NH DHHS COVID-19 Update – November 9, 2020

Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

On Monday, November 9, 2020, DHHS announced 215 new positive test results for COVID-19. Please note, due to a laboratory reporting issue, the PCR positivity rate cannot be accurately calculated. Today's results include 157 people who tested positive by PCR test and 58 who tested positive by antigen test. There are now 2,057 current COVID-19 cases diagnosed in New Hampshire.

Several cases are still under investigation. Additional information from ongoing investigations will be incorporated into future COVID-19 updates. Of those with complete information, there are twenty-six individuals under the age of 18 and the rest are adults with 53% being female and 47% being male. The new cases reside in Strafford (41), Rockingham (40), Hillsborough County other than Manchester and Nashua (29), Merrimack (15), Carroll (11), Belknap (8), Grafton (8), Cheshire (5), Coos (5), and Sullivan (3) counties, and in the cities of Nashua (21) and Manchester (16). The county of residence is being determined for thirteen new cases.

No new hospitalized cases were reported. There are currently 56 individuals hospitalized with COVID-19. This census may include out of state residents hospitalized in NH and/or individuals readmitted to the hospital, therefore increases in the daily hospital census may not always equal the number of new hospitalizations reported in a given day. None of the new cases had no identified risk factors. Community-based transmission continues to occur in the State and has been identified in all counties. Investigations are pending and risk factors for new cases are unknown at this time.

In New Hampshire since the start of the pandemic, there have been a total of 12,699 cases of COVID-19 diagnosed with 794 (6%) of those having been hospitalized.
