Partnerships for Healthy Communities

Integrating Public Health & Community Planning
Questions to Think About

1. Are you aware of any successes where planning partnered with public health to improve community health, livability and vitality?

2. What can you do to support the integration of public health with community planning, in particular, to improve access to healthy foods and opportunities to be active?

Policy, Systems, & Environmental Changes

**Policies**
Changes to laws, ordinances, resolutions, mandates, regulation, rules, etc.

**Systems**
Strategies that impact all elements of an organization, institution, or system.

**Environments**
Physical or material changes to the economic, social, or physical environments.
Communities In Action

Ashland HEAL
A COMMUNITY IN ACTION

"The HEAL program has inspired the community to live a more authentic life by taking responsibility for their own health. We are living the message and it feels good."

Paul Busser Jr., Town Administrator
Town of Ashland

Berlin HEAL
A COMMUNITY IN ACTION

"Through Berlin HEAL’s community assessment process, city residents told us they wanted community garden space closer to the downtown. With the help of city-wide partners, we are able to create that space for them!"

Angela Martin-Collins
Administrator of Wellness & Health Office of the City of Berlin

Lakes Region HEAL
A COMMUNITY IN ACTION

"Your voices were heard and the Wyatt Park plans proposed by the community were voted for! Let the changes begin and let’s revitalize Wyatt Park!"

Jill Wright-Bolster
Wyatt Park Association

Nashua HEAL
A COMMUNITY IN ACTION

“I have been working with our Division of Public Health and Community Services and others to start a community garden on the Rail Trail section that was adopted. It’s near the community center. It’s a high-traffic area. I think it will answer a lot of the questions about security.”

Shea Nelson, Deputy Director
Nashua Police, NHPD

Ashland’s Top HEAL Strategies

- Healthy Restaurant Program helping local eateries and other community members
- Development of a local playground
- Development of a community garden on school grounds
- New Safe Routes Committee dedicated to increasing accessibility and safety for pedestrians and bicyclists

Berlin’s Top HEAL Strategies

- Community Garden and Playground will be developed with Neighborhood Foundations and REA Funds by repurposing a green space left by the debacle of displaced housing
- Expansion of walkways will be implemented to increase walking and biking safety in and around the City
- Wayfinding/Signage – including street, trail, and trail signs – for local trail and walking routes in the City will be installed in the region of community residents

Lakes Region’s Top HEAL Strategies

- Park renovations, including a walking trail around the park and safety features such as lighting and benches
- Promoting water consumption by installing water stations in the park
- Safe access to the park by relocating dangerous crossties, removing pedestrian signs, and improving existing sidewalks

Nashua’s Top HEAL Strategies

- Nashua’s Top HEAL Strategies
- The Nashua Division of Public Health and Community Services collaborated with local agencies to identify strategies that increase access to healthy food and opportunities for recreation in the New Street Neighborhood
- Neighborhood residents and local nonprofit agencies will receive funding from the Next Avenue Grant Program
- Nashua HEAL will generate increased usage of the Nashua Rail Trail through creative use of community spaces, events, and additional improvements

Visit www.HEALNH.org for more information and updates on the HEAL Program in New Hampshire.
Audit Introduction

What is a Land Use Audit?
Land use audits are designed for communities who want to analyze their land use regulations and related documents to see how well they support specific goals and identify gaps for improvement.

Why is this Audit Important?
The Plan4Health Nashua project and audit is focused on promoting complete streets guidelines that support equitable access to safe, healthy multi-modal transportation, economic growth, and quality of life in Nashua.

What Topics are Addressed?
This audit is divided into the following five topics:
1. Safety
2. Transportation
3. Land Use
4. Design
5. Site Specific

Which Documents were Reviewed?
- Land Use Code
- Code of the City of Nashua
- Roadway and Sidewalk Design Standards
- City of Nashua Master Plan
- Downtown Master Plan
- East Hollis Street Master Plan
- Tree Streets Plan

Understanding the Audit
Each of the five topic areas include an analysis, potential action steps and a matrix of all of the criteria used to review and evaluate each topic area. The matrix also indicates how thoroughly each element is addressed for each topic. The suggested action steps could be implemented by the city to better meet the needs of pedestrians and bicyclists. This is further discussed in the Nashua Complete Streets Guide, 2016.
The Berlin Daily Sun

COUNCIL APPROVES PARK PLANS

Excerpts from article published May 7, 2013

BERLIN – The city council gave its blessing Monday night to two proposals for projects that will create small parks in different sections of the city.

