**NIGHTTIME BRIDGE STEEL WORK OVER I-93 IN SALEM**  
***WORK ON CROSS STREET BRIDGE WILL REQUIRE LANE CLOSURES***

The New Hampshire Department of Transportation announces night bridge steel work is scheduled to begin Thursday, February 28, 2008 on the Cross Street Bridge over Interstate 93 in Salem.

This setting of structural steel will take place nightly between 8:00 PM and 6:00 AM and will require various lane closures, both northbound and southbound, for up to three weeks. During the lifting and setting of each steel beam (usually two each night), it will be necessary to completely stop traffic for periods of approximately 15 minutes.

Uniformed officers, traffic signs and changeable message signs will be used to guide traffic through the work zone. Inclement weather will postpone work until the following night.

R.S. Audley, Inc. of Bow, New Hampshire is the contractor for the \$7.3 million bridge replacement project.
