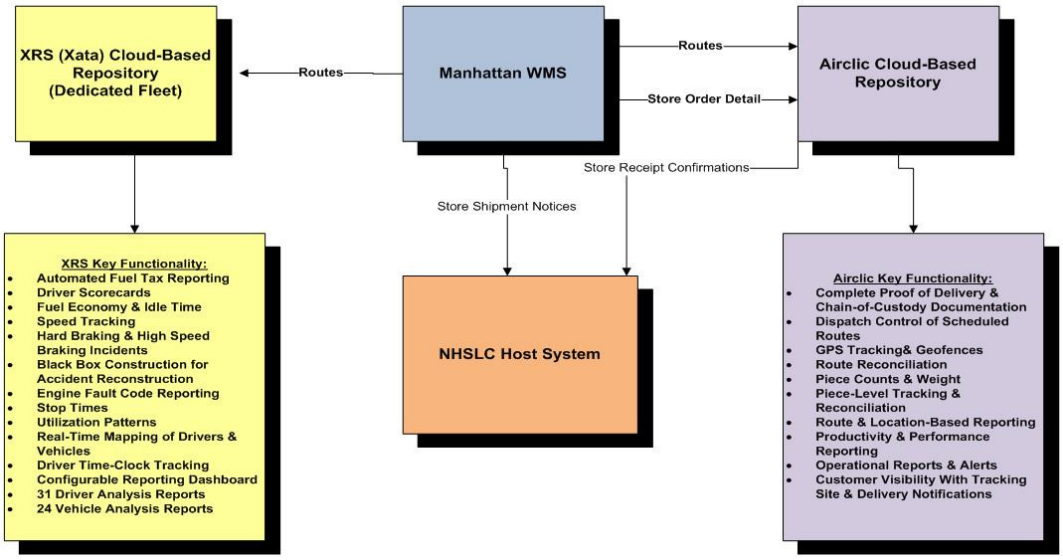
Each of the weeks routed has seven routes that remain static each day for the seven drop trailer stores. As defined in the Q&A response on April 12, the seven drop trailer stores are 34, 50, 66, 67, 69, 73 and 76. The driver will drop the loaded trailer and then hook to the empty trailer from the day before and return to the DC. Each of these stores

has a dock and does not require a lift-gate on the trailer. The store personnel are responsible for unloading the trailer. Fourteen of the sixteen non lift-gate trailers are required for the seven drop trailer routes daily.

We also included a drop trailer at the Concord warehouse for the daily trip between Concord and Bow. The Concord stop is included with the route to store 66 in Hooksett. The driver will deliver a loaded trailer to store 66, pick up the empty trailer, drop the trailer at Concord, pick up the loaded trailer at Concord and return to the Bow DC. A drop trailer has also been included to stage at store 49 for cardboard collection. The route design includes an additional trip every two weeks to pick up the full trailer and drop an empty.

Concept of Systems:

NHSLC Transportation Systems Overview



Once the trailer is closed the WMS will send a message to the Commission indicating what product is on each pallet and destined for delivery to a particular store. Likewise, the WMS will provide this information to the Airclic system. Once the delivery is completed the Airclic system will send a delivery confirmation message to the NHSLC, and the warehouse WMS. In this way we will be able to track inventory at all times and at all stages in the process

There are two main IT transportation systems that will be seamlessly integrated into our WMS system. The first is the Airclic Electronic Proof of Delivery System. Primarily, this system allows us to track

Proof of Delivery electronically and communicate with our drivers. Key features of this system include:

- Tracks deliveries from point of origin until arrival at final destination
- Drivers send real-time documentation for proof of delivery
- Scanning at point of delivery significantly reduces potential of delivery errors. Overages, Shortages & Damages can be reconciled onsite
- Can reduce or eliminate paper
- NHSLC will have access to an easy-to-navigate tracking site to check delivery status
- System can generate timely delivery notifications
- Compatible with most mobile devices, including Android smartphone
- Records GPS location:
    - "Breadcrumb" trail
    - Associated to an event: i.e. Make delivery, record GPS
- Route and stop history reports available online and can be exported to various formats for sharing

The second is the XRS (formerly Xata) Fleet Management Solution. The role of this system is to minimize vehicle costs and repairs. The GPS feature allows us to know where our vehicles are at any time which helps with customer service and security. Key features of this system include:

- Planned vs. actual route reporting
- Safety and compliance logs
    - Reduce HOS violations and near-misses
    - Reduce hard braking
    - Reduce rapid speed changes
    - Reduce skipped inspections
- Optimize fuel economy
    - Reduce idle time
    - Improve MPG
    - Reduce speeding

    - Optimize driving techniques, such as shifting, braking, cruise control
- Reduce maintenance costs
    - Diagnose where & when problems occurring
    - Monitor diagnostics by vehicle
    - Catch critical maintenance issues before they become critical problems.
- Robust reporting
    - 31 different driver analysis reports
    - 24 different vehicle analysis reports

Separate Second Proposal for Co-Mingling Product Loads (2.5)

- Exel will not be submitting a Second Proposal that includes Transportation of Product to NHSLC Licensees. There are three reasons making such a proposal is not in the best interest of the NHSLC

  1. To minimize the NHSLC's costs, we designed the routes servicing the NHSLC's stores to be at or near capacity and therefore there is limited or no capacity to serve licensees. Further, any excess capacity that does exist is available inconsistently which limits the value for licensees
  2. The RFP does not provide data upon which we can develop costs
  3. Even if we had data for licensee orders there is no way to predict how much licensees would utilize our service. They are free to pick up their orders or have any licensed carrier deliver their order on their behalf. Without an understanding of potential volumes we cannot develop costs

Separate Third Proposal for Co-mingling Non-Product Loads (2.6)

- Exel will not be submitting a Third Proposal that includes Transportation of items that are compatible with the transportation of Product. There are two reasons making such a proposal is not in the best interest of the NHSLC
- To minimize the NHSLC's costs, the routes servicing the NHSLC's stores will be at or near capacity and therefore there is limited or no capacity to carry compatible non-Products with deliveries to stores. Again, to minimize the NHSLC's costs, many of the routes include a return to the yard for a second trailer of Products. This maximizes use

of the available drive time of our drivers and minimizes the number of tractors in the fleet. Running to pickup backhauls of compatible non-products is inconsistent with this strategy

- The delivery schedule has not been finalized. Finding opportunities to include shipments of compatible non-Products can only begin once the delivery schedule and corresponding routes are finalized. There may be opportunities for backhauls for some of the routes into Northern New Hampshire, and once the delivery schedule is finalized we will investigate those possibilities and bring them forward to the NHSLC

Part 3 Basic Information Required From the Vendor

Management Summary (3.1)

- In the Executive Summary under the section titled Stability and Presence we describe our organization. For brevity we will not repeat that overview here
- Jim Lowe will be leading this operation. He works with Exel and has over 30 years of transport experience with customers such as Kimberly Clarke
- We will also work closely with the team operating the warehouse and starting-up its operations. This will ensure that all opportunities for synergies with the warehouse operations are maximized. This includes Robert Maclellan with over 25 years experience, Paul Ledger with almost 30 years experience, and Chase Kevand with over 8 years experience
- In the section below (3.2) we provide details about our transportation operations. As required we will draw upon the experts within our approximately 50 dedicated fleets across the US for support. If needed we will fly them into this operation to ensure a successful start-up
- In addition, the team running the transportation operations will be supported by multiple members of the Exel management team. This team consists of managers with greater than 20 years experience in the beverage alcohol industry. Across their careers they have been exposed to many different situations and challenges. They will use their collective experience to ensure the transportation operations have a successful start-up and perform consistently well over the long term. Examples include Nigel Mathew with over 35 years experience, and Greg Foreman with over 20 years experience
- In addition, we have extensive functional resources. They are experts in their respective fields. Their experience will go a long way to avoiding issues or addressing potential concerns before they manifest.

Examples of the functional areas covered include transportation, IT, labor relations, health and safety, engineering, and inventory control

Prior Experience (3.2)

➲ Overall

Across North America Exel operates approximately 50 dedicated fleets with close to 800 tractors, utilizing just under 2,000 trailers, employing over 1,400 drivers.

Exel Direct, one of our operating divisions, provides coast-to-coast, white glove service to homes and businesses on behalf of many of the largest US furniture, appliance, and office equipment retailers. Our services include delivery scheduling, 2 man delivery with a liftgate to home, business or job sites, and connection to a linehaul and delivery network consisting of over 500 trucks. Exel Direct has its own unique vehicle tracking technology. Combining the help desk with this technology enables us to tell customers exactly when their delivery will arrive and make appropriate adjustments on the fly.

