**SPECIAL PROVISION****AMENDMENT TO SECTION 306 -- RECLAIMED STABILIZED BASE**

*This special provision addresses the Limited Reuse Soil issue of reclaimed stabilized base.  
All the requirements as set forth in the Standard Specifications are  
applicable except as modified or changed herein.*

**Amend** 3.7 as follows:

**3.7** Excess material not designated for salvage shall become property of the Design-Build Team and shall be recycled for RAP purposes, such as hot bituminous pavement, crushed gravel for shoulder leveling, and other RAP appropriate products.

**Amend** 3.10 as follows:

**3.10** Reclaimed stabilized base specified to be removed and rehandled shall be processed in the roadway or at an approved off-site location. The reclaimed stabilized base shall be returned to the highway and placed on the prepared roadbed to the depths specified. If the Design-Build Team removes the reclaim stabilized base from the project limits to process or recycle the material, this process shall be addressed in the Project Operations Plan (POP) and approved by the Engineer.
