NH DHHS COVID-19 Update – September 23, 2020

Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

On Wednesday, September 23, 2020, DHHS announced 25 new positive test results for COVID-19. There have now been 8,007 cases of COVID-19 diagnosed in New Hampshire. Laboratory reporting from one laboratory was incomplete so additional test results may be received from this laboratory in the coming days. Several cases are still under investigation. Additional information from ongoing investigations will be incorporated into future COVID-19 updates. Of those with complete information, there are two individuals under the age of 18 and the rest are adults with 48% being female and 52% being male. The new cases reside in Rockingham (5), Hillsborough County other than Manchester and Nashua (4), Merrimack (4), Carroll (2), and Strafford (1) counties, and in the cities of Manchester (4) and Nashua (3). The county of residence is being determined for two new cases.

One new hospitalized case was identified for a total of 728 (9%) of 8,007 cases. Seven of the new cases had no identified risk factors. Community-based transmission continues to occur in the State and has been identified in all counties. Of those with complete risk information, most of the cases have either had close contact with a person with a confirmed COVID-19 diagnosis or have recently traveled.
