

New Hampshire
State Council on the

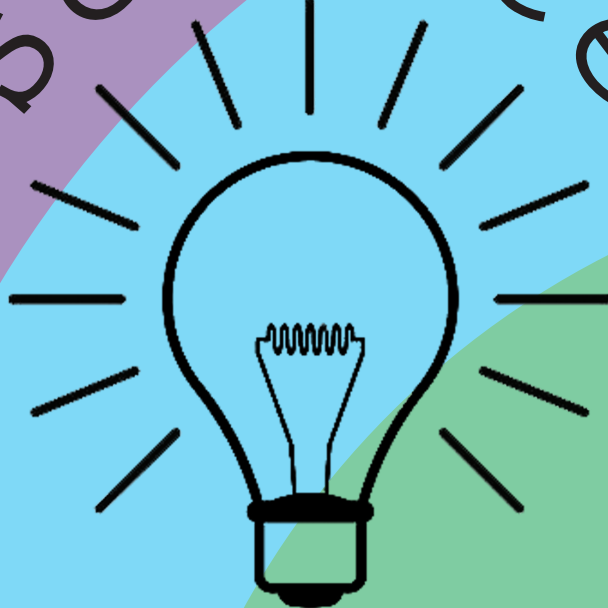

Presents:

The Art

&

Science

of Light
& Color for the Artist

Date: May 6th, 2014 10AM - Noon

Location: PSU, College of Graduate Studies in Concord, NH

This hands-on workshop explores the science behind light, color theory, and how theory can translate to important decisions. The workshop information will be valuable for those involved in visual art, theater, commercial printing, and art display.

Presenter: R.P. Hale

R.P. Hale is an interdisciplinary artist working in a variety of media including wood engraving, calligraphy, instrument making, and more. Hale is a Senior Educator in spectroscopy, optics, and archaeo-astronomy at the McAuliffe-Shepard Discovery Center in Concord and teaches astronomy and physics at St. Paul's School, Concord. His work as an archeo-astronomer and solar astronomer gives him a unique perspective on the connections between science and art. He is an engaging presenter and was recently named one of New Hampshire's most fascinating people by Concord TV!

The workshop is free. Space is limited and registration is required.