Our managed transportation group - operating from multiple Transportation Management Centers - provides services from helping clients find capacity, managing a network of carriers on our client's behalf, to offering a total outsourced transportation solution that includes strategic and execution support.

➲ Automotive Clients

Exel has an extensive footprint supporting many of the major automotive industry participants. Exel is currently operating over 20 fleet solutions for automotive customers utilizing more than 45 sites. Regarding a particular North American automotive client - we transport over 300 million units annually for them. We manage short- and long-haul transportation including the planning, collection and delivery of auto parts to the plant from their suppliers nationwide. The solution includes a Just In Time transport operation supporting the delivery of local supplier parts directly into production and assembly line points within the plant. We have also developed a web-based communication and visibility system to ensure inventory availability and continued operations. In 2012 the team was awarded the "The Clients Group Award 2011" in recognition of its strategic supply chain services and performance.

➲ Industry Specific

Exel operates the warehousing and distribution services for the Alberta Gaming and Liquor Commission (AGLC).

Mr. Alain Maisonneuve has agreed to provide a reference on our behalf. Please see confidential Note 2 in Section V Vendor Confidential Information for his telephone number and e-mail address

DIAGEO

Diageo is a global alcoholic beverages company. It is the world's largest producer of spirits and a major producer of beer and wine. Some of their brands include: Smirnoff, Crown Royal, J&B, Johnnie Walker, Baileys, and Guinness.

Mr. Gian St. Angelo has agreed to provide a reference on our behalf. Please see confidential Note 2 in Section V – Vendor Confidential Information for his telephone number and e-mail address

7-Eleven is part of an international chain of convenience stores. 7-Eleven, primarily operating as a franchise, is the world's largest operator, franchisor and licensor of convenience stores, with more than 48,000 outlets. 7-Eleven branded stores, are located in 16 countries, with its largest markets being Japan (15,000), the United States (8,200), Thailand (6,800), Canada, the Philippines, Hong Kong, Taiwan, Malaysia.

Ms. Christi Clinger has agreed to provide a reference on our behalf. Please see confidential Note 2 in Section V – Vendor Confidential Information for her telephone number and e-mail address

Tradeteam, an affiliate of Exel's, was created in 1995 when the former Bass Brewery opted to sell it distribution service. Today, Tradeteam is a joint venture with Molson Coors that is 50.1% owned by Deutsche Post DHL (parent of Exel). Tradeteam operates a multi-customer supply chain service for brewers, drinks suppliers, and retailers throughout the U.K. Through a nationwide network of 30 operations, 550 vehicles and over 2,300 employees, Tradeteam delivers to more than 30,000 'on trade' outlets each week and carries out more than 150,000 loads every year into the off-trade retail and on-trade wholesale channels. It picks 50 million items per year – including 4 million wines and spirits cases from 1,500 SKUs and Tradeteam's pick accuracy on these items is 99.88%.

Tradeteam's customer portfolio is a balance of brewers and pubco's including Molson Coors, InBev, Diageo, Brains, and Greene King.

Giorgio Gori is part of the Deutsche Post DHL group of companies. They are 100% dedicated to the wines and spirits market, and are experts in the international transportation, and importation of beverage alcohol. They hold a greater than 50% share of the global market for wine and spirits. Giogio Gori has offices and warehouses in all producing countries and specialized teams in all consumer markets.

Work Plan (3.3)

- The work plan below is based on our solution design and our DePict project management methodology. A dedicated project management will be assigned to this start-up
- The timeline below lists the tasks and dates required for a successful launch on November 1st. A key milestone is the driver training. An important aspect to this training is completing having the drivers complete dry runs of their delivery routes

Task Name	Duration	Start	Finish
NHSLC Transport Timeline	**110 days**	**Fri 5/31/13**	**Thu 10/31/13**
Contract Award	1 day	Fri 5/31/13	Fri 5/31/13

Routing defaults per stop / per trip / yard time	35 days	Thu 8/1/13	Wed 9/18/13

Business Continuity (3.4)

➲ Overview

The main business continuity concerns related to transportation relate to not having equipment, drivers or fuel. As discussed below, we will develop a specific plan for the NSHLC as part of our overall Standard Operating Procedures during the start-up phase. We wish to point out that Exel's scale and scope which includes the capabilities below provides us with the unique ability to secure resources if circumstances warrant. This capability will be detailed in our Business Continuity Plan (BCP)

- We have a dedicated operation in Wrentham NH we operate for another customer
- Contacts with common carriers both within the state of New Hampshire and states close to New Hampshire
- Other sectors within Exel, e.g. our managed transportation group, our extensive operations on behalf of our automotive customers, and our Exel Direct operations
- Common carriers utilized by our managed transportation operations
- Other operating divisions, e.g. DHL Express

The business continuity concerns related to IT systems that could cause a material service disruption are related to the warehouse operations and will be covered off under the BCP for the warehouse. The transportation IT systems include an electronic POD and electronic communication with the driver. A formal BCP will be developed as part of the process outlined below, but the transportation IT systems are not mission critical and manual means will suffice until the systems are recovered.

In addition, there are synergies from operating both the warehouse and transportation when it comes to addressing business continuity. A good example is the ability to flex our staffing levels and share resources. It is also easier to coordinate a response and implement joint contingency plans.

➲ Approach

In order to maintain operations during a catastrophic event, Exel has developed a Best Practice approach to developing a Business Continuity Plan (BCP) for each of its businesses.

Exel will develop. While, we cannot supply a completed BCP without consultation, we can describe how we will develop in collaboration with you a detailed BCP.

Exel has a risk management department. One of their roles is to support the development of site-specific disaster recovery plans. In the development of the plan, we will complete an assessment including the following items.

- Risk Identification
- Business Impact Rating (BIR)
- Risk Probability & Expected Scope of Damage
- External Risk Analysis
- Internal Risk Analysis

- Supplier/Service Provider Risk Mitigation
- Site Critical Programs Risk Mitigation
- Operating Location Risk Analysis
- IT/IS Risk Mitigation

Through consultation, Exel will determine which elements are appropriate for NHSLC based on risk-cost analysis. Exel has developed BCP's for Clients which including identifying backup capacity, developing IT redundancy, organizing alternate locations, and formulating substitute transportation options.

The BCP will include an operations communications command plan, systems backup, and communications backup strategies. In addition, an output of the BCP will be specific emergency response steps. It is a living document, and the site will review it on a scheduled basis. The site leadership will have a copy and conduct drills to rehearse the response. Exel will adjust the plan and training program to identify gaps found in the drill.

Other advantages Exel offers to the NHSLC are an IT department of more than 400 employees available to help reinstate the systems and a large footprint across North America and globally if required. Additionally, the services of DHL Express, Exel Transportation Solutions and DHL Global Forwarding will be in the BCP. Finally, we will leverage our position as the largest customer of our equipment suppliers to ensure equipment availability. NHSLC can count on the full resources of Exel, our sister companies, and our suppliers to the aid of this site.

Step 1 – Develop an Overall BCP Strategy

All effective Business Continuity Plans require a thorough understanding of the level of importance that a given operating location has to your business as an organization and its customers. This is accomplished by identifying what exposures are present and how the accumulations of these exposures will determine the planning and preparation required.

Step 2 - Analyze Risk

An operations exposure to risks that could create business interruptions must be analyzed so that the likelihood of occurrence and the impact to the business is understood. The tools in this step will help you identify these exposures and assign a level of risk so the appropriate mitigation and planning actions can be identified.

Step 3 - Supplier/Service Provider Risk Mitigation

Dependence on outside suppliers, contractors, and service providers may be essential in today's business environment, but along with this dependence comes risk. This step provides guidance for identifying those

risks by identifying your critical suppliers, contractors and service providers.

Step 4 - Site Critical Programs Risk Mitigation

Critical Programs such as Loss Prevention, Fire Protection, and other Safety Health and Environmental programs can mitigate many threats reducing the likelihood of business interruptions. The effectiveness of these Critical Programs is evaluated regularly and, if needed, improvements identified. In this step you will verify that the Critical Programs for your site are up to date, periodically audited and that all incomplete critical programs that could influence business interruption risk are identified.

Step 5 – IT/IS Risk Mitigation

Given that may of Exel Logistics' operating locations are heavily dependent on Information Systems and Technology, sites need to verify that IT contingency plans, including Disaster Recovery Plans (DRP) and their operations Manual Work-Around Procedures, are up to date and sufficient to support their operation during a business interruption. In this step, the site management team will work with their Internal or External IT contacts to understand and verify IT contingency plans exist and that they are sufficient.

