### Statement from Governor Hassan on House Passage of Ten-Year Transportation Improvement Plan

CONCORD – Governor Maggie Hassan issued the following statement on the Ten-Year Transportation Improvement Plan passed today by the New Hampshire House of Representatives:

“A solid and modern transportation infrastructure is critical to the success of our people and businesses, and the Ten-Year Transportation Improvement Plan passed by the House today advances a number of critical transportation goals that will help build on our bipartisan progress over the last several years. This includes maintaining and preserving our roads and bridges, completing the widening of Interstate 93, accelerating construction of Exit 4A in Londonderry and Derry and the first phase of widening the portion of Route 106 critical for access to the New Hampshire Motor Speedway.

“However, I am disappointed that the leveraging of federal funds for the environmental and engineering work necessary to bring commuter rail from Boston to Nashua and Manchester was removed. The business community continues to call on us to take action because commuter rail will improve access to the entire region, provide new housing and transportation opportunities, spur economic development and create jobs. I remain committed to working with members from both parties, local communities, the federal government, our businesses and Massachusetts to find a consensus and make this vital project a reality.”
