## **NH DHHS COVID-19 Update – October 27, 2020**

**Concord, NH** – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

On Tuesday, October 27, 2020, DHHS announced 140 new positive test results for COVID-19, for a daily PCR test positivity rate of 0.9%. Today's results include 112 people who tested positive by PCR test and 28 who tested positive by antigen test. There are now 1,067 current COVID-19 cases diagnosed in New Hampshire.

Several cases are still under investigation. Additional information from ongoing investigations will be incorporated into future COVID-19 updates. Of those with complete information, there are fourteen individuals under the age of 18 and the rest are adults with 43% being female and 57% being male. The new cases reside in Rockingham (39), Hillsborough County other than Manchester and Nashua (19), Strafford (15), Merrimack (13), Grafton (10), Belknap (4), Coos (4), Cheshire (3), Carroll (2), and Sullivan (1) counties, and in the cities of Manchester (12) and Nashua (12). The county of residence is being determined for six new cases.

Three new hospitalized cases were reported. There are currently 31 individuals hospitalized with COVID-19. This census may include out of state residents hospitalized in NH and/or individuals readmitted to the hospital, therefore increases in the daily hospital census may not always equal the number of new hospitalizations reported in a given day. Community-based transmission continues to occur in the State and has been identified in all counties. Of those with complete risk information, most of the cases have either had close contact with a person with a confirmed COVID-19 diagnosis or have recently traveled.

In New Hampshire since the start of the pandemic, there have been a total of 10,531 cases of COVID-19 diagnosed with 771 (7%) of those having been hospitalized.