Step 6 - Document Business Continuity Plan (BCP)

A Business Continuity Plan is a guide for managing an interruption to your operation. It consists of three key components: Crisis Management, Business Resumption and Business Recovery. Each of these key components will contain a set of integrated procedures and the resource information needed to manage, and minimize the impact of a business interruption.

So that it is readily available, members of the site management team will keep a hard copy of the BCP in their home or automobile.

Step 7 - Perform Initial Test of the BCP

No BCP can be considered complete until it has been tested to insure that it delivers the required results. Each sites management team will conduct an annual simulation or tabletop test of their operating locations BCP.

Step 8 - BCP Review and Approval

To insure that the resulting BCP is adequate and meets the planning requirements, each operating locations BCP, test results and revisions must be reviewed and approved by your sectors Business Continuity Program Coordinator and the appropriate Director(s) of Operations.

Step 9 - Ongoing Plan Maintenance and Testing

The final step in the BCP process is to make the Business Continuity Program part of the daily management activities of your operation. At a minimum, all associates and their backups, who have a role to play in the BCP, should receive training in BCP concepts and the specifics of the plan. In order to insure the accuracy of contact and resource information, and that response, resumption and recovery procedures are still relevant, each BCP should be updated quarterly or as changes in the business environment warrant.

General Requirements

➲ The Vendor will cooperate… (1)

Coordination of the warehouse provider and the transportation provider is critical to deliver the best possible service for the NHSLC at lowest attainable cost.

There are many points of coordination between the warehouse and transportation. A short and not exhaustive list includes:

- Routing of deliveries
- Delivery and spotting of trailers
- Condition of the trailers, e.g. clean and road worthy
- Validation of case counts
- Correctly loading trailers (both securing loads and correct order of stops)
- Establishment of seals

- Management of off-loading and re-loading rollers and pallet jacks
- Coordination of routes requiring a re-loading of the trailer
- Taking responsibility for shorts and overages
- Storage of trailers and tractors
- Maintenance of the snow scraper
- Handling of expedited orders
- Management of inclement or severe weather

While we fully expect to be in close coordination with another Vendor if one is selected, it is easier to synchronize the warehouse and transportation when they are operated by a single entity. A single provider will respond faster and more effectively when managing time sensitive issues such as expedited orders, or inclement or severe weather, or an issue such as IT outage. In addition, if there is a service failure such as a late delivery or a shortage there is no opportunity to suggest another provider is responsible. The single entity is always responsible.

There are cost savings for the NHSLC from a single provider operating the warehouse and transportation because certain tasks are not required. Examples include validation of case counts, management of trailer seals, storage of tractors and trailers on the warehouse property.

We would suggest that one of the largest advantages to a single provider comes from the ability to develop and implement continuous improvement activities. Often the overall costs for the NHSLC might be reduced by a suggested improvement, but the warehouse and/or transportation provider cost structure will change. Thus, gaining consensus on improvements becomes harder.

Building on the important role of culture, Exel prides itself on having a culture build on service and continuous improvement. Unless another Vendor has a similar philosophy these positive attributes will be watered down.

➲ Proposals should include… (1.)

Written Narrative

- This process begins on Sunday afternoon and repeats each day of the week until the Friday deliveries are completed. The process will start again on the following Sunday afternoon
- During the afternoon shift empty trailers will be staged at the loading dock in preparation for the next shift that will be picking the store orders. This will be accomplished by our personnel assigned to this task. In addition, our personnel will remove the delivery equipment from the trailer to facilitate loading of the trailer. They will plug in the pallet jacks so they may charge will the trailer is loaded. At this time, our personnel will also be responsible to remove garbage, empty pallets, and ensure the trailer is clean and ready for loading. These trailers will not be attached to tractors while they are being loaded. We will have a yard tractor to facilitate the staging of trailers. The trailer will then be loaded by the warehouse team. Once a trailer is loaded our personnel secure the load and put the delivery equipment

into the trailer. The trailer will either be picked up by a tractor and taken immediately out of the yard to make deliveries or moved to a staging area within the yard by the yard tractor. In any event, staged trailers will be picked up by a tractor to commence deliveries as soon as possible after loading is complete. Either the yard jockey or the driver – whoever move the trailer away from the dock will close the trailer doors and lock them. During the shift picking the store orders this process of staging, loading, and removing trailers at the dock will be repeated as necessary until the deliveries are complete

- Orders will be sent by the NHSLC and received by Exel by 2335 hours. Our transportation team will develop routes to deliver the orders, and communicate the routes to the warehouse team by 0400 if not sooner. The routes will respect any time windows in place to ensure smooth operations or respect local delivery restrictions. Our warehouse team will plan the picking of the orders and provide the transportation team the times the trailers will be available for delivery by 0500 if not sooner. If a trailer needs to make an early delivery the warehouse team will make the trailer available at the appropriate time
- At a hand off store the driver and store personnel will set up the rollers. The driver will then place the cases on to the top of the roller for the store personnel to offload at the bottom. At pallet stores the driver is responsible to move the pallet onto the lift gate or the delivery dock. The store personnel will then take the pallet into the store. Except in the case of a drop trailer, the driver will wait unit the store personnel confirm the number of cases on each pallet for pallet deliveries or a count of the total cases for hand off deliveries. Upon store delivery completion, the driver will pick up any totes, empty pallets, returns or transfers as required. The store personnel will confirm the delivery by signing the electronic POD device. Eventually, the totes, empty pallets, returns and transfers will be captured in the handheld. This will facilitate asset tracking and electronic Return Authorization. Upon the driver placing the handheld device back in its cradle in the truck the delivery confirmation will be uploaded to the warehouse and the NHSLC.
- The driver will then proceed to their next retail store where the process will be repeated. Once all the stops on a route are delivered, the driver will return to the warehouse. At this point, the driver will follow the End of Route Standard Operating Procedure
- 7 trailers will be dropped at specific stores overnight. The remainder of the trailers not staged at the dock and the tractors will be parked in the yard
- Pre and post trip Driver Vehicle Inspection Report (DVIR) will be completed by the driver to and upon return to the warehouse each

day. The Transportation Supervisor will be responsible to review the DVIR's daily, and report any safety and maintenance issues to the appropriate vendors for immediate repairs. Any units that are found to be unsafe and/or dysfunctional, will be red tagged (out of service) until repaired and signed-off by a certified mechanic

- Each route driver will be trained to follow developed Standard Operating Procedures and Best Practices to ensure customer satisfaction. During the training process, we will educate our associates on certain obstacles that they may face upon making a delivery and interacting directly with the customer. Store specific parking lot maps and delivery strategies will be provided to drivers in the form of a route reference guide, i.e. turn by turn instructions, store specific delivery requirements, and any information relevant to customer delivery requirements and service.
- The Transport Supervisor will be responsible for reviewing all of the reports upon return of each driver. They will be verifying delivery accuracy, times, signatures, delivery check-off's, and any notes written down by the driver and/or the Store Associate.
- Preventative maintenance will be conducted during the evenings and weekends so as not to disturb the delivery operations

Irregular Deliveries

- We have had discussions with four potential common carrier partners (see note 1 in Section V – Vendor Confidential Information) regarding providing support for our operations. Typically we utilize this extra capacity to manage peaks either day-to-day peaks such as the first delivery after weekend sales or week-to-week peaks as occur in the summer and the holiday season. In addition, we may choose to offer a consistent level of work to the common carrier across the entire year. This is to ensure a strong relationship and enhances our ability to draw upon the common carrier when needed such as emergencies, holidays, weekends, or other irregularities
- We will also establish relationships with preferred local companies so that we can rent tractors and trailers on short notice. For seasonal peaks we will utilize our preferred local vendors, and we will be able to draw upon our preferred national accounts for assistance as well
- We will also build a pool of reserve or part-time drivers who would be available to substitute for our regular drivers on short notice or compliment our regular team on weekends or holidays, for day-to-day or seasonal peaks, and in case of emergencies or other irregularities

Truck Security on Route

- The trailer doors will be locked to prevent unauthorized entry

- As per our Standard Operating Procedures the driver will follow proper security procedures for stops on the road, and taking breaks, for example they must lock the vehicle and take the keys. Also, during breaks the vehicle cannot be out of their line of site. Our XRS system tracks the tractor and we can monitor that the driver is following the correct routing
- Drop trailers will have kingpin locks
- The XRS onboard system contains a GPS and each vehicle is tracked at all times. The driver is also able to contact their dispatcher using the Airclic and the XRS systems as well

➲ Bids must be… (2.)

