Drinking Water Protection Responses - OEP 2014

This information is compiled from responses to the annual Municipal Land Use Regulation Database Survey sent out by OEP on June 3, 2014. Information is self-reported from responding municipalities. By the end of the year, 126 of the 234 towns and cities in NH had responded to the 2014 survey or about 54 percent. The following information is from those responding towns and cities.

Stormwater Management Ordinance adopted 12/15/09 (Article 980)
Municipality Name: Lancaster  
Survey Response: 6/26/2014

A groundwater protection and/or aquifer protection ordinance?  
If yes, maximum impervious coverage (%)

A shoreland protection ordinance?  
If yes, primary building setback (feet)

A wetlands protection ordinance?  
If yes, wetland buffer (feet)

A surface water protection ordinance?  
If yes, primary buffer distance from water supply (feet)

A watershed protection ordinance to protect water supplies?  
A rule or requirement to infiltrate all post-development stormwater on-site?  
Any other water resource protections? (explain)
Municipality Name: Lebanon
Survey Response: 6/18/2014

A groundwater protection and/or aquifer protection ordinance? ☐
If yes, maximum impervious coverage (%)

A shoreland protection ordinance? ☑
If yes, primary building setback (feet)
50 ft

A wetlands protection ordinance? ☑
If yes, wetland buffer (feet)
100 ft high and very high value only

A surface water protection ordinance? ☐
If yes, primary buffer distance from water supply (feet)

A watershed protection ordinance to protect water supplies? ☐

A rule or requirement to infiltrate all post-development stormwater on-site? ☐

Any other water resource protections? (explain)

A shoreland protection ordinance? ✅

If yes, primary building setback (feet)

75

A wetlands protection ordinance? ✅

If yes, wetland buffer (feet)

100' vpd soil; 50' pd soil

A surface water protection ordinance? ❌

If yes, primary buffer distance from water supply (feet)

A watershed protection ordinance to protect water supplies? ❌

A rule or requirement to infiltrate all post-development stormwater on-site? ❌

Any other water resource protections? (explain)

Drinking Water Protection Responses - OEP 2014  Tuesday, June 09, 2015  Page 86 of 97
A groundwater protection and/or aquifer protection ordinance?  
If yes, maximum impervious coverage (%)

20

A shoreland protection ordinance?  
If yes, primary building setback (feet)

50

A wetlands protection ordinance?  
If yes, wetland buffer (feet)

none

A surface water protection ordinance?  
If yes, primary buffer distance from water supply (feet)

A watershed protection ordinance to protect water supplies?  
A rule or requirement to infiltrate all post-development stormwater on-site?  
Any other water resource protections? (explain)
A groundwater protection and/or aquifer protection ordinance?  
If yes, maximum impervious coverage (%)

A shoreland protection ordinance?

A watershed protection ordinance to protect water supplies?  
A rule or requirement to infiltrate all post-development stormwater on-site?  
Any other water resource protections? (explain)
Municipality Name: Swanzey

A groundwater protection and/or aquifer protection ordinance? ☑
If yes, maximum impervious coverage (%)

A shoreland protection ordinance? ☑
If yes, primary building setback (feet)
125

A wetlands protection ordinance? ☑
If yes, wetland buffer (feet)
125’ setback for leachfield from wetlands

A surface water protection ordinance? ☑
If yes, primary buffer distance from water supply (feet)

A watershed protection ordinance to protect water supplies? ☑

A rule or requirement to infiltrate all post-development stormwater on-site? ☑

Any other water resource protections? (explain)
A groundwater protection and/or aquifer protection ordinance?  
If yes, maximum impervious coverage (%)

A shoreland protection ordinance?  
If yes, primary building setback (feet)

A wetlands protection ordinance?  
If yes, wetland buffer (feet)  
25/75/100/125

A surface water protection ordinance?  
If yes, primary buffer distance from water supply (feet)  
25/75/100/125

A watershed protection ordinance to protect water supplies?  

A rule or requirement to infiltrate all post-development stormwater on-site?  

Any other water resource protections? (explain)  
All surface waters are included in the setbacks/Buffer of the wetlands ordinance.

A groundwater protection and/or aquifer protection ordinance?  ✔
If yes, maximum impervious coverage (%)

A shoreland protection ordinance?  ✔
If yes, primary building setback (feet)

A wetlands protection ordinance?  ☐
If yes, wetland buffer (feet)

A surface water protection ordinance?  ☐
If yes, primary buffer distance from water supply (feet)

A watershed protection ordinance to protect water supplies?  ☐

A rule or requirement to infiltrate all post-development stormwater on-site?  ☐

Any other water resource protections? (explain)

A groundwater protection and/or aquifer protection ordinance? ✓

If yes, maximum impervious coverage (%)

30

A shoreland protection ordinance? □

If yes, primary building setback (feet)

we use state codes and standards

A wetlands protection ordinance? ✓

If yes, wetland buffer (feet)

100-150 ft. depending on slope

A surface water protection ordinance? ✓

If yes, primary buffer distance from water supply (feet)

varies

A watershed protection ordinance to protect water supplies? ✓

A rule or requirement to infiltrate all post-development stormwater on-site? □

Any other water resource protections? (explain)

Cobbetts Pond and Canobie Lake Watershed Protection Ordinance - Section 616 of the Zoning Ordinance.
