

## EMT-I CONVERSION TASK FORCE

### STATUS OF PLANNING – SEPTEMBER 2012

- Mobile Testing Lab - The Division is waiting for the funds to be released to purchase the testing equipment. We will be training staff to implement this. We are taking requests for the mobile test lab now. Contact you Education Specialist. This is for the AEMT exam only.
- We have submitted a purchase request for the Division to obtain vouchers from the National Registry to allow EMT-I's to take the exam one time without having to pay for it. Contact your region's Education Specialist for details.
- The EMT-I Conversion/RTP curriculum is complete and a rollout was done for the EMS I/C's. Courses are being scheduled now.
- The practice exam program that will be offered free of charge will be ready to go at the end of September.
- Pearson/Brady "Transition Series: Topics for the Advanced EMT" is available from <http://www.bradybooks.com/store/product.aspx?isbn=0137082487> at a price of \$46.35 per book. The discount code is Hauss12. There is a further discount for 5 or more books.
- Will be working on resources for additional/remedial training via Internet.
- NH EMT-I's may take the AEMT exam in lieu of attending a Conversion Course. NH Bureau of EMS is setting up a process to allow one attempt at the exam without attending an RTP. If candidate passes the exam we will need to verify their skills on pediatric I/O to complete the process.