- Reviewed and understood

➲ All loads shall… (3.)

- Reviewed and understood that all loads shall be exclusively comprised of NHSLC merchandise, supplies or equipment…
- If the Transportation Contract is awarded to Exel, the use of seals will not be necessary, as the NHSLC will have a single point of contact for both the warehousing and transportation services. Exel will be solely responsible for all shortages, overages, or miss picks regardless of where in the logistics chain the mistake occurs. Elimination of the seal requirement will simplify the operation for both Exel and the store personnel as the NHSLC will not need to maintain a truck seal log. It also eliminates issues that might arise because multiple entities are handling goods. As the use of seals will be unnecessary and superfluous if the Transportation Contract is awarded to Exel, Exel takes an exception to this provision.
- Exel will not be submitting a Second Proposal that includes Transportation of Product to NHSLC Licensees. There are three reasons making such a proposal is not in the best interest of the NHSLC.
    1. To minimize the NHSLC's costs, we designed the routes servicing the NHSLC's stores to be at or near capacity and therefore there is limited or no capacity to serve licensees. Further, any excess capacity that does exist is available inconsistently which limits the value for licensees.
    2. The RFP does not provide data upon which we can develop costs
    3. Even if we had data for licensee orders there is no way to predict how much licensees would utilize our service. They are free to pick up their orders or have any licensed carrier deliver their order on

their behalf. Without an understanding of potential volumes we cannot develop costs

Vendor must assume… (4.)

- Reviewed and understood
- The trailers and tractors will be stores at the warehouse in Bow. We can accommodate 30 trailers and up to 15 tractors. This capacity exceeds the forecast requirements, but if more additional parking is required Exel will work with our trailer provider for additional space. There is no need to store loaded trailers offsite. In fact loaded trailers will only be stored for a minimal time on site before heading out on their route. During weather of extreme temperatures – either hot or cold – the warehouse will more closely coordinate loading of the trailers to the availability of the tractor for delivery. This will ensure products are in the trailer a minimum of time and therefore will not be subject to temperature extremes. We do not envision the need for temperature controlled trailers. It is outside the scope of this RRP, but for certain products that are temperature controlled in the warehouse we will be able to make temperature controlled shipping pallets available to maintain their temperature during transportation. We can discuss this service if we are the successful Vendor

All overages from… (5.)

- Assuming Exel is successful with this Transportation RFP then we will be both the warehouse and transportation provider and Exel is responsible for shortages, overages, or miss picks regardless of where they occur. This includes returning overages to the warehouse at no cost. This simplifies the operation and eliminates issues that might arise because multiple entities are handling goods

All vendors must… (6.)

- Clarified by Mar 29th Clarifications and Amendments
- All the tractors will be new. The lease term will be 7 years from November 1, 2013. The trailers with tail gates will be new. The lease term will be 5 years from November 1, 2013. The trailers without tail gates will be used with an age of between 6 and 10 years. The lease term will be 5 years from November 1, 2013.
- All vehicles conform to all applicable state and federal laws and regulations including passing inspections
- The Xata onboard computers will track the actual vehicle usage. The GPS feature will show the route travelled by the truck. The reports from this system will be utilized to ensure proper preventative maintenance of the tractors

- We took the time to visit each store and analyze the delivery location. The incumbent provider may choose to use trailers with side doors for several locations, but we do not believe any store locations require trailers with side doors. It raises costs to service a small number of stores with side doors because the correct trailer type has to be assigned to the correct route each day. In addition, trailers with side doors represent more security risks with another point of entry into the trailer for theft. It is our responsibility to successfully deliver to each store location so if we do have difficulties with standard trailers than we will utilize trailers with side doors where necessary. In order to reduce the cost of delivery for the NHSLC, Exel is taking an exception to the requirement for trailers with side doors.
- As we are leasing the equipment, we requested a letter of intent to from our supplier indicating the available date of the equipment. They do not provide letters of intent for these purposes. They provided a letter confirming our relationship with them and that the equipment will be available in time for the commencement of this contract
- We took the time to visit each store and analyze the delivery location. The incumbent provider may choose to use trailers with side doors for several locations, but we do not believe any store locations require trailers with side doors. It raises costs to service a small number of stores with side doors because the correct trailer type has to be assigned to the correct route each day. In addition, trailers with side doors represent more security risks with another point of entry into the trailer for theft. It is our responsibility to successfully deliver to each store location so if we do have difficulties with standard trailers than we will utilize trailers with side doors where necessary. In order to reduce the cost of delivery for the NHSLC, Exel is taking an exception to the requirement for trailers with side doors.

➲ All vendors must… (7.)

- The principals in our organization who will be directly involved in operating this site include Jim Gehr, Nigel Mathew, Greg Foreman, Robert Maclellan, Paul Ledger, Jim Lowe, and John Flanagan. Their work experience in the transportation field follows below. In addition, we have many other individuals within our organization that have extensive transportation experience. Though not directly assigned to this operation we will tap their expertise as required.
- Jim Gehr
    - Over 25 years experience in the Logistics & Transportation industry
    - Role - President of Retail, and Managed Transportation

    - Exel. Responsible for directing the business unit's growth strategy, development and operations
- Nigel Mathew
    - Over 35 years experience in the Logistics & Transportation industry
    - Role - SVP of Operations
    - Exel. Responsibility for several businesses in North America including deliveries to 70% of 7 Eleven stores in the United States 365 days a year operations, vehicle design, network and routing design
    - Wincanton (UK). Total responsibility for three distribution centres supplying regional warehouse and transportation services to Tesco (UK's largest supermarket group)
    - Express Food Group (UK) - A subsidiary of Grand Metropolitan - now Diageo. Total responsibility for 1000 vehicle transport fleet including ex farm milk collection, bulk liquid tanking, and finished product delivery to customer distribution centers or direct to store. Role included vehicle specification and procurement
- Greg Foreman
    - Over 20 years experience in beverage alcohol and the Logistics & Transportation industry
    - Role - VP Operations
    - Exel. Complete responsibility in the areas of Senior Leadership, Strategy, Contract Negotiations, Operations (including transportation for the Alberta Gaming and Liquor Commission), Growth and Business Development
    - SAB Miller. Complete responsibility in the areas of Senior Leadership, Strategy Development, Sales, Operations (including transportation), HR and Finance for the business unit
- Robert Maclellan
    - Over 20 years experience in the Logistics & Transportation industry
    - Role - Director of Operations
    - Exel. . Provide strategic direction for increased profits, improved service solutions and growth to senior management teams servicing these Clients. Provide oversight in the areas of P&L, Senior Leadership, Strategy, Contract Negotiations,

Operations (including transportation for the Alberta Gaming and Liquor Commission) Safety and Business Development

- Loomis Courier Service. Responsible for the efficient operation and revenue growth of Loomis Courier Service inside the province of Ontario. Direct reports included all Operations, Ground Line Haul, Hub and Customer Service

- Paul Ledger
  - Almost 30 years experience in the Logistics & Transportation industry
  - Role – General Manager
  - Exel. Operated a Pan European solution for new car delivery. All the major European car manufacturers were in the customer base including Ford, GM, Nissan, Peugeot/Citroen, Renault and Volkswagen. Developed a delivery network for Diageo in East and West Africa including a last mile solution in Kenya. More recently Paul has worked closely with 7-Eleven and become their Subject Matter Expert on Grocery delivery. He also has a wide knowledge of their Fresh Food store delivery program. He is also very heavily involved in Port Distribution in Los Angeles handling the distribution of over 850 containers a month
- Jim Lowe
  - 32 years experience in the Logistics & Transportation Industry
  - Role - Transportation Manager
  - Exel. Held positions as Traffic Controller, Warehouse Foreman, Operations Manager and General Manager. Extensive experience in Transportation Management for Kimberly- Clark and GATX
- John Flanagan
  - Over 35 years experience in the Logistics & Transportation industry
  - Role – Project Manager
    - Given the size of this project and the concurrent warehouse start-up, if chosen to operate transportation, Exel will assign another project manager for the transportation startup. We have a pool of 20 project managers to draw from and one will be appointed once we receive the award. They will work under the direction of John Flanagan who is the Project Manager for the warehouse startup

- Exel. 14 years project management, and 8 years third party logistics

Equipment and personnel… (8.)

- Amended through multiple Clarifications and Amendments. Exel is using Revised Appendix M to determine routes and associated equipment requirements

The State of… (9.)

