# 2017 CREATIVE INDUSTRIES U.S. STATES 

Data Source: Dun \& Bradstreet, April 2017. Data Analysis: Americans for the Arts, August 2017.

www.AmericansForTheArts.org/CreativeIndustries
This Creative Industries: Business \& Employment in the Arts comparative report provides a research-based approach to understanding the scope and economic importance of the arts in the United States. The creative industries are composed of arts businesses that range from nonprofit organizations such as museums, symphonies, and theaters to for-profit businesses such as motion picture and design companies, and architecture firms. Arts businesses and the creative people they employ stimulate innovation, strengthen America's competitiveness in the global marketplace, and play an important role in building and sustaining economic vibrancy. In a global economy, the creative industries are durable and enduring local employers.

Nationally, 673,656 businesses are involved in the creation or distribution of the arts, and they employ 3.48 million people. This represents 4.01 percent of all U.S. businesses and 2.04 percent of all U.S. employees-demonstrating statistically that the arts are a formidable business presence and broadly distributed across our communities. The source for these data is Dun \& Bradstreet, the most comprehensive and trusted source for business information in the United States. These data are current as of April 2017.
