PRECAST CONCRETE DECK PANEL NOTES

1. Prestressing strands shall be ... 270 seven wire low-relaxation type, conforming to the requirements of ASTM A416. All other reinforcement shall conform to the requirements of AASHTO M31.

2. The deck panel design information for note 2 shall be depicted on the underside of each deck panel to be fabricated. All deck panels shall be marked with the designer and manufacturer's name and serial number.

3. The top surface of the deck panels shall be finish-cast to provide a smooth surface and ensure adhesion of the paint. The finish-cast deck panels shall be smooth to the touch and shall be free of defects.

4. The paint shall be a durable exterior paint that meets the requirements of ASTM A775 and D3963. The paint shall be applied uniformly and shall be resistant to weathering and staining.

5. The bottom surface of the deck panels shall be finish-cast to provide a smooth surface and ensure adhesion of the paint. The finish-cast deck panels shall be smooth to the touch and shall be free of defects.

6. The paint shall be applied uniformly and shall be resistant to weathering and staining.

7. The paint shall be a durable exterior paint that meets the requirements of ASTM A775 and D3963. The paint shall be applied uniformly and shall be resistant to weathering and staining.

8. The paint shall be applied uniformly and shall be resistant to weathering and staining.

9. The paint shall be applied uniformly and shall be resistant to weathering and staining.

10. Engineers shall be responsible for the overall design and construction of the deck panels, including the design of the deck panel details and the selection of materials.

CAST-IN-PLACE CONCRETE NOTES

1. Cast-in-place concrete shall conform to the requirements of ASTM C3028.

2. Cast-in-place concrete shall be placed and compacted in accordance with the requirements of ASTM C3028.

DECK SLAB ELEVATION NOTES

1. Elevation notes shall include the design of the deck slab, including the design of the deck panel details and the selection of materials.

2. Elevation notes shall include the design of the deck slab, including the design of the deck panel details and the selection of materials.

3. Elevation notes shall include the design of the deck slab, including the design of the deck panel details and the selection of materials.

4. Elevation notes shall include the design of the deck slab, including the design of the deck panel details and the selection of materials.

5. Elevation notes shall include the design of the deck slab, including the design of the deck panel details and the selection of materials.

6. Elevation notes shall include the design of the deck slab, including the design of the deck panel details and the selection of materials.

7. Elevation notes shall include the design of the deck slab, including the design of the deck panel details and the selection of materials.

8. Elevation notes shall include the design of the deck slab, including the design of the deck panel details and the selection of materials.

9. Elevation notes shall include the design of the deck slab, including the design of the deck panel details and the selection of materials.

10. Elevation notes shall include the design of the deck slab, including the design of the deck panel details and the selection of materials.
