Bear Brook Forest and Wildlife Management Timber Sale Walk
When June 10- 5-7pm
Meeting location- Hiker Biker parking lot on Podunk Rd, Bear Brook State Park

Join us as we visit the project area to explain how the timber harvest will be conducted to meet a variety of objectives including improving forest health, timber quality, and wildlife habitat diversity. Specific topics that will be discussed during this tour include: How timber harvesting will be used to accomplish timber management and wildlife habitat management objectives; Using uneven-aged forest management to diversity forest structure; Management consideration for protecting turtle habitat while timber harvesting; Balancing timber management objective and aesthetics in an area with heavy recreational use.