- Exel is taking an exception to this requirement. In order to gain the highest level of efficiency and the lowest cost possible for the NHSLC all shipments must be provided Exel. Thus, in order to offer the prices listed in our response we must have the exclusive right to deliver to the NHSLC stores. If the NHSLC exercises this capability than Exel reserves the right to re-price and/or redesign its solution

Appendix D Pricing Worksheets

- Clarified and amended by Mar 29th Clarifications and Amendments
- This Appendix is being submitted separately as required
- The assumptions underlying the discounted rate for movement of the remaining cases from Nashua to Bow, and the remaining cases from Concord to Bow are below. If these assumptions are not accurate than Exel reserves the right to re-price this work.
    - 500,000 cases transferred from Nashua to Bow, and 40,000 cases transferred from Concord to Bow
    - 20,000 cases being moved each day
    - 1,000 cases per trailer load
- In per Part 2 General, 1.0 Main Proposal, paragraph 3 there is reference to a freight charge being paid by the NHSLC for store transfer invoices moving product back to a warehouse. The charge must be preauthorized by the NHSLC purchasing agent. This rate is not listed in Appendix D Pricing Worksheets. We will include this rate in our Appendix D Pricing Worksheet submission
- As there are no planned deliveries on weekends or holidays we could not develop a cost for this service. Therefore, we could we not build the cost for weekend or holiday deliveries into our overall prices per case. As a result, we have provided a separate price for weekend or holiday deliveries. The price is based on an estimate of the lower productivity normally associated with delivery on off days. If deliveries on weekends do become scheduled we will be able to develop a better estimate of the costs and associated price to complete this work
- The challenge with determining a price per case for pallet deliveries and a price per case for case unload deliveries is that it requires an allocation of fixed costs. In order to split the costs between pallet deliveries and case unload deliveries we completed the following analysis

- We used the number of cases provided in the revised Appendix M along with revised Appendix I that designates each store as a pallet or case delivery. Based on this analysis, we determined the following percentage split between pallet and case delivery volume.

	Annual Cases	
Pallet Unload	2,579,088	73%
Case Unload	957,101	27%
Total	3,536,189	

- We then calculated the driver stop time, which is directly related to the unloading productivity associated with either a pallet or case delivery. We determined that 42% of the total drivers' stop time is associated with pallet delivery and 58% to case delivery. We allocated the stop time using these percentages. For the remaining total cost of the fleet, we used the percentage split in the table above to allocate the costs between pallet and case deliveries

- There is no "right" way to allocate costs. Therefore, we recommend that the NHSLC compare the Vendor submission based on the total annual cost to complete the work. We included this figure in our Appendix D submission
- All value added opportunities to be explored and revenue sharing discussed

Appendix E General Standards and Requirements

- Reviewed and understood. It is our understanding that the General Standards and Requirements cannot be amended except through Exhibit C. We will make our comments in our response to Exhibit C below

Exhibit C

- Reviewed and understood. Any exceptions to Exhibit C are listed below

➲ State Funding… (4)

- Addressed in Mar 29th Clarifications and Amendments
- Reviewed and understood. Exel prefers the wording in this clause versus the wording in clause 1.20. It would be our expectation that the State take all the actions listed in Appendix E to obtain funds for our contract. The wording in paragraph 1.20 of the RFP does not state that Exel has the right to stop performing the services if it is not getting paid as does Appendix E. Also, the wording in paragraph 1.20

of the RFP can result in termination at the discretion of the NHSLC. This opens up a loophole that Exel's contract could be terminated, and when funds are available another provider is utilized. Thus, Appendix E is a more balanced approach and more consistent with developing a relationship that is in the best interest of the NHSLC

➲ Rates… (5.2)

- Amended in Mar 29th Clarifications and Amendments
- Exel takes an exception to the rates only being reviewed once during the term of the contract – April 2015. As stated in the Apr 12th Clarifications and Amendments last paragraph of page 1 "The NHSLC has made clear that the problem scenario is not what will ultimately be used once the system is up and running and a myriad of details have been worked out." To the extent that the actual delivery schedule varies materially from the proposed delivery schedule provided in the RFP and associated Clarifications and Amendments at any point during the contract, either party should have the right to request a rate review. In addition, if there is a material change in the delivery schedule after April 2015, there should be a corresponding change in prices. Please note that this could result in an increase or decrease in rates. A good example is conversion from case to pallet deliveries. Once a material number of stores have converted there should be a corresponding reduction in rates. We believe this is in the best interest of the NHSLC

➲ The State reserves… (5.3)

- We would like to discuss a claims process that will be followed before the NHSLC can offset any claims from our invoices. In the absence of a standard operating procedure offsets can become unmanageable

➲ All Risk insurance… (14.1.3)

- Exel is taking an exception to the requirement to provide coverage of $2,000,000 per occurrence. The product is covered under Exel's warehouse insurance policy until it leaves the warehouse. At this point, the likely value of a trailer load of product is approximately $280,000. We assumed 23 pallets on a 48' trailer with 50 cases per pallet (1,150 cases), and $20 per bottle acquisition cost with 12 bottles per case. We utilized $500,000 per occurrence coverage in developing our prices. We feel this is in the best interest of the NHSLC because $2,000,000 coverage is not required and is adding cost to the NHSLC with no corresponding benefit.

➲ Performance Bond… (14.1.4)

- Exel would like to discuss the specific events that would trigger the NHSLC to draw on the performance bond and include a statement such as the one below

  In the event the Vendor owes damages due to a material breach or…, the Vendor shall pay the damages or liquidated damages. If the Vendor fails to pay the damages or liquidated damages within a reasonable time, the NHSLC shall recover the damages or liquidated damages hereinafter from the Performance Bond (as here and after defined), provided, however, that the Vendor restores the bond to its original or any increased amount within a reasonable time.

➲ Transition Bond for… (14.1.7)

- The cost of a transition bond is not included in our prices
- Exel would like to discuss the specific events that would trigger the NHSLC to draw on the transition bond and include a statement such as the one below.

  In the event the Vendor owes damages due to a material breach or…, the Vendor shall pay the damages or liquidated damages. If the Vendor fails to pay the damages or liquidated damages within a reasonable time, the NHSLC shall recover the damages or liquidated damages hereinafter from the Performance Bond (as here and after defined), provided, however, that the Vendor restores the bond to its original or any increased amount within a reasonable time.

➲ Contract Transition Period… (26)

- Amended by Mar 29th Clarifications and Amendments
- Please note that Exel will make commercially reasonable efforts to comply with any NHSLC request, but we may not be able to continue the services if the NHSLC does not provide sufficient notice of the request, for example leases have expired and cannot be extended

➲ Items Exel wishes to add

- Force Majeure. Vendor shall not be liable or responsible for delays or failures in performance, or any loss or damage to any liquor and wine Product of the NHSLC resulting from events beyond the reasonable control of the Vendor. Such events shall include, but not be limited to, acts of God, , riots, acts of war, epidemics, acts of government, fire , power failures, nuclear accidents, earthquakes, unusually severe weather, or other disasters, whether or not similar to the foregoing.
- Consequential and Indirect Damages. Notwithstanding any other provision of this agreement to the contrary, neither party, in the

performance of their obligations under this agreement shall be liable to the other for any indirect or consequential damages (such as, but not limited to: loss of profits, loss of business, loss of customer goodwill or exemplary damages or the costs and expenses in providing or securing substitute revenues even if the parties have been advised of the possibility of the same, and without regard to the nature of the claim or the underlying theory or cause of action (whether in contract, tort or otherwise)

- Operating Parameters. We would like to add the operating parameters used by Exel in developing the routes and the budget for its proposal. The purpose of providing the operating parameters is to begin to set the baseline for future rate change discussions

Appendix F Retail Store Locations

- Reviewed and understood

Appendix G - Multiple Tables

- These tables were amended by multiple Clarifications and Amendments
- These tables were superseded by Revised Appendix M and were not used in any calculations of costs

Appendix H – High and Low Delivery Schedules

- Amended by Mar 14th Clarifications and Amendments
- This table was superseded by Revised Appendix M and was not used in any calculations of costs

Appendix I – Retail Store Delivery Requirements

- Reviewed and understood
- We took the time to visit each store and analyze the delivery location. The incumbent provider may choose to use 45' trailers for several locations, but we do not believe any store locations require 45' trailers. It is our responsibility to successfully deliver to each store location so if we do have difficulties with 48' trailers than we will utilize 45' trailers where necessary. In order to reduce the cost of delivery for the NHSLC, Exel is taking an exception to the requirement for 45' trailers.
- We took the time to visit each store and analyze the delivery location. The incumbent provider may choose to use trailers with side doors for several locations, but we do not believe any store locations require trailers with side doors. It raises costs to service a small number of stores with side doors because the correct trailer type has to be assigned to the correct route each day. In addition, trailers with side

doors represent more security risks with another point of entry into the trailer for theft. It is our responsibility to successfully deliver to each store location so if we do have difficulties with standard trailers than we will utilize trailers with side doors where necessary. In order to reduce the cost of delivery for the NHSLC, Exel is taking an exception to the requirement for trailers with side doors.

