NH DHHS COVID-19 Update – October 28, 2020

Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

On Wednesday, October 28, 2020, DHHS announced 113 new positive test results for COVID-19, for a daily PCR test positivity rate of 1.1%. Today's results include 59 people who tested positive by PCR test and 54 who tested positive by antigen test. There are now 1,034 current COVID-19 cases diagnosed in New Hampshire.

Several cases are still under investigation. Additional information from ongoing investigations will be incorporated into future COVID-19 updates. Of those with complete information, there are ten individuals under the age of 18 and the rest are adults with 57% being female and 43% being male. The new cases reside in Rockingham (27), Merrimack (19), Hillsborough County other than Manchester and Nashua (14), Strafford (8), Coos (6), Grafton (5), Belknap (4), Carroll (3), and Sullivan (2) counties, and in the cities of Manchester (18) and Nashua (4). The county of residence is being determined for three new cases.

Four new hospitalized cases were reported. There are currently 29 individuals hospitalized with COVID-19. This census may include out of state residents hospitalized in NH and/or individuals readmitted to the hospital, therefore increases in the daily hospital census may not always equal the number of new hospitalizations reported in a given day. None of the new cases had unidentified risk factors. Community-based transmission continues to occur in the State and has been identified in all counties. Of those with complete risk information, most of the cases have had close contact with a person with a confirmed COVID-19 diagnosis.

DHHS has also announced three additional deaths related to COVID-19. We offer our sympathies to the family and friends.

- 2 male residents of Merrimack County, 60 years of age and older
- 1 female resident of Hillsborough County, 60 years of age and older

In New Hampshire since the start of the pandemic, there have been a total of 10,641 cases of COVID-19 diagnosed with 775 (7%) of those having been hospitalized.
