NH DHHS COVID-19 Update – November 11, 2020

Concord, NH – The New Hampshire Department of Health and Human Services (DHHS) has issued the following update on the new coronavirus, COVID-19.

On Wednesday, November 11, 2020, DHHS announced 233 new positive test results for COVID-19, for a daily PCR test positivity rate of 2.3%. Today's results include 191 people who tested positive by PCR test and 42 who tested positive by antigen test. There are now 2,394 current COVID-19 cases diagnosed in New Hampshire.

Several cases are still under investigation. Additional information from ongoing investigations will be incorporated into future COVID-19 updates. Of those with complete information, there are twenty-eight individuals under the age of 18 and the rest are adults with 51% being female and 49% being male. The new cases reside in Hillsborough County other than Manchester and Nashua (38), Rockingham (37), Merrimack (24), Belknap (17), Coos (14), Strafford (13), Cheshire (9), Grafton (9), Sullivan (5), and Carroll (4) counties, and in the cities of Manchester (20) and Nashua (15). The county of residence is being determined for twenty-eight new cases.

Four new hospitalized cases were reported. There are currently 69 individuals hospitalized with COVID-19. This census may include out of state residents hospitalized in NH and/or individuals readmitted to the hospital, therefore increases in the daily hospital census may not always equal the number of new hospitalizations reported in a given day. None of the new cases had no identified risk factors. Community-based transmission continues to occur in the State and has been identified in all counties. Of those with complete risk information, most of the cases are either associated with an outbreak setting or have had close contact with a person with a confirmed COVID-19 diagnosis.

DHHS has also announced three additional deaths related to COVID-19. We offer our sympathies to the family and friends.

- 1 female resident of Coos County, 60 years of age and older
- 1 female resident of Sullivan County, 60 years of age and older
- 1 male resident of Sullivan County, 60 years of age and older

In New Hampshire since the start of the pandemic, there have been a total of 13,148 cases of COVID-19 diagnosed with 800 (6%) of those having been hospitalized.
