NH DHHS COVID-19 Update – November 4, 2020

Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

On Wednesday, November 4, 2020, DHHS announced 120 new positive test results for COVID-19, for a daily PCR test positivity rate of 1.0%. Today's results include 86 people who tested positive by PCR test and 34 who tested positive by antigen test. There are now 1,454 current COVID-19 cases diagnosed in New Hampshire.

Several cases are still under investigation. Additional information from ongoing investigations will be incorporated into future COVID-19 updates. Of those with complete information, there are twelve individuals under the age of 18 and the rest are adults with 53% being female and 47% being male. The new cases reside in Rockingham (27), Strafford (18), Hillsborough County other than Manchester and Nashua (16), Coos (11), Merrimack (9), Grafton (8), Cheshire (6), Belknap (3), Carroll (3), and Sullivan (1) counties, and in the cities of Manchester (8) and Nashua (7). The county of residence is being determined for three new cases.

Three new hospitalized cases were reported. There are currently 42 individuals hospitalized with COVID-19. This census may include out of state residents hospitalized in NH and/or individuals readmitted to the hospital, therefore increases in the daily hospital census may not always equal the number of new hospitalizations reported in a given day. Community-based transmission continues to occur in the State and has been identified in all counties. Of those with complete risk information, most of the cases have had close contact with a person with a confirmed COVID-19 diagnosis.

DHHS has also announced one additional death related to COVID-19. We offer our sympathies to the family and friends.

- 1 female resident of Merrimack County, 60 years of age and older

In New Hampshire since the start of the pandemic, there have been a total of 11,563 cases of COVID-19 diagnosed with 787 (7%) of those having been hospitalized.
