SPECIAL PROVISION**AMENDMENT TO SECTION 101 – DEFINITIONS AND TERMS**

This special provision adds the definition of Limited Reuse Soil and revises the definition of topsoil.

Insert 101.64“A” as follows:

101.64“A” Limited Reuse Soils (LRS). Material within the project that requires a Soils Management Plan* to address soil that is likely and/or demonstrated to contain concentrations of contaminants due to the presence and breakdown of asphalt pavement, the normal operation of motor vehicles, and other “non-point sources” of pollution. The definition of LRS includes:

- All topsoil within the project limits and within the existing right-of-way, regardless of depth.
 - In instances where topsoil is not present, LRS is defined as soil from the top of ground to a depth of six (6) inches.
- Asphalt pavement that has been ground or pulverized (including milled material and reclaimed stabilized base).
- Street waste (catch basin cleanouts, street sweeping, and ditching material).

* For projects where LRS is deemed *de minimis*, soil management will be addressed in the Prosecution of Work and not through a Soils Management Plan.

Revise 101.108 as follows:

101.108 Topsoil. The surface layer of soil consisting of mineral soil mixed with organic matter and vegetative debris that is suitable for plant growth and is typically darker in color than the underlying soil.
