

## Environmental

Rebuilding I-93 is more than just a roadway and bridge construction project. From the onset of project planning, NHDOT has worked with other state and federal agencies to address environmental concerns associated with the I-93 Corridor.

The following documents are provided upon request:

- The Supplemental Environmental Impact Study (SEIS)
- The Final Environmental Impact Study (FEIS)
- Details on wetland mitigation as well as other aspects of the overall corridor mitigation package.
- Details, documents and meeting information on the Community Technical Assistance Program (CTAP) has been and continues to be developed to help communities in the I-93 region plan for future growth.
- Details, documents and meeting information relative to the Chloride TMDL study being conducted within the corridor.
- The text of the US Army Corps of Engineers Permit No. 199201232/NAE-2004-233.
