PART I - GENERAL INFORMATION FOR RESPONDENTS

1. PURPOSE

The N.H. Liquor Commission (“NHLC”) seeks to procure Heating Ventilation and Air Conditioning (HVAC) annual preventative maintenance and repair services at various retail store locations throughout New Hampshire. The NHLC is issuing this request for bids (“RFB”) as a vehicle for soliciting and evaluating bids from interested parties. This RFB describes the project and the NHLC’s requirements. A respondent may submit a bid for HVAC services as further described in Section 23 of this RFB governing “Method of Award.”

2. ISSUING OFFICE

This Request for Bid (“RFB”) is issued by the N.H. Liquor Commission (“NHLC”) that shall serve as the Issuing Office for this RFB. The Issuing Officer responsible for managing the RFB and serving as the sole point of contact is:

Mr. John Tower, Maintenance Engineer
NH State Liquor Commission
P.O. Box 503
Concord, NH, 03302-0503
(tel: 603-271-1710 or 603-419-9069-cell)
(email: jtower@liquor.state.nh.us).

All inquiries regarding this RFB must be submitted electronically to the Issuing Officer.

3. SCOPE

This RFB contains instructions governing the required content of bids, terms governing this procurement process, a description of the services sought by the NHLC, requirements that a respondent must satisfy to be eligible for consideration, evaluation criteria, a description of standard contract terms and conditions, and other requirements that must be satisfied in each bid.

4. PROJECT NEED

The intent of this RFB is to provide annual preventative maintenance and service for the heating and air conditioning systems and associated devices as described within.

5. PROJECT DELIVERABLES

The NHLC’s HVAC deliverables for this engagement consist of the following:

Respondents must be a Qualified Services Company that is able and responsible to perform all activities and requirements set forth in the performance of this specification for services. Energy Management Systems service contractor shall be Johnson Controls Authorized Building Controls Specialist (ABCS).

All Energy Management Systems are Johnson Controls Metasys brand (N30).

Respondents may from time to time contact NHSLC's Energy Services Company, Ameresco, Inc. (508)-661-2232 which is engaged in an on-going Energy Savings Performance Contract with NHSLC. Ameresco has many energy savings strategies employed through the various systems. Furthermore, the Energy Management Systems will also be used for monitoring and measuring the energy consumption of a facility or specific equipment or systems.

Respondents are recommended to visit each facility listed within, and perform a comprehensive assessment of the equipment and systems prior to submitting a response. The respondent **must** contact the store manager for each location listed in Exhibit D, and make arrangement prior to arrival. The respondent must at the time of visit request the sign-in sheet from the Store Manager.

System Operation: All work and costs associated with ongoing, normal equipment adjustments necessary to satisfy the building occupants and assure the continued effective and efficient operation of equipment or systems.

Major repair service: These services will require an estimate for work to be provided at no charge to the NHSLC. In addition, the State reserves the right to get a second estimate for major repairs.

Preventive Maintenance: All work and costs associated with periodic inspections, tests, calibrations and adjustments required for sustaining or restoring equipment or systems to as-designed performance.

Preventative maintenance is expected to be billed at a fixed rate per store for fall and spring preventative maintenance on Part III, Item#1, any service required above and beyond normal manufacturer preventative maintenance will require an estimate to be approved by the maintenance engineer before any work is performed. Any work performed above preventative maintenance must be billed on a separate invoice at the rates listed in Part III, Item #2.

The cost shall include System Operation and Preventive Maintenance for all equipment and systems and shall further include Corrective Maintenance for the Energy Management Systems.

Account Manager: Provide service coordination and ensure proper delivery and documentation of the overall service program with NHSLC.

Service Documentation:

Upon arrival at the site the Contractor shall sign in with the manager of the store or person in charge and after upon leaving each visit. Before leaving the job site present a written summary of the work performed and obtain the State's signature thereon. (time of day must be written in and manager must initial at time of arrival and again at time of departure)

At the completion of each planned operational checkout, scheduled service visit or unscheduled service call, provide a complete service report to the Liquor Commission for review and record. The service report will include all adjustments made or action taken, with a clear indication of the final outcome and any adverse effect on the energy savings.

A separate work order must be made on each unit and sent in with the invoice for payment. The Liquor Commission representative is the contact person and the only one that can request services except for an emergency repair call.

The Contractor will be responsible for presenting an annual report by store on the condition of all equipment as well as recommendations for future repairs. This report must be sent to the Liquor Commission Maintenance Engineer, no later than the first Friday of January each year.

Service Response Times: Standard response times for all non-critical service shall be within 24 hours from time of notification. Critical service, which includes a loss of heating or a life safety situation, will be responded to within four (4) hours from time of notification. Contractor shall maintain a 24 hour phone number for emergency service requests.

Equipment: The systems covered by this agreement, their respective locations and manufacturers, are as follows: (Note: Modifications and/or new replacement equipment added during the term of the contract is also the responsibility of the Vendor.)
