WORK BEGINS ON INTERSTATE 93 CRACK SEALING
I-93 FROM EXIT 2 IN SALEM TO EXIT 24 IN ASHLAND

The New Hampshire Department of Transportation announces crack sealing work is underway this week on Interstate 93 that will extend from Exit 2 in Salem to Exit 24 in Ashland, both northbound and southbound.

This work is part of the 2007 Interstate Pavement Preservation Program and will include a portion of Interstate 393 in Concord.

Work from Exit 2 through Exit 17 will take place at night, while work from Exit 18 through Exit 24 can occur during non-commuting daytime hours. Lane closures and shifts will be used to control traffic during the work hours. Portable Changeable Message Signs will be in place at the approaches to the work zone to advise motorists of the start of work.

Nicom Coatings Corporation of Barre, Vermont is the general contractor for the $1 million project, which is scheduled to be completed in October 2007.
