

New Hampshire Department of Transportation Citizen's Guide to Transportation Series

The New Hampshire Department of Transportation (NHDOT) relies on input from the people of the State to help them create the best transportation system possible. NHDOT brings this series of informational brochures to the community to help the public understand:

- **how citizens and communities can get involved and help shape the plans and projects**
- **how transportation projects are planned and implemented**

The topic areas summarize public participation, planning, project implementation, and other strategies for transportation improvements across the State. Read one, read all, and tell NHDOT and your regional planning agency what you would like to see happen in your community.

1

Having Your Say in Transportation Projects that Shape Your Community

Describes how to get involved.

2

Planning the Future of New Hampshire Transportation

Explains the planning processes NHDOT follows, and how communities can participate.

3

Project Development: Making Transportation Projects a Reality

Outlines the steps through which a planned facility gains environmental approvals, is designed and then constructed.

4

Access Management

Describes the community benefit in carefully planning points of access – driveways and intersections.

5

Transportation Enhancement Program

Outlines a program that sets aside Federal funds for state-identified projects supporting alternative transportation (walking, cycling) and historic resources.

6

Congestion Management and Mitigation Program

Describes a Federally-funded program focused on air quality improvements through transportation projects, often relating to commuter services and roadway operation.

7

The Transportation/Land Use Relationship

Emphasizes the importance of the local and regional land use planning processes in planning for transportation