One, at 3 Glen Avenue, will clean up the southern entrance to the downtown and provide general and handicap parking. The other, at 115 Mason Street, will expand an existing park to provide a small playground and community garden space. In both cases, the land was or will be obtained from demolishing dilapidated buildings the city obtained through tax deed...

...The Mason Street project, developed by city staff, calls for a mixed-use park and community garden area on Mason Street. Former Housing Coordinator Andre Caron created a small park area a couple of years ago at the corner of Granite and Mason Streets, but the city postponed developing the park further because it appeared the city would obtain the 115 Mason Street property by tax deed. The city did get the property and this year demolished the building.

The city has $28,750 left from its first Neighborhood Stabilization Program grant for the project. Housing Coordinator Linda White developed a budget that included some playground equipment, picnic tables, and fencing for the park. She also included in the budget money for summer playground staff and park maintenance. Money for the raised garden beds and soil will be covered by funds from a Healthy Eating Active Living grant.

There will be parking at the site for those cars. Initial plans call for 12 to 14 raised garden beds that will be assigned to interested residents through Berlin Parks and Recreation.

While said she hopes to get the project underway immediately so the park can be available for use this summer. The council formally voted to approve both projects.

Lakes Region HEAL
CASE STUDY: WYATT PARK REVITALIZATION

“We had recently done road upgrades on the street sections adjacent to Wyatt Park, but we hadn’t addressed accessibility improvements to the adjacent sidewalk. The HEAL Grant initiative prompted us to revisit the pedestrian and active transportation needs at this site and to broaden our view to accomplish similar improvements on other city roadway upgrade projects in the future.”

Paul Moynihan, Director
City of Laconia Public Works Department

Wyatt Park Renovation Highlights
The Wyatt Park Revitalization Project in Laconia, NH, was developed as a result of a two-year HEAL NH grant awarded to the City of Laconia in collaboration with Lakes Region HEAL. The grant was awarded in early 2012 to help Laconia identify and implement municipal strategies to provide more choices for residents to eat healthy and be physically active in the Wyatt Park-South End Community.

With the HEAL grant in place, the project gained momentum and support from community members and the City. The Department of Public Works modified its original plans for street repair in the area and invested an additional $15,000+ to include safety and accessibility improvements around the park. The City Council reallocated $50,000 to Wyatt Park improvements.

Improvements to Wyatt Park include:
- Water bubbler/bottle filling station in the park
- Bike rack and picnic tables
- High visibility signs, new crosswalks, sidewalks with tipdowns with detectable warning devices, and other pedestrian safety and accessibility measures
- New fencing and signage around the park
- Resurfaced basketball court painted for multiple use including basketball, four square, hopscotch, and pickleball
- Lighting inside the park for safety
- Walking path installed around the park perimeter with extra green space

HEAL NH • Partnerships for Healthy Communities • www.healnh.org
HEAL NH funding is provided by HNH Foundation, Anthem Blue Cross and Blue Shield Foundation, Endowment for Health, NH Charitable Foundation, and NH Department of Health and Human Services.
Manchester’s Community Schools Model

- A community school is both place and partnerships between the school and other community resources.
- Using public schools as hubs, enduring relationships are built among educators, families and community members.
- This means:
  - Listening to our neighbors.
  - Improving access to health care.
  - Increasing social capital by coordinating and organizing community-based events.
  - Focusing on neighborhood improvement efforts.
Questions to Think About

1. Are you aware of any successes where planning and public health partnered to improve community health, livability and vitality?

2. What can you do to support the integration of public health with community planning, in particular, to improve access to healthy foods and opportunities to be active?
