The New Hampshire Department of Transportation announces a traffic shift and lane reduction on Interstate 95 southbound at Exit 3A in Portsmouth on Tuesday, November 20, 2007 to allow for phase I of the rehabilitation of the bridge carrying I-95 over the Boston and Maine Railroad. Interstate 95 will be reduced to three 11-foot lanes.

Concrete barrier will be used to separate the work zone from the traveled way. The posted speed limit through this work zone is 45 MPH.

The Interstate 95 northbound traffic shift and lane reduction is scheduled for the week of November 26, 2007.

Phase I will be completed by May of 2008 and Interstate 95 will be restored back to its original traffic pattern. Phase II is scheduled to begin in October 2008.

Evroks Corporation of Winnisquam, New Hampshire is the contractor for the $2 million project, which is scheduled to be completed in 2009.
