The New Hampshire Timberland Owners Association (NHTOA) in Concord, NH, is working in partnership with the University of New Hampshire Cooperative Extension and the University of New Hampshire Thompson School of Applied Sciences on a new program to inform high school and junior high school students about careers in forestry, wildlife, natural resources, wood technology, logging, forest engineering, technology, sawmill operations, etc.

This partnership plans to develop job shadowing and apprenticeship programs for students. As a way to gauge interest in these programs and to introduce young men and women to career opportunities in the forest industry, we will host a “Forest Career Field Day” on May 7, 2020, at Bear Brook State Park in Allenstown, NH.

We are extending an invitation to you and your students to attend this important event. This event will provide students with a glimpse into one of New Hampshire’s largest industries. Please visit our website, email us, or call the office for more information and to register as an exhibitor, sponsor, school or volunteer.
