**General Notes**

1. The definition of roadside barrier is for the latest adopted edition of the American Association of State Highway and Transportation Officials (AASHTO) Roadside Design Guide. The FHWA has listed offset blocks on their website that are eligible for federal participation per NCHRP 350 test standards. Manufacturers may make claims about their products being eligible for federal participation under the revised edition of the AASHTO Roadside Design Guide, which includes updated criteria for offset blocks.

2. Items to be constructed shall be standard elements described in the American Association of State Highway and Transportation Officials' (AASHTO)'s "A Guide to Standardized Highway Barriers, Roadside Barriers - See Note No. 1.

3. All use of offset elements in non-conformity with FHWA guidelines is excluded.

4. Use of offset elements in non-conformity with FHWA guidelines is excluded.

5. Establishment of the height of the offset block shall be as follows:
   - Where there is a 4:1 or flatter slope or a 10:1 or flatter slope, the face of the rail shall remain at the edge of the pavement.
   - Where there is a 2:1 slope or steeper, the face of the rail shall be at the back of the guardrail post along a 2:1 or steeper slope.

6. Use of offset elements in non-conformity with FHWA guidelines is excluded.

7. The use of standard offset elements in non-conformity with FHWA guidelines is excluded.

8. Use of offset elements in non-conformity with FHWA guidelines is excluded.

**Section Through Rail Element**

- Space with beam guardrail designated as 12'-6" in standard plans. Non-designated space with beam guardrail, undesignated at the time (nominal 20'-0")

**Sample Guardrail Installation Layout**

- 6" x 8" wood post and 6" x 8" wood offset block (typ.)
- 30" top view
- 6" x 8" wood post with 5" x 5" wood offset (block typ.)

**Clarification Detail for General Note 6**

- Notes for rail in direction of traffic
- Line post elevation view
- Typical side view

**Standard Plans**

- standard plans

**Guardsrail Standard**

- Beam guardrail standard
  - standard section - wood posts & hardware details

---
