Health Care Analytics Manager

The New Hampshire Insurance Department (NHID) is seeking a Health Care Analytics Manager with a strong professional background and experience in health care financing, health insurance, and the health care delivery system.

Candidates should possess broad expertise in the collection and management of health insurance claims data, and a good understanding of the New Hampshire health insurance markets and the health care delivery system. This position is primarily focused on making effective use of the New Hampshire Comprehensive Health Information System (NHCHIS) and other available data to better understand health care costs and utilization in New Hampshire.

The candidate should be able to work independently, supervise contractors effectively, design claims based research, and participate with Department staff to formulate policies and produce reports for public consumption. Additional responsibilities include monitoring carrier compliance with insurance laws, making technical decisions related to data submissions, informing policymakers considering the need for legislative changes, and working closely with our partner organizations.

Specific responsibilities include:

- Developing strategies for utilizing data available to the NHID for the purposes of supporting effective and efficient health care policy in the state of New Hampshire.
- Managing vendors regarding the collection of data and integrity of the NHCHIS.
- Managing NHID contractors in the areas of data analysis, special studies, public hearings, and website development (e.g. www.NHHealthCost.org).
- Working with NHID staff, legislators, industry, and partner organizations to utilize health care data and analyses.
- Representing the NHID and advising stakeholders with regard to development, maintenance, and use of all payer claims databases, both on a local and national level.
- Ensuring carrier and TPA compliance with NHID promulgated rules for the NHCHIS data submissions and supplemental report filings.

An ideal candidate would possess a master’s degree in public health, health care administration, business, health policy, or economics, and have a minimum of five years professional experience working for an insurance carrier or a health care delivery system.
