

## **New Correctional Facility for Women Construction Update for October 5, 2016.**

We have completed construction week #28 of the new Correctional Facility for Women in Concord. All future updates will be less specific on the facility design as we start completing all areas behind the secure perimeter and installing correctional grade equipment within. Security systems subcontractors will be on site beginning this week and continue throughout the rest of the project with substantial completion on September 30, 2017.

As we move into colder weather, the buildings will begin to be closed in and temporary heat will be installed so that all work can continue throughout the winter.

The project remains on schedule and within budget.