Appendix J Current Transportation Pricing Structure

- Amended by Mar 27th Clarifications and Amendments
- Reviewed and understood

Appendix K Fuel Surcharges

- Reviewed and understood.
- We did review tractors that utilize compressed natural gas. At this time, the infrastructure in New Hampshire does not make this a viable option. We will continue to monitor the situation. We have found cost savings in other markets, and these tractors are more environmentally friendly

4) Documents

Part 1 General Information for Vendors

Work in Progress (1.7.4)

- Details of anticipated use of subcontractors. Some information provided in this proposal see note 1 in Section V – Vendor Confidential Information. Further details to be provided as we move through the process include name of firms, names of principal operating officers, routes to be subcontracted, a complete listing of equipment to be used by subcontractors in performance as required hereunder, and what percentage of the deliveries will be performed by subcontractors. Also, statement indicating any contracts the subcontractor currently has with the State of New Hampshire and/or any other parties that may present a conflict of interest, and proof of insurance, including liability and workers' compensation from the subcontractors. Exel recognizes the NHSLC's right to approve the use of any subcontractors with 30 days notice

Part 3 Basic Information Required From the Vendor

Specific Requirements

➲ All vendors must… (6.)

- Letters from two suppliers who may lease us the equipment for the operation

- Two Certificates of Insurance

A-3.4

- USDOT Common Carrier License

CONDITIONAL NATURE OF THIS PROPOSAL

This proposal is based upon the information contained in the NHSLC's RFP and on all information contained in correspondence between the parties relative to this project. Should any data or information supplied by the NHSLC be found in error or incomplete, or should any of the assumptions, conditions, or terms of Exel's solution be modified, changed or amended, or found to have material errors, Exel reserves the right to re-price and/or redesign its solution.

This document shall not be construed, in whole or in part, as an agreement between the parties to provide services. Services between the NHSLC and Exel would be performed under a mutually agreed Operating Services Agreement.

This proposal is subject to Deutsche Post World Net (DEUTSCHE POST DHL) Board approval.[1]

1 Exel is the US and Canadian contract logistics organization that is a wholly owned subsidiary of DEUTSCHE POST DHL.

5) Vendor Confidential Information

Grounds for Exemption from Public Disclosure

Pursuant to R.S.A. 21-I:13-a, Exel understands that its Proposal will be kept strictly confidential until after the transportation contract has been awarded. Exel understands that following the award of the contract, the information in Sections I, II, III, and IV of its Proposal will be subject to disclosure under R.S.A. 91-A.

The information set forth in Section V of Exel's Proposal however must remain confidential, even after the transportation contract is awarded, as it constitutes confidential, commercial, or financial information which is exempt from disclosure under R.S.A. 91-A. Disclosure of the information in Section V of Exel's Proposal could cause irreparable harm to the competitive positions of both Exel and its other customers in the logistics industry.

SIGNED THIS 10th DAY OF MAY 2013.

Jun 18, 2013

Mr. Craig W. Bulkley
Director Division of Administration
NH State Liquor Commission
P.O. Box 503
Concord, NH, 03302-0503

VIA Email: cbulkley@liquor.state.nh.us

Reference: RFP 2013-14 – Transportation Services for Spirit & Wine and Related Product, Equipment & Supplies

Dear Mr. Bulkley,

Below please find Exel's answers to the questions posed by the Commission on Jun 14, 2013.

1. If you have not provided a redacted copy of your proposal to the Liquor Commission, please forward one at your earliest convenience. Do we correctly understand that the only confidential information in your proposal is on page 75 and 76?"

   Answer:

   Please find attached to the email containing this letter a redacted copy of our proposal. Yes, the only confidential information in our proposal is on page 75 and 76.

2. As our Warehouse Services contractor, you stated that our transportation vendor could not store tractors or trailers on your warehouse site due to liability issues. In your Transportation Services proposal, you indicate that you will be storing tractors and trailers on your warehouse site. This situation raises a number of issues: a) The construction of the "transportation hub" is being financed by the warehouse contract. No other vendor can do that; b) If another vendor agrees to hold you harmless for any damage to their equipment, will you allow the storage of tractors, trailers, etc. on warehouse property? c) Will you allow such storage if a vendor pays a fee, and if so, what would the fee be? d) If the NHSLC prohibited you from using the warehouse as a transportation hub, please provide the rates you would charge for transportation based on this condition; e) You are prepared to offload pallets from your trailers on a daily basis, however you indicate that you would not perform this service with the same frequency for a different transportation vendor. What if the NHSLC required you to allow a different transportation vendor to offload pallets at the warehouse every day? Would you charge a fee for that, and if so, how much?

   Answer:

   a) We respectfully disagree that the construction of the "transportation hub" is being financed by the warehouse contract. The warehouse contract is a fixed price contract, and Exel is required to meet service standards. Exel owns the building and site. Subject to meeting the service commitments, Exel is entitled to leverage this asset.

570 Polaris Parkway
Westerville, Ohio
43082
Telephone: 905 366-7691
Mobile: 416 417-2537
www.exel.com

b) Exel will permit another vendor to store of tractors and trailers on the warehouse property subject to the conditions below

1. The vendor indemnifies Exel for any and all damages caused by the vendor or the vendor's presence on Exel's warehouse property

2. The vendor agrees that Exel is not responsible for any damages incurred by the vendor

3. Exel shall have sole authority to determine where the vendor's equipment is placed, and Exel may move the vendor's equipment as Exel requires

4. The vendor must pay, and remain current for the use of the warehouse property at the rates listed in c) and e) below

5. Only tractors and trailers being utilized in the servicing of this contract may be stored at the warehouse site, and shall not exceed 10 tractors and 25 trailers at any given time without Exel's prior authorization

6. Other than emergency repairs, the vendor must not complete any repairs or maintenance on the warehouse property

7. If the vendor's drivers are represented by a union, Exel reserves the right to add additional criteria to maintain separation of the respective work forces

c) Subject to the conditions listed in b) Exel will permit another vendor to store tractors and trailers on the warehouse property. From our investigation the market rate for storage of tractors and trailers is $250 per unit per month or $275 per unit per month if employee parking is required. Please note that employees will park in the employee parking area.

d) Exel respectfully believes that this alternative is not in the best interest of the NHSLC, and since Exel will permit another vendor to utilize the warehouse property, Exel declines to provide this rate.

e) Subject to the conditions in b) above Exel is willing to provide the service of offloading pallets as the trailers are returned to the warehouse dock. The rate will be $25 per trailer.

3. Are there any actions pending against Exel by any federal or state regulatory agency?

Answer:

Exel is subject to routine regulatory inspections and audits in the normal course of business. Exel understands that these responses to the NHSLC's questions will be subject to disclosure under R.S.A. 91-A. Thus, Exel cannot comment on the results of ongoing inspections and audits as it constitutes confidential, commercial information which is exempt from disclosure under R.S.A. 91-A. If the NHSLC wishes further information on this topic they are asked to contact Rob Whipple, Associate General Counsel, DHL/Exel Global Business Services.

Mobile: 416 417-2537
www.exel.com

4. Your proposal mentions three focus areas of environmental protection (Go Green), disaster management (GoHelp) and championing education (GoTeach). These are laudatory areas. How will these programs help the NHSLC or the people of NH?

Answer:

Go Green

Exel is continuously looking for ways to improve the fuel mileage and therefore reduce the corresponding CO2 emissions. The examples listed below are only a start. The underlying principle of Go Green is a commitment to continuously implement programs to reduce the impact of Exel's operations on the environment. Specific examples of how Exel's Go Green initiatives will reduce the environmental impact of the NHSLC transportation operations include:

- Exel's proposal includes utilizing new Volvo tractors. Three examples of the features of these tractors include a design that reduces wind resistance, the engine defaults to a lower torque curve to optimize fuel economy, and the most intelligent automated manual transmission on the market. Exel estimates that these tractors utilize almost 30% less fuel per mile that tractors only a few years old. Less fuel equates to less CO2 emissions.

