

New Correctional Facility for Women Construction Update for August 19, 2016

We are completing construction week #21 of the new Correctional Facility for Women in Concord. The concrete block shear wall for the Gymnasium area is complete. (Pic below) We anticipate there will be some additional steel door frames set and then work will begin on the minimum security housing area. Great news! We received some additional funding through a grant for the installation of solar panels to heat water; we are now in the final design phase to place those panels on roof areas. The project remains on track and within budget.
