The New Hampshire Department of Transportation announces final paving work is underway on part of a construction project on Kilton Road and South River Road (US Route 3) in Bedford.

This paving work will take place the week of August 7, 2006 from 5:00 am until 5:00 pm daily and will require alternating one-way traffic controlled by flaggers. Motorists should plan for minor delays and take alternate routes if possible.

Audley Construction of Bow, New Hampshire is the general contractor for the $8 million project, which has included the replacement of both the NH Route 101 eastbound and westbound bridges over US Route 3. The project is scheduled to be completed later this summer.
