

## **NHDOT 10-Year Transportation Improvement Plan Promotion Video Script**

Hi Everyone, my name is Victoria Sheehan, Commissioner of the New Hampshire Department of Transportation. Every two years the Department works with our Executive Council, the Governor and the Legislature to update our 10-Year Plan on transportation.

As part of that process we have public hearings held by the Executive Councilors across the state. Recognizing that everyone is very busy these days we wanted to embark on a new endeavor and that is Virtual Public Involvement. In addition to the in-person public hearings, we've also developed a survey and put some additional information on our website for you to view and participate in.

The website address is NH.Gov [forward slash](#) DOT and you will find a copy of the PowerPoint presentation that we've been using at the Public Hearings as well as the interactive survey for you to participate in. Our goal with the survey is to seek your feedback and make sure that we are making the right strategic investments when it comes to transportation.

It is an interactive and dynamic survey and I encourage you all to take the time to complete it. I promise it will be less than 10 minutes of your time.

So please visit the website. Again, the address is NH.Gov [forward slash](#) DOT. We want to make sure we are making the right transportation choices and your feedback is critical to that process.
