1. The concrete barriers, as shown on this sheet, are in compliance with the requirements of NCHRP Report 350, TL 4.
2. All reinforcing steel shall be AASHTO M31 (ASTM-A615) Grade 60, epoxy coated. Reinforcement shown is the minimum required.
3. Each barrier unit shall include one S 3 x 7.5 as shown on this plan sheet.
4. Shop drawings shall include reinforcing schedule.
5. Leveling pads or shimming material shall be subsidiary to the barrier item.

Material Notes:
1. The barriers shall be light colored Class "AA" concrete having a minimum 28 day compression strength of 4,000 psi. Barriers shall have a smooth initial surface free of defects and irregularities. Casting date shall be shown on barriers. All exposed edges of concrete shall be chamfered 1/4", unless noted otherwise.
2. All reinforcing steel shall be ASTM Grade 60. Epoxy coated reinforcement shown is the minimum required.
3. Each barrier unit shall include one 3/8" as shown on this plan sheet.
4. Shop drawings shall include reinforcing schedule.
5. Leveling pads or shimming material shall be subsidiary to the barrier item.
