

BPTAC Bike-Ped Counting Subcommittee Interim Progress Report		
Action Steps from Plan, Years 1-2	Non-Scientific Score	Discussion
Develop a list of count locations for each Regional Planning Commission region.	Mostly Not Completed	We have left this mostly to the RPCs, but the RPCs methods for choosing locations could be improved
Collect Data	Completed Pretty Well	All 9 RPCs have collected data, but participation was down this year primarily due to staff turnover.
Upload data to the specified database	Mostly Completed	Nearly all automated data has been uploaded to Eco-Visio as planned, and is fairly readily accessible. Manual count data still needs to be better
Analyze data and incorporate into plans as appropriate.	Could Be Doing More	Some RPCs have generated reports and included findings in to planning documents. We are not aware of NHDOT doing so. Work with Strava data
Evaluate first counting season(s)	We Continue to Work on This	The subcommittee evaluated season 1 and met with RPCs to discuss. More in-dept analysis is ongoing now. Potential update to plan.
