BRIDGE REPAIRS ON THE CORNISH-WINDSOR COVERED BRIDGE

NH ROUTE 12A OVER THE CONNECTICUT RIVER

The New Hampshire Department of Transportation announces bridge repairs are scheduled to begin on Tuesday, April 10, 2007 on the Cornish-Windsor Cover Bridge on NH Route 12A over the Connecticut River in Cornish.

This plank replacement and new lighting work will require single lane traffic for three days between 7:00 am and 4:30 pm. Warning signs and flaggers will alert motorists and assist them through the work zone.

The Cornish-Windsor Covered Bridge was built in 1866 and rebuilt in 1988. It’s the longest wooden covered bridge in the United States and the longest two-span covered bridge in the world.
