NH DHHS COVID-19 Update – October 8, 2020

Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

On Thursday, October 8, 2020, DHHS announced 79 new positive test results for COVID-19, for a daily PCR test positivity rate of 0.7%. Today's results include 55 people who tested positive by PCR test and 24 who tested positive by antigen test. There are now 531 current COVID-19 cases diagnosed in New Hampshire.

Several cases are still under investigation. Additional information from ongoing investigations will be incorporated into future COVID-19 updates. Of those with complete information, there are fifteen individuals under the age of 18 and the rest are adults with 57% being female and 43% being male. The new cases reside in Hillsborough County other than Manchester and Nashua (20), Rockingham (19), Merrimack (5), Strafford (3), Grafton (1), and Sullivan (1) counties, and in the cities of Manchester (17) and Nashua (13).

Two new hospitalized cases were identified. There are currently 14 individuals hospitalized with COVID-19. Ten of the new cases had no identified risk factors. Community-based transmission continues to occur in the State and has been identified in all counties. Of those with complete risk information, most of the cases have either had close contact with a person with a confirmed COVID-19 diagnosis or have recently traveled.

DHHS has announced one additional death related to COVID-19. We offer our sympathies to the family and friends.

- 1 female resident of Hillsborough County, 60 years of age and older

In New Hampshire since the start of the pandemic, there have been a total of 8,878 cases of COVID-19 diagnosed with 747 (8%) of those having been hospitalized.
