**Subject:** Proposed Visitor Center at exit 6

Good morning,  
Just read the article about the potential of a visitor center being constructed by exit 6—please accept my comments AGAINST the proposed center.

There are amply opportunities along this corridor to fuel up, get food, etc.  
I can think of many other suitable locations further north, that won't impact the quality of life for the many residential neighborhoods affected.

Haven't Dover residents, particularly in the exit 6 area, endured enough construction disturbances and noise/light pollution during the last ten plus years?

Would you please let me know when the next public meeting is, thank you,
