

Introducing Film & Media Production to your Curriculum

A Hands on Workshop and Discussion

Presenters: Matt Newton, NH Film & Television Office
Mike Place, Lakes Region Community College

Lakes Region Community College, Laconia, NH

4-6 pm Thursday, November 14, 2013

Light refreshments will be provided by the Lakes Region Community College Hospitality Program.

Open to educators, teaching artists, after school program providers, home school teachers and students, and anyone who wants to learn more about film and media production!

Students are engaging in Film and Media production regularly outside the classroom. How do educators guide students in using this newly accessible medium to capture and tell their stories with cohesive plot development, story board, video capture, editing, and sharing? Learn how short films can creatively present student research, be a format for a local-history interview, be used for school Public Service Announcements, or demonstrate interdisciplinary content knowledge.

Participants will discuss the incorporation of film and media production into existing Visual Arts, Communications, or English Language Arts curriculums as a creative medium for research and idea sharing. Participants will review programs and equipment that can be used for film editing that are accessible for schools with a range of resources. We will discuss how Film and Media connect with New Hampshire Visual Arts Standards, English Language Arts Standards and the Common Core. Media Arts are being considered as their own set of standards in the newly proposed "Next Generation Arts Standards." We will also touch on issues of privacy and copyright.

There is no-cost for this workshop and a professional development certificate will be offered.

For more information or to RSVP contact Julianne Morse, julianne.morse@dcr.nh.gov. Space is limited.