- Exel will utilize trailer skirting—which represents approximately 25% of the aerodynamic drag on a trailer. By reducing the drag underneath a trailer, the EPA has estimated fuel savings of at least 5%.

- Exel will be employing the XRS fleet management solution. This system provides our management team the information they require to work with the drivers to minimize idling, reduce instances of rapid acceleration, hard braking, excessive speed, and to curtail incidents of drivers travelling off their assigned route. All these activities will reduce fuel consumption and the resulting CO2 emissions.

- Co-locating the warehouse and transportation operations eliminates shunting.

- Exel utilizes best-in-class routing software that creates the most efficient routes and minimizes the miles travelled.

- Exel researched the opportunity to utilize tractors powered by Liquefied Natural Gas (LNG). Unfortunately, currently there is only one fueling station in New Hampshire located in Nashua. Travel to and from Nashua to re-fuel negates any potential environmental improvement from LNG. Exel is aware of the recent proposal to construct an LNG fueling station in Pembroke, approximately eight miles from our new warehouse. If this new facility is approved and constructed, Exel will evaluate the feasibility of deploying equipment utilizing this fuel source for some or all of the NHSLC routes.

- Exel is a partner in the U.S. EPA Smartway Program. As such Exel is committed to implementing best practices and fuel-saving technologies whenever possible. Exel explores opportunities to deliver economic and environmental benefits both at a

570 Polaris Parkway
Westerville, Ohio
43082
Telephone: 905 366-7691
Mobile: 416 417-2537
www.exel.com

strategic, e.g., through the utilization of technology such as network and routing design optimization tools, and at an execution level, e.g., natural gas power units, CO2 emissions tracking, on-board tractor equipment and hand-held technology.

Go Help

The underlying principle to Go Help is Exel and the broader DHL network utilizing its expertise in logistics to expedite relief efforts. Examples of where Go Help can help the people of New Hampshire include providing essential supplies during periods of extreme weather or natural disaster. Exel has Business Continuity Plans to cover all eventualities. Exel enacted its Business Continuity Plan during Hurricane Sandy for one of its retail customers. The customer was the first retailer back up and running after the storm, and was able to provide essential emergency supplies, e.g. firewood, water, ice… to its customers. Exel has other similar examples where its customers were the first service up and running after various incidents and were able to provide essential emergency supplies to local residents.

In addition, Exel is available to through its partnership with the United Nations to support relief efforts by volunteering our logistics expertise, our global network and the personal commitment of our individual employees. Though much less likely to be needed in a country like the United States, in the event of a disaster Exel could have its disaster response teams on-site at New Hampshire airports to ensure the successful processing and dispatch of relief supplies into the state.

Go Teach

Exel believes very strongly in improving the educational opportunity for young people and preparing them for the working world. An example of where Go Teach may be of benefit for the people of New Hampshire is having Exel employees act as mentors by supporting and encouraging students in high school. Deutsch Post DHL provides a similar program for grades 8 to 10 at German general secondary schools for around 15 months. Further, Exel would be delighted to provide support to logistics programs at any of New Hampshire's high schools or colleges. This participation may be a tour of our facility, or providing panelists for seminars, or case studies for lectures…

5. On Page 14 of your Transportation Services RFP proposal, you make the following statement: "…resulting in annual savings of over $m 60 for our customers." Is this number $60 million or something else? Please describe a potential process improvement that will result in savings to the NHSLC.

Answer:

The figure is $60 million

A key value Exel brings to customers is the ability to continuously look for ways to improve the performance of our operations. To date Exel has identified three opportunities to improve operations:

570 Polaris Parkway
Westerville, Ohio
43082
Telephone: 905 366-7691
Mobile: 416 417-2537
www.exel.com

- There is an opportunity to further optimize the delivery schedule provided in Appendix M by maximizing the use of each store's backroom
- A number of stores are able to accept pallet deliveries, but cases are still hand offloaded. Going forward there are some stores that could be converted to pallet deliveries with minimal investment
- Through synchronizing the systems in the stores with the transportation and warehouse it is possible to enable the store to receive product into the NHSLC's systems by pallet

If the contract is awarded to Exel, Exel will continue to work to identify and bring forward additional innovations that will improve the NHSLC's operations.

6. Page 28, paragraph 6 of Design Assumptions, states that you reserve the right to re-price or redesign your solution if the estimate provided in the revised Appendix M "does not hold." The NHSLC can not predict the future. We need to compare rates that are locked in for 18 months. Please provide us with rates that are locked in for 18 months.

   Answer:

   Exel confirms that it will provide the delivery schedule listed in Schedule M for the rates Exel provided in its proposal for 18 months.

7. Page 31 of your proposal - The purple route on Monday extends into Massachusetts. Have you determined that federal and Massachusetts laws allow a route to cross state lines? Do Massachusetts laws apply to the load while it is in the Commonwealth

   Answer:

   It is correct that the routing software calculated that the shortest distance includes a short stretch in Massachusetts. Exel has not confirmed that the route may cross a state line. Prior to executing such a route Exel will confirm that it is permissible, and if not the route will be changed so it does not cross a state line. If this modification is required there will be no change in the rates provided in Exel's proposal.

8. Page 35 of your proposal provides for a drop trailer at the Concord warehouse. Assume that this suggestion will not work from November 1, 2013 until the end of the transition for the Concord warehouse due to the shortage of truck bays. Please propose an alternative solution for this time period.

   Answer:

   The April 3, 2013 CLARIFICATIONS AND AMENDMENTS stated that the NHSLC wants vendors to use February 1, 2014 as the start date and January 31, 2015 as the end date in calculating costs. As such, Exel's reference to a drop trailer at the Concord warehouse relates to the time period after the transition for the Concord warehouse. As suggested in this clarification and amendment, the successful vendor and the NHSLC will negotiate the rates for the time period from November 1, 2013 through January 31, 2014. As part of this

570 Polaris Parkway
Westerville, Ohio
43082
Telephone: 905 366-7691
Mobile: 416 417-2537
www.exel.com

process the parties will be agreeing to the delivery schedule, and how the various stores and two warehouses will be serviced.

9. Your Transportation Services proposal, Section 3.3, page 41 assumes the contract award date of May 31, 2013. The RFP identifies an award date as late as July 31, 2013 (Section 1.2, page 4 of 71). Please provide an up-to-date workplan reflecting the correct date

Answer:

Task Name	Duration	Start	Finish
NHSLC Transport Timeline	**68 days**	**Wed 7/31/13**	**Fri 11/1/13**
Contract Award	1 day	Wed 7/31/13	Wed 7/31/13

10. Your Transportation Services proposal in Section 3.4, page 44 states that you have a dedicated operation in Wrentham, NH. Please identify the customer. Do you mean Wrentham, Massachusetts?

Answer:

Exel understands that these responses to the NHSLC's questions will be subject to disclosure under R.S.A. 91-A. Thus, Exel cannot provide the customer name as it constitutes confidential, commercial information which is exempt from disclosure under R.S.A. 91-A. If the NHSLC wishes further information they are asked to contact Scott Lyons, Senior Director, Business Development.

The location is Wrentham Massachusetts.

570 Polaris Parkway
Westerville, Ohio
43082
Telephone: 905 366-7691
Mobile: 416 417-2537
www.exel.com

11. Page 73 of your proposal – Please withdraw the condition that the proposal is subject to Deutsche Post DHL board approval. See terms on proposal offer page (first page of proposal). The proposal must be signed by a person authorized to legally bind the vendor.

    Answer:

    Exel withdraws this condition.

12. Page 73 of your proposal – Please withdraw the requirement that Exel may re-price and/or redesign its solution if Exel has made a material error in its proposal.

    Answer:

    Exel withdraws this requirement.

13. Please describe in detail how you will deliver product to a store from the rear of a trailer where product is currently being delivered through a side door.

    Answer:

    During our due diligence Exel visited every store. At each location the use of a curved roller or the conversion to pallet delivery would enable a back door delivery. The two stores where a pallet delivery is the solution at store 20 and 31.

    Exel will use Store 57 – Ossipee as an example of how a store designated as side door can be delivered from the real of the trailer. As the picture below shows, one can see that the trailer can pull forward and line the rear door with the entry door of the store. Exel will then utilize a “C” roller to off load the cases from the rear door into the store. Alternatively, the delivery can be completed by offloading the cases onto a straight roller from the truck’s tail lift.

