

## **Eight Hour NFPA 54 Continuing Education**

The rules of Saf-C 8003.05(b) require that all existing technicians shall provide proof of completion of an eight hour course on NFPA 54 or pass an approved test. Below is a list of institutions that provide the necessary instruction to comply with these rules.

The State Fire Marshal's Office provides this list as a student reference only. The State Fire Marshal's Office does not recommend one provider over another as all classes are monitored by staff for educational content. Students must have in their possession a current version of NFPA 54 which is required to attend any classes with the providers listed below. All providers have these books available upon request. Course schedules and prices vary and are determined by the provider and NOT the State Fire Marshal's Office. For concerns and or complaints please contact the Chief Mechanical Inspector at (603) 223- 4289 extension 25241.

**GRANITE STATE TRADE SCHOOLS** (603) 792-4787
