

# APE CHECKLIST

Has the federal agency official considered:

- Limits of disturbance, including staging areas and access and reflecting the depth of disturbance
- The viewshed, reflecting the height of construction
- The audible and/or vibration range, reflecting temporary and permanent noise and/or vibration
- Downstream and/or downwind areas that may be affected in water and/or air quality
- Fate of obsolete infrastructure, including demolition, neglect, abandonment, or transfer out of federal ownership
- Potential secondary or cumulative effects
