

Archaeological Consultants

The NH Division of Historical Resources (NHDHR) maintains a list of qualified archaeologists who are actively working in NH for project proponents who require professional archaeological services. This list is provided as a service to the public and is published with the understanding that the NHDHR does not recommend, endorse, or assume responsibility for the quality of work of any individual or firm on this list. Project proponents should perform due diligence by checking credentials and obtaining multiple bids when hiring a consultant. Consultants are added to the list at their request if they meet the qualifications under 36CFR61, the Secretary of the Interior’s Professional Qualification Standard for Archaeology and meet NHDHR’s additional qualifications. Consultants are identified as meeting qualifications for pre-contact, post-contact and/or underwater archaeological services. The list is arranged alphabetically by firm or by last name of individual if there is no firm name given.

ACS

118 Whitfield Street

Guilford CT 06437

Phone: 203-458-0550

Contact: **Gregory F. Walwer, Ph.D**

Fax:

Email: acsinfo@yahoo.com

Dudek is an environmental consulting and engineering firm which includes a team of seasoned archaeologists and architectural historians. We offer full-spectrum cultural resources support from basic constraints studies to complex mitigation and preservation plans. Our Registered Professional Archaeologists leverage more than a century of combined experience, including more than 25 years of experience in New England. Our team is agile and can cost-effectively respond to the smallest cultural resource survey while also assembling a crew of a dozen or more experienced field technicians to address large-scale reconnaissance and survey, significance assessment excavation, and/or a mitigation data recovery program. Dudek senior archaeologists meet or exceed qualification requirements to obtain all necessary permits to conduct cultural resources investigations on federal and state lands. Our cultural resource project managers are familiar with variations in lead agency cultural resource guidelines and standardized methods, as well as the need to coordinate various agencies when project interests have overlapping jurisdictions.

SEARCH provides a full range of traditional and specialized services in archaeology, architectural history, historic preservation, conservation/curation, public outreach, and national and state regulatory compliance. Our architectural history capabilities include restoration and reuse planning, economic analysis, HABS, HAER, and HALS recordation standards, and tax credit eligibility assessments. SEARCH also provides highly specialized tasks in maritime archaeology, with USACE-certified divers and experts in historic shipwrecks, submerged prehistoric resources, remote sensing, and conservation. We have a best-in-industry reputation for emergency and rapid response, major project logistics, and provide innovative, cost-effective alternatives to traditional mitigations including Ground Penetrating Radar (GPR), LiDAR-based predictive modeling, and high-density laser scanning.

The Ottery Group offers a wide variety of services in archeology, historic preservation, and the environmental sciences. Since 1998, the firm has had experience in Section 106 documentation for compliance with the National Historic Preservation Act (NHPA) and the National Environmental Policy Act (NEPA). Ottery Group staff has completed a broad range of Phase I, II, and III cultural resources projects throughout the eastern United States for a variety of federal, state, county, municipal, corporate, and private clients. Our extensive experience in natural and cultural resources projects provides reports tailored to meet state, federal, and tribal requirements.

Description of Services: Carol S. Weed, an independent consultant, offers pre-contact archaeological consulting services for public and private projects. The services are limited to due diligence reviews and Phase IA documentary studies for Federal, State, local government, utilities, engineering firms, and developers. Ms. Weed meets the US Secretary of Interior (36CFR61) standards as a professional archaeologist and is a member of the Register of Professional Archaeologists (Member #989090). She has worked in the U.S. Northeast and its once-glaciated settings for over 40 years as a cultural resources Project Manager and Principal Investigator for all phases of archaeological investigations

WSP USA, Inc. maintains a full-service Cultural Resource Management (CRM) firm with the capability to guide projects of all sizes through the CRM process. We can help to identify and mitigate developmental impacts and conserve cultural heritage resources across the world or locally, delivering solutions that respect the environmental, aesthetic, cultural, and historical values that shape our communities and their collective identities. WSP has advised on archaeological sites, landscapes, structures, and monuments locally and globally. Our experts understand international, national, local planning policy and best practice, and can advise clients on compliance at all stages of a project. We liaise extensively with the public, local architectural conservation advisory committees, and other stakeholders.
