

Municipal Off-system Bridge Replacement and Rehabilitation Program (MOBRR)

Federal aid is available for municipal bridges through a program called Municipal Off-system Bridge Replacement and Rehabilitation (MOBRR). The program typically provides 80% federal funds and requires a 20% local match. In order to qualify for federal aid, the existing bridge must

meet the federal definition of a bridge; i.e. 20 feet or greater in length.

Typically, larger municipal bridge projects that meet the requirements are funded through MOBRR. The MOBRR program manager determines if municipal bridge aid projects are going to be funded through the State Aid Bridge Program or MOBRR. A project funded all or partially with federal MOBRR funds must meet all federal requirements.

For additional information on the federal aid bridge program, contact:

Charles “C. R.” Willeke, PE

Municipal Highways Engineer
