

THE STATE OF NEW HAMPSHIRE  
DEPARTMENT OF TRANSPORTATION

Adopted: September 20, 2010

GEORGE N. CAMPBELL, JR.  
COMMISSIONER

JEFF BRILLHART, P.E.  
ASSISTANT COMMISSIONER

Bureau of Bridge Maintenance  
New Hampshire Department of Transportation

**Environmental Commitment Statement**

The Bureau of Bridge Maintenance affirms our commitment to meeting the ideals and commitments of the New Hampshire Department of Transportation's Environmental Policy (Policy 501.01, Dated: 11/17/2009).

Our work occurs at the Bureaus yards, sheds, and at numerous project sites statewide. We strive to maximize the life span of our bridge infrastructure through preventive maintenance and construction activities. In addition to our commitment to serve the people who live, work and travel in New Hampshire, we have a commitment to preserve the environment. We interact daily with the natural and cultural resources that make New Hampshire a special place to live and work. Every Bridge Maintenance employee that takes pleasure in outdoor activities is an environmentalist themselves. We therefore have a vested interest in making positive differences in our environment as we go about our daily work. The dedication every Bridge Maintainer has in their work is the most important asset we have to meet our goals.

We will utilize the Environmental Management System process to continuously evaluate and decrease our environmental impacts. Every Bureau employee knows that the seemingly small steps we take can make a difference. Every employee can contribute to this process. In addition to federal, state and local environmental agencies, we will work with our co-workers throughout the Department to find ways to minimize our collective footprint on this land. Our flexibility and ability to adapt to changing situations will be a tremendous asset in this endeavor.
