FINAL PAVING WORK ON CANDIA ROAD PROJECT IN MANCHESTER
FROM LAKE SHORE DRIVE TO PROCTOR ROAD

The New Hampshire Department of Transportation announces final paving work is scheduled to take place on Monday, May 12, 2008 on a section of Candia Road in Manchester from Lake Shore Drive to Proctor Road. Weather permitting, this paving work will take place from 7:00 am to 7:00 pm.

Flaggers and uniformed officers will assist with traffic control. Occasional one-way alternating traffic will occur and motorists should anticipate delays of up to ten minutes. Alternate routes are strongly encouraged if possible.

Following Monday's paving, only one more major section of Candia Road paving work remains. This will be done on a still to be determined Saturday. All other remaining work, including striping, drives, and signs, should have only minor traffic impacts and is expected to be completed by late spring.

This project has involved the reconstruction and widening of Candia Road from the I-93/Exit 6 eastern ramp to the Massabesic Circle. It has included intersection improvements at Industrial Park Drive, Hanover Street, Bridge Street, and other minor intersection work at 11 additional intersections. Also included in the project have been drainage improvements, traffic signal upgrades, and sewer and water system work.

R.S. Audley, Inc. of Bow, New Hampshire is the general contractor for the \$8.7 million project. Continental Paving of Londonderry, New Hampshire is the subcontractor performing the paving work.
