NOTICE TO ALL LICENSED ADJUSTERS REGARDING CONTINUING EDUCATION REQUIREMENTS

Continuing Education requirements First Renewal of License:

Continuing Education requirements for first renewal may be met by the licensing examination. For NH residents, this is not an issue since examinations are mandatory and automatically uploaded to our database. For non-residents, the department has no way to import selected exam data from other states into our continuing education database. Also, first licenses are by definition less than 24 months long. For these and other reciprocity reasons, **The Department has determined that there is no continuing education requirement for first renewals of Non-Resident Adjuster Licenses.**

Specific requirements for Adjusters with workers' compensation (WC) authority:

A revised interpretation of our statutes and regulations has resulted in a change of requirements for this category of Adjuster. Adjusters with WC authority are no longer required to complete a minimum of 10 credit hours of WC courses and a minimum of 10 credit hours of general Adjuster courses. The requirement, effective immediately, is: **20 credit hours in approved Adjuster courses, of which a minimum of 10 hours must be in courses approved for workers' compensation credit.** This change will enable Adjusters with workers' compensation authority to meet their entire biennial requirement with any combination of approved adjuster courses as long as there are at least 10 credit hours in WC courses.

The current Continuing Education requirement for Adjusters without WC authority and all other Adjusters remains unchanged as: A minimum of 20 credit hours in any course approved for Adjuster credit.

Public Adjuster's are not affected by this change.
