RE: Workers' Compensation Advisory Loss Costs and Rating Values
NCCI Filing Effective January 1, 2015

The State of New Hampshire Insurance Department has approved the National Council on Compensation Insurance's Advisory Loss Cost and Rating Values filing to be effective January 1, 2015.

The approved voluntary loss cost change is a decrease of 5.9% on average. The average approved change for Assigned Risk rates is a decrease of 7.0%. The residual market loss cost multiplier for 2014 will be 1.590. Insurers should continue to refer to a previous Bulletin (Docket No. INS No. 11-018-AB, issued September 22, 2011) for additional information on incorporating the cost of the NH WC Administration Fund Assessment into their rates for voluntary coverage.

In line with our July 1, 1995 directive, all insurers writing Workers' Compensation coverage in the State of New Hampshire are required to adopt and use NCCI's WC Advisory Loss Cost and Rating Values effective January 1, 2015. No filings are necessary unless the insurer wants to change its loss cost multiplier for 2015. Approval of any such filing will be contingent upon the submission of appropriate justification along with a completed Form RFF-1, Prospective Loss Costs Reference Filing Adoption Form.

NH RSA 412:30 requires that any insured receiving a premium quote higher than would be derived from the Assigned Risk Rating Plan should be notified that coverage could be obtained at a lower premium in the Assigned Risk Plan.

Furthermore, any filings received during January 2015 pertaining to this item may be retroactively applied to reflect an effective date of January 1, 2015.

Questions on this bulletin may be addressed to Ruju Dave at (603) 271-2261 or ruju.dave@ins.nh.gov.
