

<b>Barriers to moving forward with the Statewide Coordination of Ser</b>								
<b>Comments:</b>	<i>Please prioritize by number with 1 being top priority. Add explanations to reinforce why you feel the item should be prioritized in that</i>	Bev	Pat	Jeanne	Mickey	Avg	Rank Avg	Med
	<b>Regulatory differences between the DHHS programs.</b>	4	7	7	8	6.5	9	7
Bev	An example would be volunteer drivers driving themselves are not required to participate in coordination.							
Pat	driver requirements are different among programs and the goal is to have seamless integration of passengers.							
	<b>be checked the day of the trip to assure payment</b>	9	9	2	2	5.5	5	5.5
Pat	I believe this would require an administrative rule change. It would have to be shown that a change is needed for other reasons than for administrative convenience of the RTC.							
	<b>Cumbersome and expensive billing process to agencies to invoice Medicaid for payment of service provided</b>	10	10	4	1	6.3	8	7
Pat	Should be alleviated once the RTC is in place. Smaller providers will no longer need to access the system for payment.							
	<b>Insurance barriers hinder agency sharing of vehicles from be utilized to their fullest</b>	5	2	8	9	6	7	6.5
Pat	I continue to hear this one whenever I'm describing this initiative to new groups. Latest example - Veteran's Administration							
	<b>Not all providers of human service agencies want funding to flow through the RTC.</b>	6	6	9	10	7.8	10	7.5
Pat	See explanatory							
	<b>No legislative mandate for agencies to participate.</b>	2	4	5	3	3.5	1	3.5
Pat	In the context of not having enough funding go to the RTC's to make them sustainable and to them RCC's to make the viable.							
Bev	provider needs to be in the regional coordinated plan but doesnot need to participate in coordinating of their services with other providers.							
	<b>No mandate for participation of other funding sources within DHHS</b>	3	5	6	7	5.3	4	5.5
Pat	This may be needed to get some entities to participate in changing the way we do business							
Bev	Title III and TANF are examples							
	<b>Not enough providers</b>	1	8	3	6	4.5	3	4.5
	<b>Trust and territorial issues</b>	7	3	10	4	6	6	5.5
Pat	These issues are still playing out both at the SCC level and in some of the regions.							
Jeanne	The issues of trust territory and desires of providers are moot if Depts. Mandate participation.							
	<b>providers of the "big picture" and how they can benefit</b>	8	1	1	5	3.8	2	3
Pat	campaign.
