FINAL PAVING SCHEDULED FOR CHICHESTER PROJECT
INTERSECTION OF US 4, MAIN ST. AND HORSE CORNER ROAD

The New Hampshire Department of Transportation announces final paving work is scheduled for Monday, November 5 through Wednesday, November 7 from 7:00 AM to 5:00 PM at the US Route 4 (US 202, NH 9), Main Street, and Horse Corner Road intersection in Chichester.

On Monday, November 5 and Tuesday, November 6, scheduled paving on US Route 4 will require closing Main Street at the intersection. NH Route 28 traffic seeking access to US Route 4 via Main Street will be diverted to the Epsom Traffic Circle. Local Main Street southbound traffic will be detoured to NH Route 9 via Canterbury Road and Ricker Road.

Two-lanes of traffic will be maintained on US Route 4 during the paving work, however lane shifts and uniformed officers will be used to direct traffic safely through the project. Motorists should expect delays during these paving operations and take alternative routes if possible. In the event of rain, work will be postponed until the following day.

This project involves the widening and paving of US Route 4 to provide one additional “through lane” in each direction at the intersection, along with traffic signal upgrades and drainage improvements. On Route 4, the work extends from approximately 2000 feet west of the intersection to approximately 1,425 feet east of the intersection.

Weaver Brothers Construction Co. of Bow, New Hampshire is the contractor for the $2 million project, which has a final completion date of November 16, 2007.
