

Update on Supplemental Report Summaries

The Department has encountered a number of data quality issues with the 2003 submissions. At least one carrier has indicated that it will need until September 1, 2005 to resolve the data issues the Department had with its 2003 submission. The Department expects to have the 2003 summary completed within two weeks of the resolution of these issues, e.g. September 15, 2005. Check back to the Department's website for the completed report.

The Department will begin work on the 2004 summary once the 2003 summary has been completed. Assuming there are no data issues with the 2004 submissions, the Department expects to have this work completed by November 30, 2005.