570 Polaris Parkway
Westerville, Ohio
43082
Telephone: 905 366-7691
Mobile: 416 417-2537
www.exel.com

As Exel stated in its response, if it is not able to complete a delivery to a store using the rear doors it will acquire a trailer with side doors. There will be no increase in cost to the NHSLC.

14. If there is a shortage of licensed common carriers in NH to deliver our product, will Exel agree to deliver licensee product?

Answer:

Exel will deliver licensee product. It is Exel's expectation that it will be paid fair value for these services.

15. In Appendix L of the Transportation Services RFP, the statutes in Title XIII are cited. Please describe how you will comply with RSA 179:20

Answer:

Exel is fully cognizant of the provisions of R.S.A. 179:20, I. Please be assured that should the transportation contract be awarded to Exel, each of the individuals who Exel employs to deliver liquor for the NHSLC will be a United States citizen or a resident legal alien.

16. You state that you expect to operate the majority of the tractors yourselves and will use a combination of common carriers and rentals with part-time drivers to manage peak volumes. Please explain in detail whether you will own the tractors and how you will provide the trailers. Will you have full-time drivers? Will you be able to perform maintenance and repairs on tractors and trailers inside a facility?

Answer:

Exel will source the tractors and trailers through a lease arrangement with one of its suppliers. Exel will lease enough tractors and trailers to meet planned peak demand with allowances for maintenance. During circumstances of exceptional demand Exel may need to borrow from other operations or rent tractors or trailers for a short period of time. Given Exel's size and purchasing power Exel will be able to get hold of the necessary equipment from its suppliers.

Exel will have full-time drivers. Exel's goal is to operate with its own drivers.

Depending on the exact delivery schedule that evolves, Exel may utilize part-time drivers to handle variances in requirements. If additional tractors are needed for the part time drivers they may be rented or leased. For example, it may be cheaper to lease a tractor for the full week than to rent one for two days a week.

If Exel chooses to have common carriers they will be selected from the pool of subcontractors administered by Exel's managed transportation service. Common carriers will provide a tractor and driver.

All maintenance and repairs will be completed inside a local provider's maintenance and repair facility.

Subject: Nabca

I spoke with Larry Janicki.
Amy and Rumi are both on vacation till next week.

He said the data from both warehouse is mostly and provided me with the differences:

Law Warehouse provides withdrawals out of state and something called a check-sum (which he didn't know what this was)
Concord Warehouse provides product description, size description, and type (bailment or state owned).

We can review the current Concord Warehouse Nabca files to define exactly what information is sent.

Subject: FW: Law - Additional Transportation RFP Questions

From: Brian Law [mailto:brianlaw@lawwarehouses.com]
Sent: Tuesday, June 18, 2013 11:37 AM
To: Craig W. Bulkley
Cc: Brian Law; John Guerette; Jeff Malone; Lehmann, Suzan M. (slehmann@HASLAW.com)
Subject: Law - Additional Transportation RFP Questions

Dear Craig: Here are our answers to the questions you emailed us Fri June 14th. We would be happy to come to Concord to discuss to ensure there is no confusion or misunderstanding and we look forward to working with the NHSLC further to develop the solution that best meets the needs of the NHSLC.

1. In Appendix L of the Transportation Services RFP, the statutes in Title XIII are cited. Please describe how you will comply with RSA 179:20. In your answer to number 10, you offered to forward an email from Suzan Lehmann; please forward the email.

   RSA 179:20 (1): No person, except a citizen of the United States or legal resident alien, shall be employed to sell or deliver any liquor or beverage. Our HR practices follow Federal hiring standards including the completion of Form I-9 and the verification of documents required in the completion of this form. Recordkeeping, reporting, notices and posters follow state and federal guidelines, including Form DES 605, New Hire Reporting. We have worked diligently with our temporary staffing agencies to ensure that these policies are being met my all of our business partners.

   RSA 189:20 (2): No On-Premise or Off-Premise licensee shall consume beverage of liquor while working. No employee, as defined in RSA 275:4, II, shall consume beverage or liquor while working. We have strict internal policies regarding the use of alcohol and illicit substances. We not only meet DOT requirements for mandatory pre-employment and random drug and alcohol testing but implemented the procedure before it became mandatory as part of our safety policy. Furthermore, we have gone beyond the minimum requirements by making random testing a requirement for ALL employees.

   I have been advised not to forward Suzan's email. Here is the information I was referring to in my previous email.

   There are legal requirements under NH law with respect to citizenship and age for carriers.

   a. State law requires that carriers be US citizens, registered resident aliens, partnerships, or limited liability companies, limited liability partnerships, or corporations currently registered with the secretary of state to do business in New Hampshire in order to be licensed as a carrier in NH. See RSA 178:14 (carrier license) and RSA 178:3, II (licensing qualifications). State law also prohibits anyone from being employed to deliver liquor or beverage that is not a US citizen or legal resident alien. See RSA 179:20 (employee restrictions).
   b. State law prohibits licensees from employing a minor to handle liquor or beverages, except off premises licensees can employ minors not less than 15 years old. See RSA 179:23 (employment of minors).

   The rules governing carrier licenses are expired, and therefore not accessible online. There may be additional requirements imposed in those rules, but they must comport with the requirements in state law that are identified above, so this should give you the information you need.

I have attached links to the relevant statutes (cited above) for your ease of reference.

RSA 178:14 http://www.gencourt.state.nh.us/rsa/html/XIII/178/178-14.htm
RSA 178:3 http://www.gencourt.state.nh.us/rsa/html/XIII/178/178-3.htm
RSA 179:20 http://www.gencourt.state.nh.us/rsa/html/XIII/179/179-20.htm
RSA 179:23 http://www.gencourt.state.nh.us/rsa/html/XIII/179/179-23.htm

2. In your response to our questions dated June 13, 2013, in number 5 you state that you are willing and able to identify a suitable technology that will meet the requirements of the RFP. Perhaps our question was not clear. We are asking you to identify that technology now. Please provide us with a complete description of a suitable technology.

   There are many technologies that provide asset tracking and delivery capabilities and the final decision will require additional understanding of the problems to be resolved and the solutions desired. Based on the limited information currently available, TrackAbout, a cloud-based asset tracking and management solution, is one option that may be suitable for the current requirements. TrackAbout provides a paperless delivery system including order notes, delivery exceptions and electronic signatures and has partnered with such well-known technology companies as Intermec, Barcoding Inc., and Zebra. The software is both modular and device agnostic, allowing additional software features beyond electronic proof of delivery as well as the use of smartphones, tablets, or more traditional rugged handheld computers in order to tailor the final solution to best fit the environment and operational needs of the NHSLC, once they are specified. Jeff Malone, IT Manager, has already been involved in successfully incorporated similar technology into our sister company BSP Trans. using smartphones coupled with a module of their Aurora software. This solution provides signature capture and automated and immediate proof of delivery to the client for every delivery. This may be another solution depending on a greater understanding of the problems that the NHSLC seeks to overcome. We are also having continued discussions with Motorola to investigate what solutions we may be able to provide through their business partners. We will continue to work with these, and other technology providers, based on a greater understanding of the goals for this type of equipment in order to develop the best solution for the NHSLC. After further discussion with the NHSLC to refine the problems to be solved, we reaffirm our commitment to secure a paperless delivery/electronic signature solution that meets the needs of the NHSLC and its business partners.

3. In your answer to number 13, you discuss the issue of 18-month rates. Are your proposed rates locked in for the first 18 months?

   Yes, our proposed rates are locked for the first 18 months, and they apply until January 31, 2019 unless, as the NHSLC suggests in its clarifications, prior to that date the business model has sufficiently changed that both sides agree a rate review is warranted.

Subject: Exel Questions

Scott:

The Transportation RFP Evaluation Committee has initiated its review of all proposals submitted for the Transportation Services RFP. The committee has identified the following questions for you to answer. Please provide these answers to me via email **by 4:00 PM, Monday, June 17, 2013**.

1. If you have not provided a **redacted** copy of your proposal to the Liquor Commission, please forward one at your earliest convenience.
2. As our Warehouse Services contractor, you stated that our transportation vendor could not store tractors or trailers on your warehouse site due to liability issues. In your Transportation Services proposal, you indicate that you will be storing tractors and trailers. Will this storage take place on Bow warehouse property or on adjacent property to the warehouse?
3. On page 39 in the RFP Response tab of your proposal, you indicate that Exel has experience with the transportation of alcoholic beverages. Please provide specific examples of your experience.
4. Are there any actions pending against Exel by any federal or state regulatory agency?
5.
